Glossary

Appropriate Assessment

The obligation to undertake Appropriate Assessment derives from Article 6(3) and 6(4) of the Habitats Directive 92/43/EEC. AA is a focused and detailed impact assessment of the implications of a strategic action (such as a plan or programme) or project, alone and in combination with other strategic actions and projects, on the integrity of a European Site in view of its conservation objectives.

Biodiversity and Flora and Fauna

Biodiversity is the variability among living organisms from all sources including inter alia, terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are a part; this includes diversity within species, between species and of ecosystems' (United Nations Convention on Biological Diversity 1992).

Flora is all of the plants found in a given area.

Fauna is all of the animals found in a given area.

Environmental Problems

Annex I of Directive 2001/42/EC of the European Parliament and of the Council of Ministers, of 27th June 2001, on the assessment of the effects of certain Plans and programmes on the environment (the Strategic Environmental Assessment Directive) requires that information is provided on 'any existing environmental problems which are relevant to the plan or programme', thus, helping to ensure that the proposed strategic action does not make existing environmental problems worse.

Environmental problems arise where there is a conflict between current environmental conditions and ideal targets. If environmental problems are identified at the outset they can help focus attention on important issues and geographical areas where environmental effects of the plan or programme may be likely.

Environmental Vectors

Environmental vectors are environmental components, such as air, water or soil, through which contaminants or pollutants, which have the potential to cause harm, can be transported so that they come into contact with human beings.

Mitigate

To make or become less severe or harsh.

Mitigation Measures

Mitigation measures are measures envisaged to prevent, reduce and, as fully as possible, offset any significant adverse impacts on the environment of implementing a human action, be it a plan, programme or project. Mitigation involves ameliorating significant negative effects. Where there are significant negative effects, consideration should be given in the first instance to preventing such effects or, where this is not possible, to lessening or offsetting those effects. Mitigation measures can be roughly divided into those that: avoid effects; reduce the magnitude or extent, probability and/or severity of effects; repair effects after

they have occurred; and compensate for effects, balancing out negative impacts with other positive ones.

Protected Structure

Protected Structure is the term used in the Planning and Development Act and Regulations (as amended) to define a structure included by a planning authority in its Record of Protected Structures. Such a structure shall not be altered or demolished in whole or part without obtaining planning permission or confirmation from the planning authority that the part of the structure to be altered is not protected.

Recorded Monument

A monument included in the list and marked on the map that comprises the Record of Monuments and Places that is set out county by county under Section 12 of the National Monuments (Amendment) Act, 1994 by the Archaeological Survey of Ireland. The definition includes Zones of Archaeological Potential in towns and all other monuments of archaeological interest that have so far been identified. Any works at or in relation to a recorded monument requires two months' notice to the former Department of the Environment, Heritage and Local Government (now Department of Culture, Heritage and the Gaeltacht) under Section 12 of the National Monuments (Amendment) Act, 1994.

Scoping

Scoping is the process of determining what issues are to be addressed, and setting out a methodology in which to address them in a structured manner appropriate to the plan or programme. Scoping is carried out in consultation with appropriate environmental authorities.

Strategic Actions

Strategic actions include *Policies/Strategies*, which may be considered as inspiration and guidance for action and which set the framework for Plans and programmes; *Plans*, sets of co-ordinated and timed objectives for the implementation of the policy; and *Programmes*, sets of projects in a particular area.

Strategic Environmental Assessment (SEA)

Strategic Environmental Assessment (SEA) is the formal, systematic evaluation of the likely significant environmental effects of implementing a plan or programme before a decision is made to adopt it.

Strategic Environmental Objective (SEO)

Strategic Environmental Objectives (SEOs) are methodological measures developed from policies which generally govern environmental protection objectives established at international, Community or Member State level and are used as standards against which the provisions of the Plan and the alternatives can be evaluated in order to help identify which provisions would be likely to result in significant environmental effects and where such effects would be likely to occur, if - in the case of adverse effects - unmitigated.

Section 1 SEA Introduction and Background

1.1 Introduction and Terms of Reference

This is the Strategic Environmental Assessment (SEA) Environmental Report for SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan (hereafter referred to as 'the Plan'). It has been undertaken by CAAS Ltd. on behalf of Fáilte Ireland.

1.2 SEA Definition

Environmental assessment is a procedure that ensures that the environmental implications of decisions are taken into account before such decisions are made. *Environmental Impact Assessment*, or EIA, is generally used for describing the process of environmental assessment for individual projects, while *Strategic Environmental Assessment* or SEA is the term that has been given to the environmental assessment of plans and programmes, which help determine the nature and location of individual projects taking place. SEA is a systematic process of predicting and evaluating the likely significant environmental effects of implementing a proposed plan or programme, in order to ensure that these effects are adequately addressed at the earliest appropriate stages of decision-making in tandem with economic, social and other considerations.

1.3 SEA Directive and its transposition into Irish Law

Directive 2001/42/EC of the European Parliament and of the Council of Ministers, of 27th June 2001, on the Assessment of the Effects of Certain Plans and Programmes on the Environment, referred to hereafter as the SEA Directive, introduced the requirement that SEA be carried out on plans and programmes which are prepared for a number of sectors, including tourism.

The SEA Directive was transposed into Irish Law through the European Communities (Environmental Assessment of Certain Plans and Programmes) Regulations 2004 (Statutory Instrument Number (SI No. 435 of 2004) and the Planning and Development (Strategic Environmental Assessment) Regulations 2004 (SI No. 436 of 2004). Both sets of Regulations became operational on 21st July 2004. The Regulations have been amended by the European Communities (Environmental Assessment of Certain Plans and Programmes) (Amendment) Regulations 2011 (SI No. 200 of 2011) and the Planning and Development (Strategic Environmental Assessment) (Amendment) Regulations 2011 (SI No. 201 of 2011).

1.4 Implications for the Plan

Article 3 para. 2 of the SEA Directive, introduced the requirement that SEA be carried out on plans and programmes, or modifications to these:

- a) which are prepared for agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications, tourism, town and country planning or land use and which set the framework for future development consent of projects listed in Annexes I and II to the EIA Directive¹, or
- b) which, in view of the likely effect on sites, have been determined to require an assessment pursuant to Article 6 or 7 of the Habitats Directive² i.e. the Directive requires that SEA is undertaken where Stage 2 Appropriate Assessment (AA)³ is being undertaken on plans, programmes etc.

¹ Directive 2011/92/EU of the European Parliament and of the Council of 13 December 2011, on the assessment of the effects of certain public and private projects on the environment (codification)

² Council Directive 92/43/EEC on the Conservation of natural habitats and of wild fauna and flora

³ AA is provided for by the Habitats Directive and is a focused and detailed impact assessment of the implications of a strategic action or project, alone and in combination with other strategic actions and projects, on the integrity of a European Site in view of its conservation objectives.

The tourism sector Plan does not contribute towards the framework for future development consent of projects listed in Annexes I and II to the EIA Directive and does not contain provisions or define rules that must be complied with when administrative consent of other projects is being granted.

The Plan does, however, fall under the definition of a "plan" contained within the Birds and Natural Habitats Regulations 2011 (as amended) and therefore must be screened for the need to undertake AA. The Screening for AA has found that the Plan has the potential, if unmitigated, to affect the ecological integrity of European Sites and that measures to ensure that potential effects are avoided are required. Taking into account the requirements of the Habitats Directive and recent case law (specifically, European Court of Justice Judgement C323-17), Stage 2 AA was therefore required to be carried out for the Plan. As Stage 2 AA has been undertaken on the Plan, SEA was also undertaken - see requirement at b) above. An SEA Determination is provided at Appendix I.

This SEA Environmental Report provides the findings of the SEA and should be read in conjunction with the Plan. An earlier version of this report has been placed on public display and altered in order to take account of recommendations contained in submissions and in order to take account of non-material changes which were made to the Plan on foot of submissions. Fáilte Ireland has taken into account the findings of this report and other related SEA output during their consideration of the Plan and before it was finalised. On finalisation of the Plan, an SEA Statement is prepared which summarises, inter alia, how environmental considerations have been integrated into the Plan.

Section 2 The Plan

2.1 Overview

The **focus** of the Three Peninsulas⁴ Visitor Experience Development Plan (VEDP) is on strengthening the value of tourism to the local economy. The area's **Destination Promise** is:

"A haven of absolute beauty and rest that draws you in from the moment you arrive - where you can discover kinship, sense empowerment, and absorb creative energy."

The Plan's **Vision** is as follows:

Extend the season, increase overnight visitation and visitor spend, and attract visitors to engage with the true essence and story of the peninsulas and islands of the Three Peninsulas of West Cork and Kerry without compromising the environment or culture of the region.

The **Key Objectives** of the Plan are to develop compelling experiences for this stretch of the Wild Atlantic Way that will:

- Position the peninsulas as a 'must do' destination and motivate visitors to stay overnight and spend more;
- Extend the length of the season;
- Improve the overall economy of communities through strengthening individual businesses, creating new entrepreneurial opportunities sustaining and increasing job creation and increasing the attractiveness of the area for other forms of economic growth;
- Align to the Wild Atlantic Way brand and target markets;
- Support community values and aspirations, and strengthen community appreciation of local culture and intangible heritage;
- Support sense of place enhancement;
- Promote collaboration and partnership, support engagement of businesses, and build lasting links between national and regional partners, local agencies and associations, and local tourism experiences; and
- Protect the natural heritage and special environmental character of the Region.

To help achieve the Plan's Vision and Objectives, **Catalyst Projects** have been identified, along with a range of **Supporting Actions** and **Enablers of Success**.

The thirteen **Catalyst Projects** identified by the Plan as follows:

1. Develop the concept of a Twilight Series of weekend evening food and cultural events within the region
2. Establish a year round venue for the West Cork Music Festival
3. Develop the proposed Bonane Heritage & Interpretation Centre
4. Restore the Boathouse on Inacullin / Garinish Island
5. Work towards including the Mizen Head Signal Station in the Great Lighthouses of Ireland tourism initiative.
6. Complete the restoration of Lonehart Battery on Bere Island
7. Progress the Schull Harbour development
8. Develop and improve moorings at Castletownbere for leisure vessels
9. Implement the Beara Breifne Masterplan and develop connectivity between the between the Beara Way, Sheep's Head Way and the Kerry Way
10. Support the development of O'Daly Bardic School project
11. Work toward opening the disused copper mine at Allihies for pre booked guided tours
12. Develop the two car aerial tramway system to Dursey Island, the visitor centre and related visitor facilities
13. Improve the tourism offering of Bantry through its 'Destination Town' designation

Note: for the above when proposals are progressed to feasibility stage consultation with relevant interested parties will take place.

All of the Experiences identified by the Plan are aligned to two Themes:

- **Cultural Fusion** (with Hero Themes of Flavours of Fusion, Artistic Encounters and Celestial Sanctuary); and
- **Vibrant Resilience** (with Hero Themes of Harmonious Confrontation, Kith Kin and Clan and Marginal Livelihoods).

The Plan identifies a series of actions for **Enablers of Success** relating to:

1. Governance
2. Destination Development
3. Improving Access to and within the Region
4. Strengthening Supporting Infrastructure
5. Building Capacity and Awareness
6. Enhancing Visitor Awareness of Hero Experiences in the Three Peninsulas
7. Animating the Destination
8. Environmental Enhancement

⁴ The Three Peninsulas encompasses Mizen Head, Sheep's Head, Beara Peninsula and associated islands.

2.2 Relationship with other relevant Plans and Programmes

The Plan sits within a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These documents include plans and programmes such as those detailed in Appendix II⁵ (see also, Section 4 “Environmental Baseline”, Section 5 “Strategic Environmental Objectives”, Section 6 “Description of Alternatives and Section 9 “Mitigation Measures”). These documents have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The National Planning Framework (NPF) sets out Ireland’s planning policy direction for the next 22 years. The NPF is to be implemented through Regional Spatial and Economic Strategies (RSEs) and lower tier Development Plans and Local Area Plans. The RSE for the Southern Region (the Three Peninsulas are located within the Southern Region) sets out objectives relating tourism development, that have been subject to environmental assessment, including those relating to: enhancing provision of tourism and leisure amenity; promoting tourism activity; developing a road network and public transport services, facilitating improved visitor access and longer dwell times; developing walking and cycling trails, opening greater accessibility to the marine and countryside environment by sustainable modes; and facilitating appropriate tourism development, including that relating to greenways, blueways and peatlands. The RSE is informing the review of existing, assessed Development Plans and Local Area Plans, which already include various provisions relating to land use, tourism and infrastructure. Such reviews will also be subject to environmental assessments.

Implementation of the Plan shall be consistent with and conform with the NPF, RSE and

lower-tier land use plans, including provisions relating to sustainable development, environmental protection and environmental management that have been integrated into these documents including through SEA and AA processes. In order to be realised, projects included in the Plan (in a similar way to other projects from any other sector) will have to comply, as relevant, with various legislation, policies, plans and programmes (including requirements for lower-tier Appropriate Assessment, Environmental Impact Assessment and other licencing requirements as appropriate) that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards.

⁵ Appendix II is not intended to be a full and comprehensive review of EU Directives, the transposing regulations or the regulatory framework for environmental protection and management. The information is not exhaustive and it is recommended to consult the Directive, Regulation, Plan or Programme to become familiar with the full details of each.

Section 3 SEA Methodology

3.1 Introduction to the Iterative Approach

Figure 3.1 provides an overview of the integrated Plan preparation, SEA and Appropriate Assessment (AA) processes. The preparation of the Plan, SEA and AA have taken place concurrently and the findings of the SEA and AA have informed the Plan.

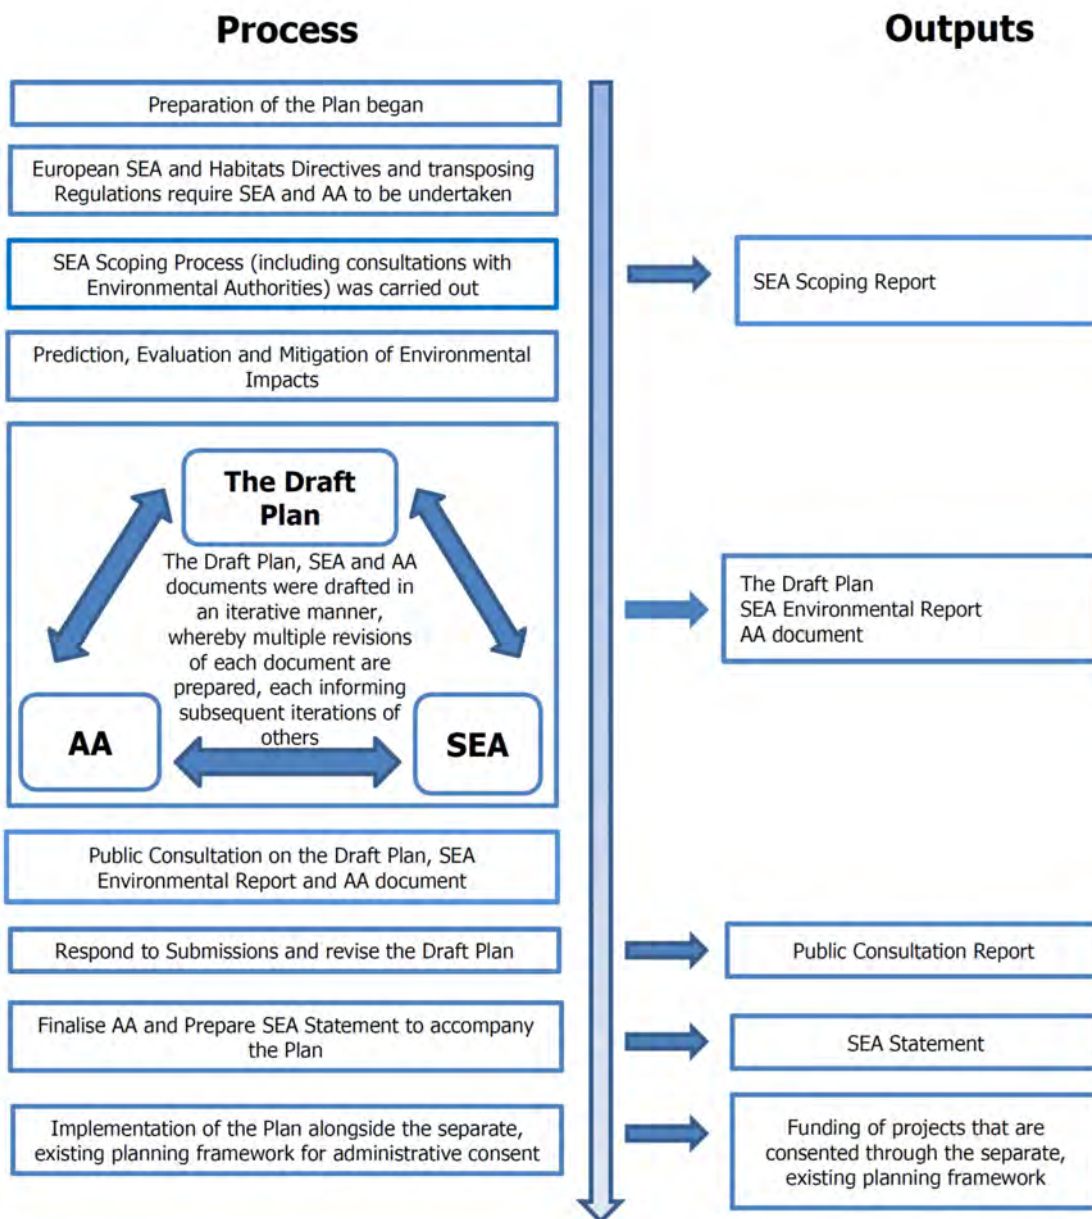

Figure 3.1 Overview of the SEA/AA/Plan-preparation Processes

3.2 Appropriate Assessment and Integrated Biodiversity Impact Assessment

3.2.1 Appropriate Assessment

Stage 2 Appropriate Assessment (AA) has been undertaken alongside preparation of the Plan. The requirement for AA is provided under the EU Habitats Directive (Directive 1992/43/EEC).

The conclusion of the AA is that the Plan will not affect the integrity of the European Sites, alone or in combination with other plans or projects.

The preparation of the Plan, SEA and AA has taken place concurrently and the findings of the AA have informed the SEA.

3.2.2 Integrated Biodiversity Impact Assessment

Many elements of Integrated Biodiversity Impact Assessment as detailed in the EPA's (2013) Practitioner's Manual have been aligned with in the undertaking of the SEA for the Plan. These include:

Scoping

- Biodiversity-relevant issues were identified for consideration at scoping stage and these are now detailed in Section 4.
- Reference to a zone of influence is provided at Section 4.

Baseline

- Biodiversity data sources relevant for this local level assessment have been identified and datasets collated/gathered.
- The biodiversity baseline addresses designated sites and other habitats and species of ecological value.
- AA information has been incorporated into the SEA baseline.

Alternatives

- Impacts upon biodiversity are considered under each of the alternatives and potential conflicts can be mitigated.

Impact assessment

- Effects on biodiversity are identified and assessed and the AA considers the interrelationship between biodiversity and potential effects on European Sites.

Mitigation and monitoring

- Taking into account all measures contained within the Plan, all the proposed mitigation measures deriving from the various processes were generally consistent and compatible.
- Indicators and associated targets have been included in SEA for monitoring European Sites.

Reporting

- This SEA ER addresses all biodiversity-related considerations relevant for this level of assessment.
- This SEA ER contains all biodiversity-relevant information, data, figures and maps relevant for this level of assessment.
- This SEA ER has been informed by the AA findings.

Communication and consultation

- Submissions received have been taken on board.
- The preparation of the Plan, SEA and AA have taken place concurrently and the findings of the AA have informed the SEA.

3.3 Scoping

3.3.1 Introduction

The scope of environmental issues to be dealt with by the SEA together with the level of detail to which they are addressed was broadly decided upon taking into account the collection of environmental baseline data and input from environmental authorities. Scoping allowed the SEA to become focused upon key issues relevant to the environmental components that are specified under the SEA Directive⁶.

As the Plan is not likely to have significant effects on the environment in another Member State transboundary consultations as provided for by Article 7 of the SEA Directive were not undertaken.

3.3.2 Scoping Notices

Relevant environmental authorities⁷ identified under the European Communities (Environmental Assessment of Certain Plans and Programmes) Regulations, as amended,

⁶ These components comprise biodiversity, fauna, flora, population, human health, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage, landscape and the interrelationship between the above factors.

⁷ The following authorities were notified: The Environmental Protection Agency, the Department of Communications, Climate Action and Environment, the Department of Agriculture, Food and the Marine and the Department of Culture, Heritage and the Gaeltacht.

were sent SEA scoping notices by Fáilte Ireland indicating that submissions or observations in relation to the scope and level of detail of the information to be included in the environmental report could be made to Fáilte Ireland.

3.3.3 Scoping Submissions

Submissions from the following environmental authorities were made during the SEA Scoping process:

- Environmental Protection Agency;
- Department of Agriculture, Food and Marine;
- Department of Communication, Climate Action and Environment; and
- Department of Culture, Heritage and the Gaeltacht.

These submissions were taken into account during preparation of the SEA and informed the various SEA recommendations that have been integrated into the Plan (see Section 9).

3.4 Alternatives

The SEA Directive requires that reasonable alternatives (taking into account the objectives and the geographical scope of the plan or programme) are identified, described and evaluated for their likely significant effects on the environment. In accordance with this requirement, alternatives for the Plan are examined in Section 7.

3.5 Environmental Report

In this SEA Environmental Report, an earlier version of which was placed on public display alongside the Draft Plan, the likely environmental effects of the Plan and the alternatives are predicted and their significance evaluated.

The Environmental Report provides Fáilte Ireland, stakeholders and the public with a clear understanding of the likely environmental consequences of implementing the Plan.

Mitigation measures to prevent or reduce significant adverse effects posed by the Draft Plan are identified in Section 9 - these have been integrated into the Plan.

This Environmental Report has been updated in order to take account of recommendations contained in submissions and in order to take account of non-material changes that were made to the original, Draft Plan that was placed on public display.

This Environmental Report contains the information specified in Schedule 2 of the European Communities (Environmental Assessment of Certain Plans and Programmes) Regulations 2004 (SI No. 435 of 2004) as amended (see Table 3.1).

3.6 The SEA Statement

On finalisation of the Plan by Fáilte Ireland, an SEA Statement will be prepared which will include information on:

- How environmental considerations have been integrated into the Plan, highlighting the main changes to the Plan that resulted from the SEA process;
- How the SEA Environmental Report and consultations have been taken into account, summarising the key issues raised in consultations and in the Environmental Report indicating what action was taken in response;
- The reasons for choosing the Plan in the light of the other alternatives, identifying the other alternatives considered, commenting on their potential effects and explaining why the Plan as adopted was selected; and
- The measures decided upon to monitor the significant environmental effects of implementing of the Plan.

3.7 Difficulties Encountered

No significant difficulties were encountered in undertaking the assessment.

Table 3.1 Checklist of Information included in this Environmental Report

Information Required to be included in the Environmental Report	Corresponding Section of this Report
(A) Outline of the contents and main objectives of the plan or programme, and of its relationship with other relevant plans and programmes	Sections 2, 5 and 8
(B) Description of relevant aspects of the current state of the environment and the evolution of that environment without implementation of the plan or programme	Section 4
(C) Description of the environmental characteristics of areas likely to be significantly affected	Sections 4, 7 and 8
(D) Identification of any existing environmental problems which are relevant to the plan or programme, particularly those relating to European Sites	Section 4
(E) List environmental protection objectives, established at international, EU or National level, which are relevant to the plan or programme and describe how those objectives and any environmental considerations have been taken into account when preparing the Plan	Sections 5, 7, 8 and 9
(F) Describe the likely significant effects on the environment	Sections 7 and 8
(G) Describe any measures envisaged to prevent, reduce and as fully as possible offset any significant adverse environmental effects of implementing the plan or programme	Section 9
(H) Give an outline of the reasons for selecting the alternatives considered, and a description of how the assessment was undertaken (including any difficulties)	Sections 6, 7 and 8
(I) A description of proposed monitoring measures	Section 10
(J) A non-technical summary of the above information	Non-Technical Summary
(K) Interrelationships between each environmental topic	Addressed as it arises within each Section

Section 4 Environmental Baseline

4.1 Introduction

Reflecting the specifications in the SEA Directive, the relevant aspects of the current state of the environment for the following environmental components are identified in this section:

- Biodiversity, Flora and Fauna;
- Population and Human Health;
- Material Assets;
- Water;
- Air and Climatic Factors;
- Landscape;
- Cultural Heritage;
- Soil; and
- The interrelationship between the above factors.

Information which is relevant to planning and project development and associated environmental assessments and administrative consent of projects is identified (note that Article 5 of the SEA Directive, in accordance with the established European principle of subsidiarity, requires that the Environmental Report includes the information that may reasonably be required taking into account, inter alia, the extent to which certain matters are more appropriately assessed at different levels in that process in order to avoid duplication of the assessment).

4.2 Geographical Scope of the Assessment

The area to which the Plan relates covers, from north to south, Beara Peninsula (partially within both County Kerry and County Cork), Sheep's Head Peninsula (County Cork) and Mizen Head Peninsula (County Cork).

4.3 National Reporting on the Environment

The EPA's *"Ireland's Environment - An Assessment 2016"* report provides an integrated assessment of the overall quality of Ireland's environment, the pressures being placed on it and the societal responses to current and emerging environmental issues.

This report has informed various parts of the environmental baseline provided below. The key environmental challenges or messages identified by the report are:

Environment and Health and Wellbeing

Recognising the benefits of a good quality environment to health and wellbeing.

Climate Change

Accelerating mitigation actions to reduce greenhouse gas emissions and implement adaptation measures to increase resilience in dealing with adverse climate impacts.

Implementation of Legislation

Improving the tracking of plans and policies and the implementation and enforcement of environmental legislation to protect the environment.

Restore and Protect Water Quality

Implementing measures that achieve ongoing improvement in the environmental status of water bodies from source to the sea.

Sustainable Economic Activities

Integrating environmental sustainability ideas and performance accounting across economic sectors and sectoral plans should be a key policy for growth.

Nature and Wild Places

Protecting pristine and wild places that act as biodiversity hubs, contributing to health and wellbeing, and providing tourism opportunities

Community Engagement

Informing, engaging and supporting communities in the protection and improvement of the environment.

The report highlights that high-quality green and blue spaces are not just for nature but are for peoples' health and wellbeing, particularly in the context of an increasingly urban society and increasing settlement densities.

4.4 Sustainable Development Goals

Implementation of the Plan will contribute towards efforts to achieve a number of the 17 Sustainable Development Goals of the 2030 Agenda for Sustainable Development, which were adopted by world leaders in 2015 at a United Nations Summit and came into force in 2016. These Goals include:

- Goal 3. Ensure healthy lives and promote well-being for all at all ages.
- Goal 6. Ensure availability and sustainable management of water and sanitation for all.

- Goal 7. Ensure access to affordable, reliable, sustainable and modern energy for all.
- Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
- Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.
- Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable.
- Goal 12. Ensure sustainable consumption and production patterns.
- Goal 13. Take urgent action to combat climate change and its impacts.
- Goal 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

- Natural Heritage Areas and Proposed Natural Heritage Areas (pNHAs)¹⁰;
- Nature Reserves;
- Marine Protected Areas (MPAs)¹¹;
- Shellfish Waters¹²;
- Freshwater Pearl Mussel catchments¹³;
- Flora Protection Order¹⁴ sites;
- Certain entries to the Water Framework Directive Register of Protected Areas¹⁵;
- Wildfowl Sanctuaries (see S.I. 192 of 1979)¹⁶;

4.5 Likely Evolution of the Environment in the Absence of the Plan

The likely evolution of the environment in the absence of a plan would resemble the environmental effects that are described for Alternative 1 (Business as Usual) under Section 7.

4.6 Biodiversity and Flora and Fauna

4.6.1 Overview

Information on biodiversity and flora and fauna which is relevant to project planning and development and associated environmental assessment and administrative consent of projects includes available information on designated ecological sites and protected species, ecological connectivity (including stepping stones and corridors) and non-designated habitats.

Ecological designations include:

- Special Areas of Conservation⁸ (SACs) and Special Protection Areas⁹ (SPAs);

⁸ SACs have been selected for protection under the European Council Directive on the conservation of natural habitats and of wild fauna and flora (92/43/EEC) by the DECLG due to their conservation value for habitats and species of importance in the European Union. The Habitats Directive seeks to establish Natura 2000, a network of protected areas throughout the EU. It is the responsibility of each member state to designate SACs to protect habitats and species, which, together with the SPAs designated under the 1979 Birds Directive, form Natura 2000.

⁹ SPAs have been selected for protection under the 1979 European Council Directive on the Conservation of Wild Birds (79/409/EEC) - referred to as the Birds Directive - by the DECLG due to their conservation value for birds of importance in the European Union.

¹⁰ pNHAs were published on a non-statutory basis in 1995, but have not since been statutorily proposed or designated. These sites are of significance for wildlife and habitats.

¹¹ Under the OSPAR Convention to Protect the Marine Environment of the North East Atlantic, Ireland committed to establishing marine protected areas to protect biodiversity (OSPAR MPAs). Ireland established a number of its cSACs as OSPAR MPAs for marine habitats. There is one OSPAR MPA adjacent to the area to which the Plan relates: Roaringwater Bay and Islands OSPAR MPA. Boundaries of this OSPAR MPA are aligned with the Roaringwater Bay and Islands SAC (000101).

¹² In order to protect existing shellfish waters and to ensure the future protection of these areas, the European Union introduced the Shellfish Waters Directive (2006/113/EC). The purpose of this Directive is to put in place concrete measures to protect waters, including shellfish waters, against pollution and to safeguard certain shellfish populations from various harmful consequences, resulting from the discharge of pollutant substances into the sea. The Directive applies to the aquatic habitat of bivalve and gastropod molluscs only (includes oysters, mussels, cockles, scallops and clams). It does not include crustaceans such as lobsters, crabs and crayfish.

¹³ Freshwater pearl mussel is a globally threatened, long-lived and extremely sensitive species that can be impacted by many forms of pollution, particularly sediment and nutrient pollution and by hydrological and morphological changes, which may arise from developments, activities or changes in any part of the catchment. There are catchments of SAC populations (S.I. 296 of 2009) and concentration of catchments of other extant populations in the Beara Peninsula. Catchments of other extant populations also occur in parts of Mizen Head Peninsula and to the west of Sheep's Head Peninsula.

¹⁴ The current list of plant species protected by Section 21 of the Wildlife Act, 1976 is set out in the Flora (Protection) Order, 1999.

¹⁵ In response to the requirements of the Water Framework Directive a number of water bodies or parts of water bodies which must have extra controls on their quality by virtue of how their waters are used by wildlife have been listed on Registers of Protected Areas (RPAs). RPAs include those for Protected Habitats or Species, Shellfish, Salmonid, Nutrient Sensitive Areas, Recreational Waters and Drinking Water.

¹⁶ Wildfowl Sanctuaries are areas that have been excluded from the 'Open Season Order' so that game birds can rest and feed undisturbed. There are 68 sanctuaries in the State. Shooting of game birds is not allowed in these sanctuaries.

- Tree Preservation Orders (TPOs)¹⁷;
- Ecological connectivity and networks;
- EPA Ecological Network Classes¹⁸;
- CORINE Landcover¹⁹.
- Watercourses, wetlands and peatlands; and
- Other sites of high biodiversity value or ecological importance, e.g. BirdWatch Ireland's 'Important Bird Areas' (Crowe et al., 2009).

4.6.2 Key Ecological Sensitivities

Key ecological sensitivities comprise:

- The blanket peat bog areas – occurring extensively on the Beara Peninsula and parts of Mizen Head Peninsula;
- Aquatic and riverine ecology associated with the VEDP area's various streams, rivers and lakes – including Rathruane, Croanshagh, Glengarriff, Sheen, Adrigole, Coomhola, Bawnaknockane, Fourmile Water, Croanshagh, Owenshagh, and Drumoghty; and
- Coastal areas and marine waters and associated aquatic ecology.

The sensitive receptors – both habitats and species – identified for European designations that cover much of the Three Peninsulas (see Section 4.6.4 below) are likely to be indicative of the key sensitive receptors across and surrounding the area to which the Plan relates.

4.6.3 Existing Fáilte Ireland Environmental Monitoring

Fáilte Ireland regularly engages with environmental research that is used to make informed management decisions and produce robust guidelines to facilitate the protection of the environment. From its inception in 2014,

¹⁷ TPOs are a planning mechanism whereby individual trees or groups of trees can be identified as important and protected by a TPO.

¹⁸ This is an EPA dataset identifying a national spread of Ecological Network Classes which have been informed by CORINE land cover data. The study developed criteria to classify the relative importance of different areas within an Ecological Network. Five Classes of areas were defined on the basis of naturalness.

¹⁹ Land cover is the observed physical cover, as seen from the ground or through remote sensing, including for example natural or planted vegetation, water and human constructions which cover the earth's surface.

the Wild Atlantic Way (WAW) Operational Programme Monitoring Programme (undertaken to date by CAAS on behalf of Fáilte Ireland guided by relevant stakeholders) has been conducting research into the impacts of tourism on the receiving environment. To date the surveys have covered 43 sites and monitored the activities and effects of over 20,000 visitors to WAW discovery points.

This research characterises visitor movements at each site while examining the ecological features and sensitivities present. A detailed assessment of the site facilities and management actions on site is also undertaken. From this data, impacts to ecological receptors are quantified in a systematic way and management recommendations are made. Over the first 4 years of the monitoring, the data has shown that visitors themselves cause low-level effects, and high-level effects are predominantly caused by the mismanagement of sites. As well as the site-specific data being collected, the monitoring program collates and interprets existing national environmental indicator data compiling the results into annual macro monitoring reports. The WAW monitoring research is guided by an independent working group that steers the research and develops the program as the data is collected. This working group comprises of members from the EPA, NPWS, the Environmental Pillar and a representative from each of the County Councils along the WAW.

Each year the results are refined and published online in the form of Visitor Observation Reports, Ecological Impact Reports and the Macro Monitoring Reports. The reports are then dissected and detailed reports containing all relevant site-specific information are sent to each of the County Councils along the WAW; as well as any site management teams at sites not under the management of the County Council. This ensures that the research can be harnessed on site by those responsible while contributing towards informed management plans and guidelines created by Fáilte.

This extensive database demonstrates that over 85% of visitors observed at WAW discovery points are having low or no effects on the ecological features or processes at these sites. Ecological impacts observed comprise:

- Destruction of structures, vegetation or fauna;
- Trampling of herbaceous vegetation;
- Disturbance of wildlife;
- Heavy littering or dumping quantities of waste;
- Addition/alteration of site features, transient emissions, noise;
- Harvesting of large quantities of shells from beach sites;
- Fishing activities;
- Removal and throwing of large rocks; and
- Unrestricted dogs causing disturbances to wildlife.

It is assumed that visitor interactions within the Plan area will be consistent with the trends, activities and effects recorded in this dataset.

The Monitoring Programme has identified that dunes, machair, maritime grasslands and upland habitats such as heathlands are the most sensitive/vulnerable to visitor effects. Therefore, the management of visitor movements within these habitats is key for the avoidance of potential effects.

4.6.4 European Sites

A significant portion of the Three Peninsulas, their coastline and their surrounding waters are designated as European Sites (see Section 4.6.4 below). European Sites in the area to which the Plan relates occur in the greatest concentrations along the coastline and in upland areas. European Sites comprise:

- Special Areas of Conservation²⁰ (SACs), including candidate SACs; and
- Special Protection Areas²¹ (SPAs).

²⁰ SACs have been selected for protection under the European Council Directive on the conservation of natural habitats and of wild fauna and flora (92/43/EEC) due to their conservation value for habitats and species of importance in the European Union. The Habitats Directive seeks to establish Natura 2000, a network of protected areas throughout the EU. It is the responsibility of each member state to designate SACs to protect habitats and species, which, together with the SPAs designated under the 1979 Birds Directive, form Natura 2000. The European Communities (Birds and Natural Habitats) Regulations 2011 consolidate the European Communities (Natural Habitats) Regulations 1997 to 2005 and the European Communities (Birds and Natural Habitats) (Control of Recreational Activities) Regulations 2010. The Regulations have been prepared to address several judgments of the Court of Justice of the European Union (CJEU) against Ireland, notably cases C-418/04 and C-183/05, in respect of failure to transpose elements of the Birds Directive and the Habitats Directive into Irish law.

The SEA uses the same zone of influence cited in the AA; a 15 km buffer around the area to which the Plan relates (see sites within this zone listed below and mapped on Figure 4.1). The AA review of all sites within this zone has allowed a determination to be made that in the absence of significant hydrological links the characteristics of the VEDP will not impose effects beyond the 15 km buffer.

There are number of SACs designated within and adjacent to the Three Peninsulas, including those mapped on Figure 4.1 and listed below:

- Kenmare River SAC²²;
- Cleanderry Woods SAC²³;
- Glanmore Bog SAC²⁴;
- Cahal Mountains SAC²⁵;
- Glengarriff Harbour and Woodland SAC²⁶;
- Cloonee and Inchiquin Loughs, Uragh Woods SAC²⁷;
- Moulagowna Bog SAC²⁸;
- Derryclogher (Knockboy) Bog SAC²⁹;
- Glanalough Woods SAC³⁰;
- Mucksna Woods³¹;
- Kilgarvan Ice House SAC³²;
- Sheep's Head SAC³³;
- Farranamanagh Lough SAC³⁴;
- Reen Point Shingle SAC³⁵;
- Dunbeacon Shingle SAC³⁶

²¹ SPAs have been selected for protection under the 1979 European Council Directive on the Conservation of Wild Birds (79/409/EEC) - referred to as the Birds Directive - due to their conservation value for birds of importance in the EU.

²² Sensitive receptors include: vegetated sea cliffs, Atlantic salt meadows, lesser horseshoe bat, otter and common seal.

²³ Sensitive receptors include: old oak woodlands and Killarney fern.

²⁴ Sensitive receptors include: oligotrophic Waters containing very few minerals, blanket bogs, freshwater pearl mussel and Killarney fern.

²⁵ Sensitive receptors include: dystrophic lakes, wet and dry heat, blanket bogs, Kerry slug and Killarney fern.

²⁶ Sensitive receptors include: old oak woodlands, alluvial forests, Kerry slug, lesser horseshoe bat, otter and common seal.

²⁷ Sensitive receptors include: old oak woodlands, wet and dry heat, lesser horseshoe bat, Killarney fern and slender naiad.

²⁸ Sensitive receptors include: blanket bogs.

²⁹ Sensitive receptors include: blanket bogs.

³⁰ Sensitive receptors include: lesser horseshoe bat.

³¹ Sensitive receptors include: old oak woodlands.

³² Sensitive receptors include: lesser horseshoe bat.

³³ Sensitive receptors include: wet and dry heat and Kerry slug.

³⁴ Sensitive receptors include: coastal lagoons and perennial vegetation of stony banks.

³⁵ Sensitive receptors include: perennial vegetation of stony banks.

- Three Castle Head to Mizen Head SAC³⁷;
- Barley Cove to Ballyrisode Point SAC³⁸; and
- Roaringwater Bay and Islands SAC³⁹.

There are number of SPAs designated within and adjacent to the Three Peninsulas including:

- The Bull and the Cow Rocks SPA⁴⁰;
- Beara Peninsula SPA⁴¹; and
- Sheep's Head to Toe Head SPA⁴²

For more detail on European Sites please refer to the AA document that accompanies the Plan and this SEA Environmental Report.

4.6.5 Natural Heritage Areas and Proposed Natural Heritage Areas

Natural Heritage Areas (NHAs) are designated due to their national conservation value for ecological and/or geological/geomorphological heritage. They cover nationally important semi-natural and natural habitats, landforms or geomorphological features, wildlife plant and animal species or a diversity of these natural attributes. NHAs are designated under the Wildlife (Amendment) Act 2000. Proposed NHAs (pNHAs) were published on a non-statutory basis in 1995, but have not since been statutorily proposed or designated.

There are number of NHAs and pNHAs designated within or adjacent to the Three Peninsulas including those listed on Table 4.1 and mapped on Figure 4.2.

Table 4.1 NHAs and pNHAs within and adjacent to the area to which the Plan relates

Natural Heritage Areas		
Designation	Code	Site Name
NHA	000383	Slaheny River Bog
	001059	Hungry Hill Bog
	001948	Doughill Bog

³⁶ Sensitive receptors include: perennial vegetation of stony banks.

³⁷ Sensitive receptors include: vegetated sea cliffs and dry heath.

³⁸ Sensitive receptors include: tidal mudflats and sandflats, Atlantic and Mediterranean salt meadows, marram and fixed dunes, dry heath and petalwort.

³⁹ Sensitive receptors include: reefs, sea caves, harbor porpoise, otter and grey seal.

⁴⁰ Sensitive receptors include: storm petrel and gannet.

⁴¹ Sensitive receptors include: chough and fulmar.

⁴² Sensitive receptors include: peregrine and chough.

Natural Heritage Areas

	001342	Cloonee and Inchiquin Loughs, Uragh Wood
	001354	Glanmore Lake
	001364	Lehid Harbour
	001369	Lough Nagarriva
001371	Mucksna Wood	
001537	Rosshunsoge	
001826	Curraakeal	
001977	Sheelane Island	

4.6.6 Land Cover Mapping

CORINE⁴³ land cover mapping for the Three Peninsulas area is shown on Figure 4.3.

⁴³ The CORINE (Coordinated Information on the Environment) land cover data series was devised as a means of compiling geo-spatial environmental information in a standardised and comparable manner. CORINE has become a key data source for informing environmental and planning policy on a national and European level. The main land cover type in Ireland is agricultural land including forestry, which accounts for two-thirds of the national landmass. Most of this is permanent grassland pastures. Peatlands and wetlands are the second most widespread land cover type, covering almost one-fifth of the country. While forested areas cover about one-tenth of the country. Despite rapid development in the past two decades, Ireland's landscape is predominantly rural and agricultural.

Categories from CORINE mapping that may indicate areas likely to contain Annex I habitats, in the area to which the Plan relates, include:

- Peat bogs;
- Natural grassland;
- Water bodies;
- Coastal lagoons;
- Mixed forests;
- Broad-leaved forests;
- Coniferous forest;
- Moors and heaths;
- Intertidal flats;
- Beaches dunes sand;
- Inland marshes;
- Sparsely vegetated areas;
- Salt marshes;
- Transitional woodland and scrub; and
- Land principally occupied by agriculture with areas of natural vegetation.

4.6.7 Register of Protected Areas

In response to the requirements of the Water Framework Directive a number of water bodies or parts of water bodies that must have extra controls on their quality by virtue of how their waters are used by people and by wildlife have been listed on Registers of Protected Areas (RPAs).

The groundwater underlying the Three Peninsulas is part of the wider groundwater area relating to drinking water sources.

There are number of rivers on the Three Peninsulas that are included on the RPA for drinking water: Arduaslough, Fourmilewater, Barony, Sheen, Drumoghty, Lehid, Croanshagh, Adrigole and Hill Loughanemore.

Kenmare River/Sneem/Ardgroom, Glengarriff Harbour, Adrigole Harbour, Castletownbere, Bantry Bay, League Point, Bantry Bay South, Dunmanus Inner and Roaring Water Bay are listed on the RPA for shellfish areas.

Bathing location at Barley Cove is also included on the RPA for bathing waters.

4.6.8 Other Designations

Other designations mapped on Figure 4.2 include Nature Reserves and Freshwater Pearl Mussel catchments.

Nature Reserves are areas of importance to wildlife, which is protected under Ministerial order. There are currently 78 Statutory Nature Reserves in Ireland. Most are owned by the State but some are owned by organisations or private landowners. There are two Nature Reserves designated within or adjacent to the area to which the Plan relates: Uragh Wood (to the north of the Beara Peninsula) and Glengarriff Wood (to the south-west of the Beara Peninsula).

Freshwater Pearl Mussel is a globally threatened, long-lived and extremely sensitive species that can be impacted by many forms of pollution, particularly sediment and nutrient pollution and by hydrological and morphological changes, which may arise from developments, activities or changes in any part of the catchment. There are a number of Fresh Pearl Mussel catchments identified (see Figure 4.2): Catchments of SAC populations listed in S.I. 296 of 2009 and concentration of catchments of other extant populations in the Beara Peninsula; and Catchments of other extant populations in parts of Mizen Head Peninsula and to the west of Sheep's Head Peninsula.

4.6.9 Existing Problems

The Department of Arts, Heritage and the Gaeltacht's Article 17 report on the Status of EU Protected Habitats and Species in Ireland (2013) identifies many Irish habitats to be of unfavourable status and many to be still declining, although it also identifies that a range of positive actions are underway. The report identifies that the majority of EU-protected species are, however, in "Favourable" status in Ireland, and stable, although a small number are considered to be in "Bad" status and continue to require concerted efforts to protect them.

The Plan includes robust measures to contribute towards the protection of biodiversity and flora and fauna and associated ecosystem services.

Previous changes in land uses arising from human development have resulted in a loss of biodiversity and flora and fauna however, legislative objectives governing biodiversity and fauna were not identified as being conflicted with.

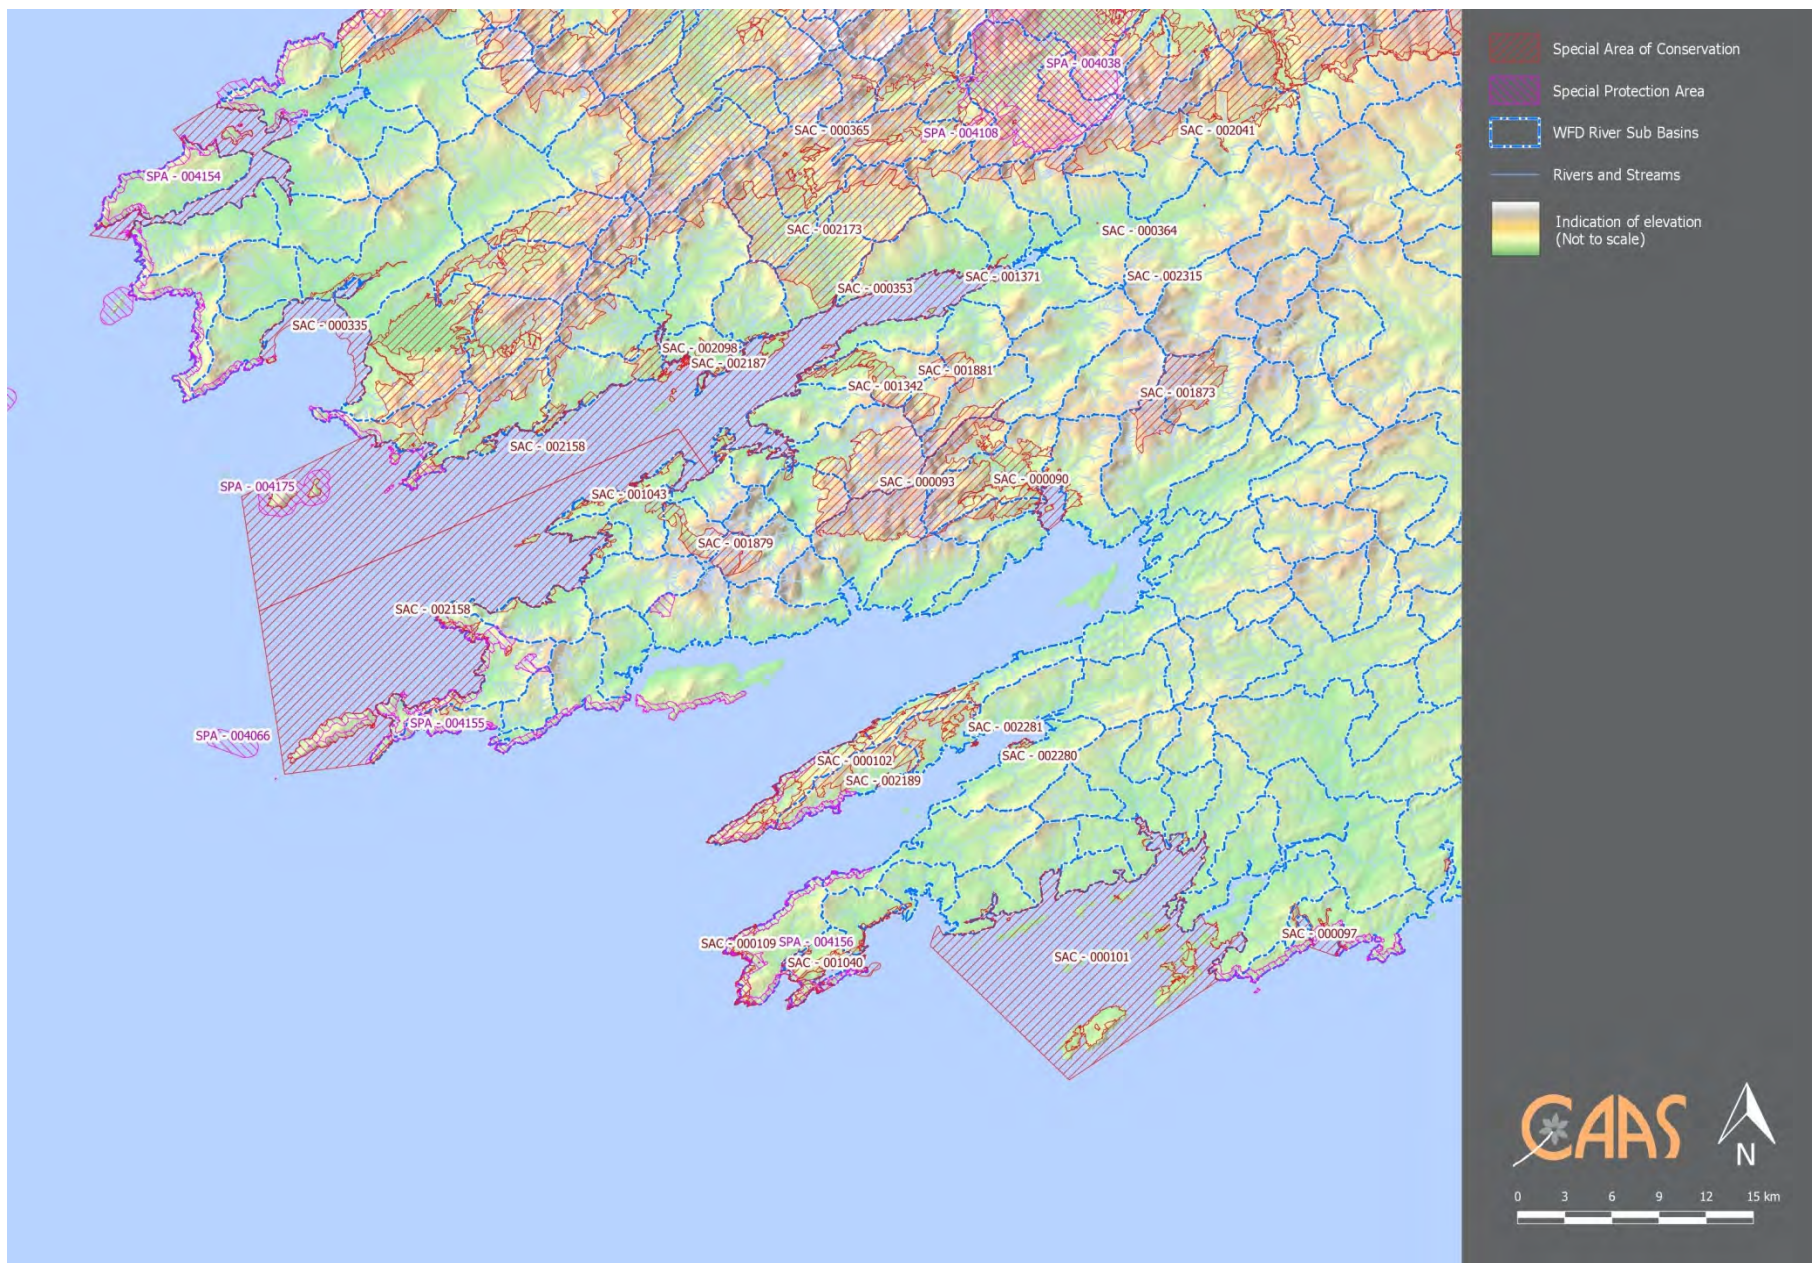

Figure 4.1 European Sites within and adjacent to the area to which the Plan relates

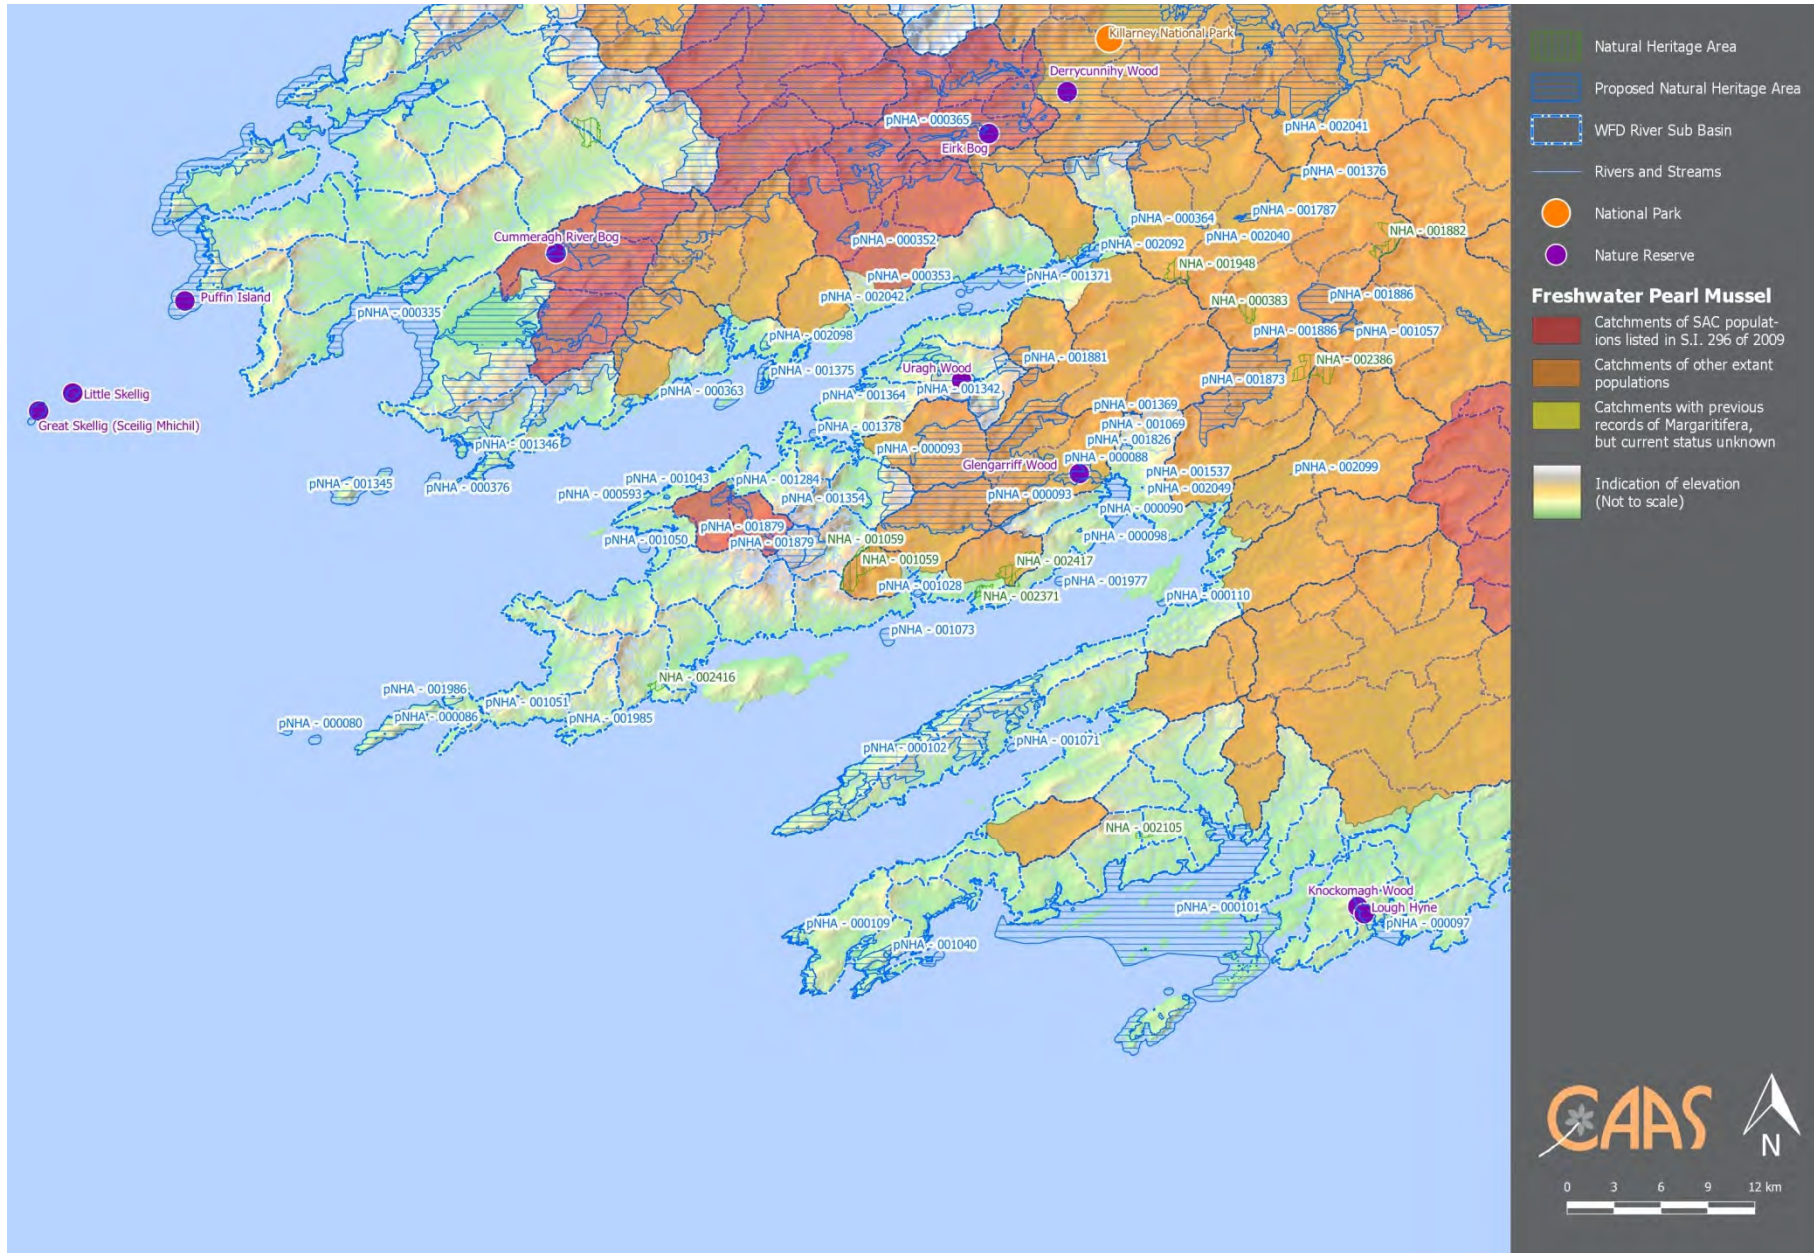

Figure 4.2 Potential habitat sensitivity within and adjacent to the area to which the Plan relates

Figure 4.3 CORINE Land Cover Mapping 2018

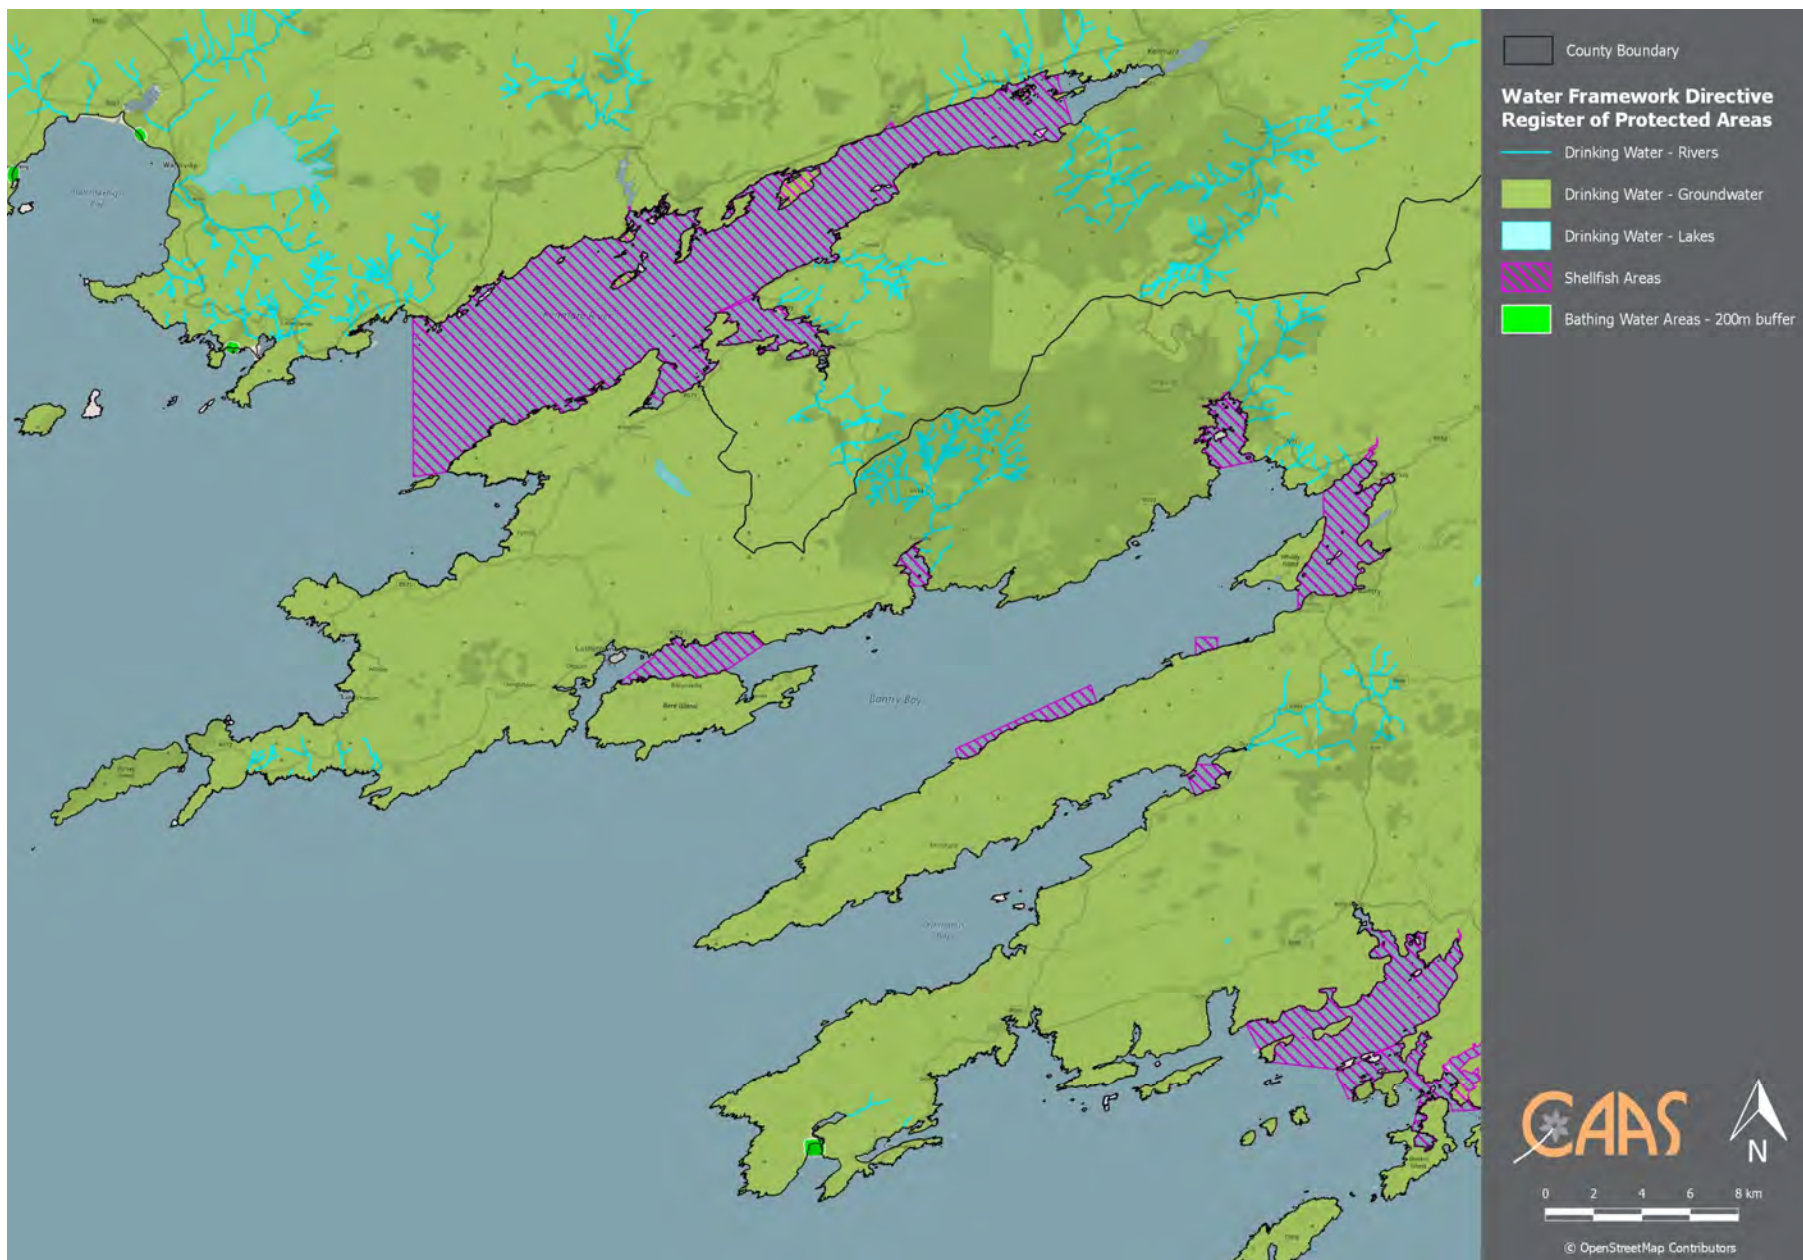

Figure 4.4 WFD Register of Protected Areas

4.7 Population and Human Health

4.7.1 Population

Using the 2016 Census data, the population of the Three Peninsulas to which the Plan relates was estimated to be 20,000 persons⁴⁴. The population of the biggest settlements in the area to which the Plan relates was: 2,722 in Bantry; 2,376 in Kenmare; 860 in Castletownbere; and 700 in Schull.

Population has the potential to interact with various environmental components. Potential interactions include:

- Interactions with landslides (see Section 4.8.4);
- Recreational and development pressure on habitats and landscapes (see Section 4.6);
- Contribution towards increase in demand for waste water treatment at the municipal level (see Section 4.11);
- Contribution towards increase in demand for water supply and associated potential impact of water abstraction (see Section 4.11);
- Potential interactions in flood-sensitive area (see Section 4.9.9); and
- Potential effects on water quality (see Section 4.9).

4.7.2 Human Health

Human health has the potential to be impacted upon by environmental vectors (i.e. environmental components such as air, water or soil through which contaminants or pollutants, which have the potential to cause harm, can be transported so that they come into contact with human beings). Hazards or nuisances to human health can arise as a result of exposure to these vectors arising

⁴⁴ Total population was estimated using the interactive Census 2016 mapping tool for the following Electoral Divisions (the boundaries of which did not align with the indicative area to which the Plan relates): Kenmare, Bantry Rural / Whiddy, Durrus West, Glanlough, Seefin, Sheepshhead, Crookhaven, Goleen, Toormore, Dunmanus, Lowertown, Skull, Dunbeacon, Ballydehob, Kilcoe, Ballybane, Scart, Bantry Urban, Banawn, Kilcaskan, Glengarriff, Kilcaskan, Adrigole, Curryglass, Killaconenagh, Bear, Kilnamanagh, Coulagh, Kilcatherine, Glanmore, Ardea and Dawros. The total figure for these Electoral Divisions amounted to 20,044 persons.

from incompatible adjacent land uses for example. These factors have been considered with regard to the description of: the baseline of each environmental component; and the identification and evaluation of the likely significant environmental effects of implementing the Plan.

4.7.3 Existing Problems

The greatest health risk from radiation in Ireland is caused by radon. The presence of radon gas, a naturally occurring radioactive gas that originates from the decay of uranium in rocks and soils, occurs across the country. It accounts for more than half of the total radiation dose received by the Irish population. As a known carcinogen, in the same category as tobacco smoke and asbestos it is a cause of lung cancer. Exposure to radon for long periods or at high concentrations can lead to lung cancer.

The number of homes within the area to which the Plan relates with radon levels above the reference level is within the normal range experienced in other locations across the country⁴⁵.

Also refer to the other sections of this report referred to above with respect interactions with other environmental components.

4.8 Soil

4.8.1 Introduction

Soil is the top layer of the earth's crust. It is formed by mineral particles, organic matter, water, air and living organisms. Soil can be considered as a non-renewable natural resource because it develops over very long timescales. It is an extremely complex, variable and living medium and performs many vital functions including: food and other biomass production, storage, filtration and transformation of many substances including water, carbon, and nitrogen. Soil has a role as a habitat and gene pool, serves as a platform for human activities, landscape and heritage and acts as a provider of raw materials. Such functions of soil are worthy of protection because of their socio-economic as well as environmental importance. Soils in any area are the result of the interaction of various

⁴⁵ Mapping available at <http://www.epa.ie/radiation/radonmap>

factors, such as parent material, climate, vegetation and human action.

To date, there is no legislation which is specific to the protection of soil resources. However, there is currently an EU Thematic Strategy on the protection of soil which includes a proposal for a Soil Framework Directive which proposes common principles for protecting soils across the EU.

4.8.2 Soil Types

Rain fed peat soils and lithosols are two of the most dominant soils across the Three Peninsulas (see Figure 4.5). Outcropping rock is identified in a number of upland locations. Much of the peat soils areas are subject to ecological designations (see Section 4.6). Other soils identified across the Plan area include:

- Lithosols⁴⁶ in the upland and coastal areas;
- Surface Water Gleys⁴⁷ in depressions in the upper reaches of river valleys in both uplands and lowlands;
- Brown earths⁴⁸ found in southern parts of the Mizen Head Peninsula, to the east of the Sheep's Head Peninsula and to the west of the Beara Peninsula; and
- Alluvial soils⁴⁹ in the flood plains of the rivers and streams.

4.8.3 County Geological Sites

There are number of County Geological Sites across the area to which the Plan relates. These Sites do not receive statutory protection like Natural Heritage Areas but receive an effective protection from their inclusion in the planning system.

The greatest concentrations of County Geological Sites across the Three Peninsulas occur in upland and coastal areas⁵⁰.

⁴⁶ Lithosols are shallow non-calcareous soils, commonly overlying hard rock or skeletal and gravelly material. They tend to be stony soils, or with shattered bedrock and are associated with frequent rock outcrops.

⁴⁷ Surface Water Gleys are wetland soils with slowly permeable horizons resulting in seasonal waterlogging.

⁴⁸ Brown earths are well drained mineral soils, associated with high levels of natural fertility.

⁴⁹ These are associated with alluvial (clay, silt or sand) river deposits.

⁵⁰ County Geological Sites include: Crookhaven and Brow Head; Mizen Head – Barley Cove; Dhurode Mine; Horse Island; Mount Gabriel; Dunmanus Cattle Northwards;

4.8.4 Landslides

The term "landslide" describes a wide variety of processes that result in the downward and outward movement of materials such as rock, debris, earth, mud and peat under the force of gravity. Issues such as existing ground conditions, slope stability and storage of excavated material have the potential to influence susceptibility to landslides/bog bursts. The potential impacts of landslides include loss of human life/injury, flooding, pollution of watercourses and impacts upon aquatic biodiversity.

The northern parts of the Three Peninsulas (the Beara Peninsula) have several locations with a history of multiple landslide events⁵¹. These events occur mainly in upland areas and include Kilkinnikin West (1983) and Gortavallig (2009). The GSI have identified various upland and coastal areas across the Three Peninsulas that are of high and moderately high levels of landslide susceptibility.

4.8.5 Existing Problems

There have been a number of landslide events across the Three Peninsulas and there are various areas identified by the GSI as being of elevated levels of landslide susceptibility (see Section 4.8.4).

Legislative objectives governing soil were not identified as being conflicted with.

Dunbeacon Castle-Dunmanus Bay; Dhurode, Relane Point; Reenydonagan Section; Whiddy Island; Bantry Drumlins; Reenydonagan Section; Reenydonagan Point; (East) Glengarriff Harbour to Ardnamanna Point; Shot Head; Barley Lake; Blackball Head - Whiteball Head; Black Ball Head; Blackball Head to Cahermore; Cod's Head; Allihies; Ballydonegan Strand; Allihies Mountain Mine; Allihies Mountain Mine and Allihies Dooneen Mine.

⁵¹ Over 2,500 landslide events are recorded in the National Landslides Database available from GSI (www.gsi.ie). This dataset also includes Landslide Susceptibility Mapping to assist in the identification of areas that are likely to experience land sliding.

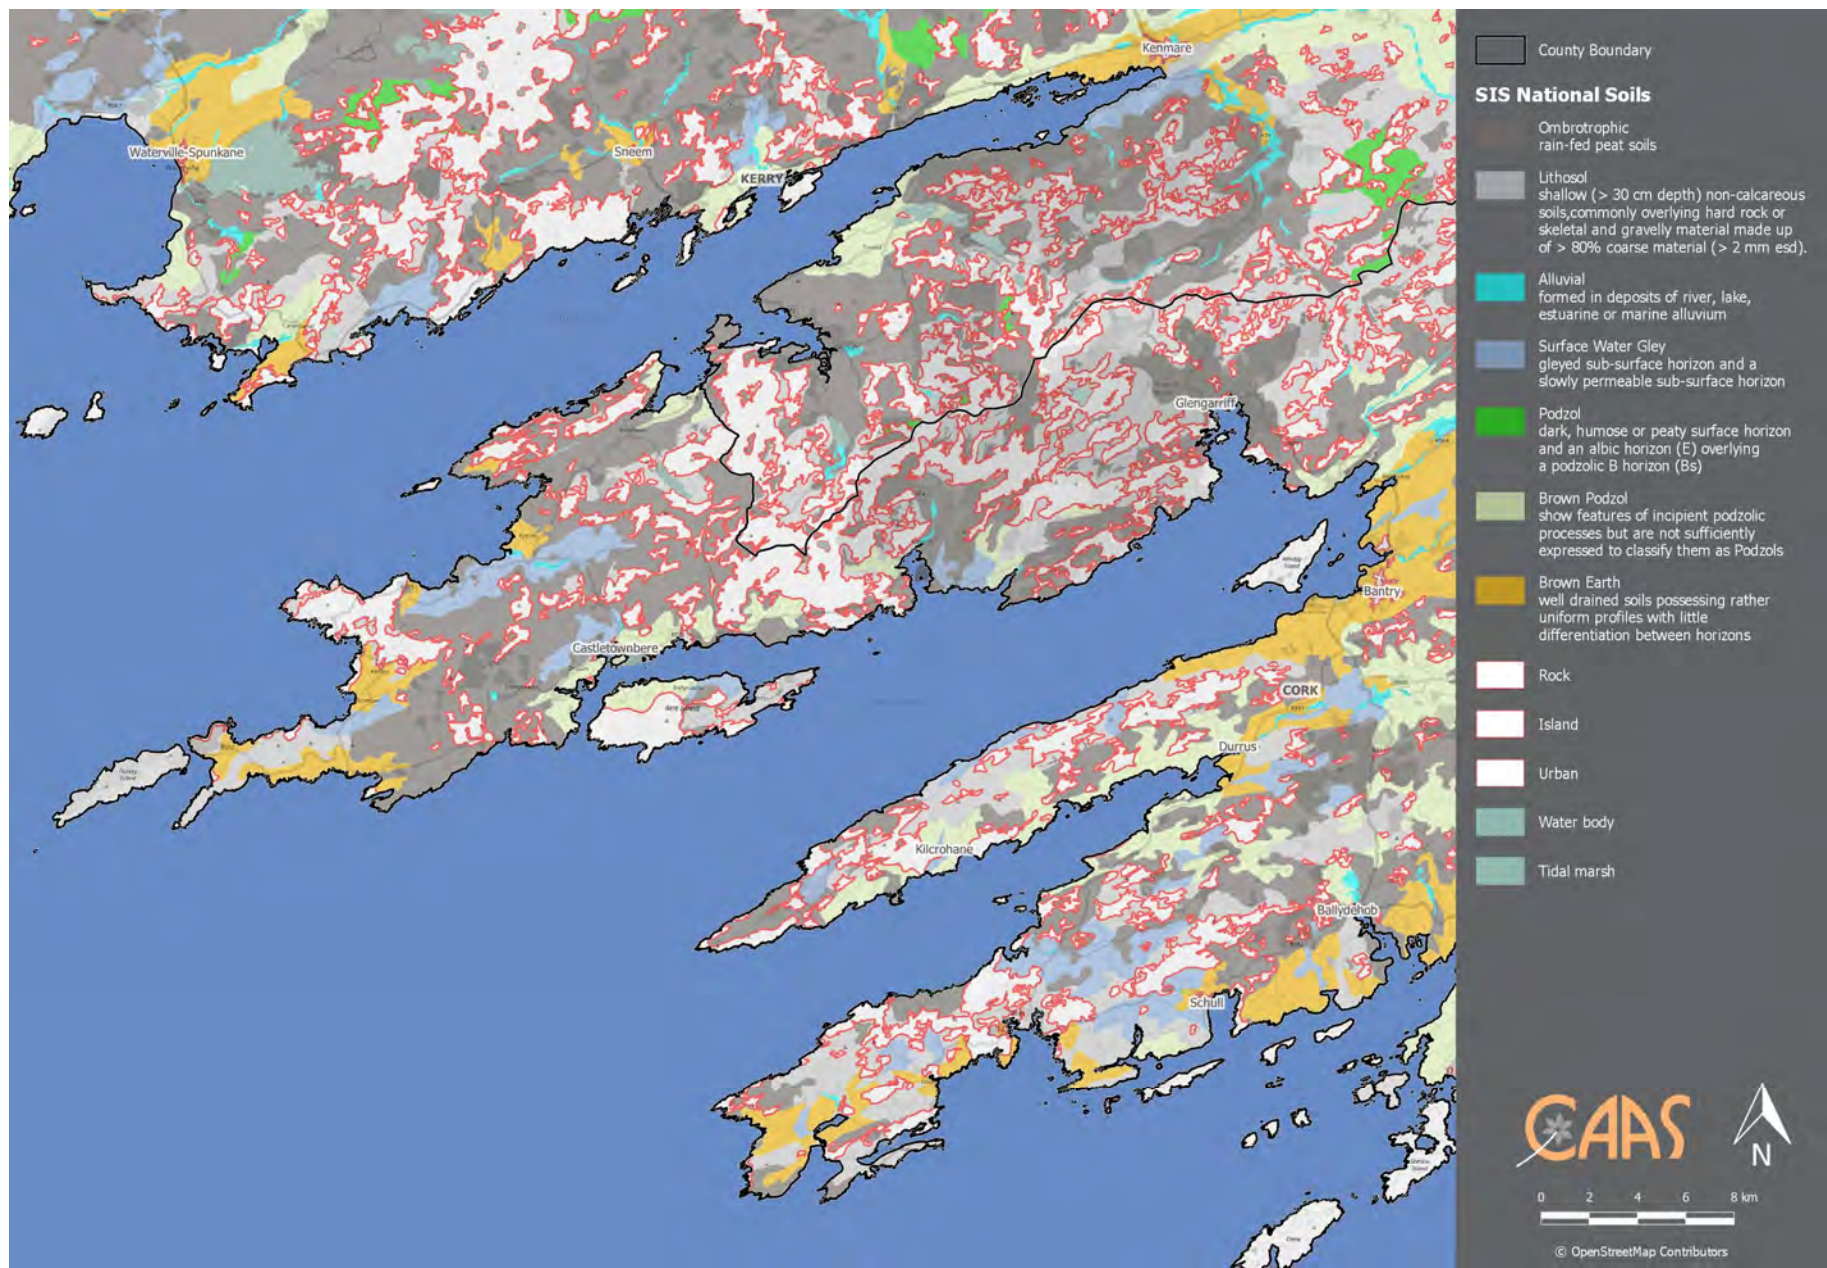

Figure 4.5 Soils

4.9 Water

4.9.1 The Water Framework Directive

Since 2000, Water Management in the EU has been directed by the Water Framework Directive 2000/60/EC (WFD). The WFD requires that all Member States implement the necessary measures to prevent deterioration of the status of all waters - surface, ground, estuarine and coastal - and protect, enhance and restore all waters with the aim of achieving *good status*. All public bodies are required to coordinate their policies and operations so as to maintain the *good status* of water bodies which are currently unpolluted and improve polluted water bodies to *good status*.

Article 4 of the WFD sets out various exemptions for deterioration in status caused as a result of certain physical modifications to water bodies. This is provided: all practicable mitigation measures are taken; there are reasons of overriding public interest or the benefits to human health, safety or sustainable development outweigh the benefits in achieving the WFD objective; there are no better alternatives; and the reasons for the physical modification are explained in the River Basin Management Plan (RBMP).

The EU's Common Implementation Strategy Guidance Documents No. 20 and 36 provide guidance on exemptions to the environmental objectives of the WFD.

For the purpose of assessment, reporting and management, water is divided into groundwater, rivers, lakes, estuarine waters and coastal waters which are in turn divided into specific, clearly defined water bodies.

4.9.2 Zone of Influence

The Zone of Influence of the Plan beyond the area to which the Plan relates, with respect to impacts upon waters can be estimated to be all bodies of groundwater and all surface waters downstream areas of catchments which drain the Plan area.

4.9.3 Surface Water Drainage

A catchment is an area of land contributing to a waterbody, with all the water ultimately running off to a single outlet. The WFD requires water quality management to be based on natural river catchments i.e. by reference to the natural, environmental unit rather than by reference to administrative or legal boundaries, which often fragment river catchments.

The main river channels in the area are the: Rathruane, Croanshagh, Glengariff, Sheen, Adrigole, Coomhola, Bawnaknockane, Fourmile Water, Croanshagh, Owenshagh and Drumoghty.

The surface water from the area to which the Plan relates drains into two catchments: Bandon Ilen⁵² (partially covers Mizen Head Peninsula) and Dunmanus-Bantry-Kenmare⁵³ (covers Beara Peninsula, Sheep's Head and parts of Mizen Head).

4.9.4 Surface Water Status

The WFD defines 'overall surface water status' as the general expression of the status of a body of surface water, determined by the poorer of its ecological status and its chemical status. Thus, in order to achieve 'good surface water status' both the ecological status and the chemical status of a surface water body need to be at least 'good'.

Ecological status is an expression of the structure and functioning of aquatic

⁵² This catchment includes the area drained by the Rivers Bandon and Ilen and all streams entering tidal water between Templebreedy Battery and Mizen Head, Co. Cork, draining a total area of 1,803km². Similarly, to the surrounding Munster catchments, this catchment is dominated by east-west trending sandstone ridges. In this catchment the low-lying parts are predominantly underlain by mudstones and the mountainous peninsular areas by old red sandstone.

⁵³ This catchment includes the area drained by all streams entering tidal water in Dunmanus, Bantry and Kenmare Bays between Mizen Head and Glanearagh Head, Co. Kerry, draining a total area of 1,898km². This catchment is dominated by the east-west trending series of sandstone ridges and limestone valleys that dominate the landscape of south and west Munster. In this catchment, the limestone valleys are nearly completely submerged by the sea – having been preferentially eroded compared to the sandstone ridges lying between them and these valleys now make up Dunmanus, Bantry and Kenmare Bays while the sandstone ridges form the Mizen, Sheep's Head, Beara and Iveragh Peninsulas.

ecosystems associated with surface waters. Such waters are classified as of 'good ecological status' when they meet Directive requirements.

Chemical Status is a pass/fail assignment with a failure defined by a face-value exceedance of an Environmental Quality Standards (EQS) for one or more Priority Action Substances (PAS) listed in Annex X of the Water Framework Directive (WFD). The EQS values for individual PAS substances are set at European level. Good surface water chemical status means that concentrations of pollutants in the water body do not exceed the environmental limit values specified in the Directive.

The WFD surface water status (2010-2015) of rivers, lakes, coastal and transitional waters, within and surrounding the area to which the Plan relates as shown on Figure 4.6.

Rivers are generally of *high* or *good* status. However, the Glan Stream and Clonee River are identified as being of *moderate* status. In addition, there are a number of *unassigned*⁵⁴ rivers and streams across the Three Peninsulas.

To the north of the Beara Peninsula (the Outer Kenmare River) and to the south of the Mizen Head Peninsula (Roaring Water Bay) the status of the coastal water is identified as *good*.

The status of the coastal water of Outer Bantry Bay (between the Beara Peninsula and Sheep's Head Peninsula) is identified as *high*. The coastal waters of South Western Atlantic Seaboard and Dunmanus Bay are identified as *unassigned*.

4.9.5 Groundwater Status

Groundwater is stored in the void spaces in underground layers of rock, or aquifers. These aquifers are permeable, allowing both the infiltration of water from the soils above them and the yielding of water to surface and coastal waters. Groundwater is the part of the subsurface water that is in the saturated zone - the zone below the water table, the uppermost level of saturation in an aquifer at

which the pressure is atmospheric, in which all pores and fissures are full of water.

For groundwater bodies, the approach to classification is different from that for surface water. For each body of groundwater, both the chemical status and the quantitative must be determined. Both have to be classed as either *good* or *poor*. The WFD sets out a series of criteria that must be met for a body to be classed as good chemical and quantitative status.

The WFD status (2010-2015) of the groundwater underlying the Three Peninsulas area is identified as being of *good*. There is a small area of *poor* status to the north-east of the Mizen Head Peninsula, underlying the Waste Facility (Licence Number: W0089-02).

4.9.6 Aquifer Vulnerability and Productivity

The Geological Survey of Ireland (GSI) rates groundwaters according to both their productivity and vulnerability to pollution. The area to which the plan relates is mainly underlain by a poor bedrock aquifer (unproductive except for local zones) with locally important aquifer - bedrock (moderately productive only in local zones) along the coastal areas.

Aquifer vulnerability refers to the ease with which pollutants of various kinds can enter into groundwater. The aquifers underlying most the Plan area are generally classified as being of *high vulnerability* and *extreme vulnerability* and *rock at or near surface or Karst* (see Figure 4.7).

4.9.7 WFD Registers of Protected Areas

The WFD requires that Registers of Protected Areas (RPAs) are compiled for a number of water bodies or part of water bodies which must have extra controls on their quality by virtue of how their waters are used by people and by wildlife.

Please see Section 4.6.7 for more details.

4.9.8 Bathing Waters

For bathing waters, Mandatory and Guide Values are set out for bathing waters in the

⁵⁴ There is a data gap relating to WFD surface water status data. Overall status is currently not assigned and the term "*unassigned status*" applies in respect of these waterbodies.

2006 EU Bathing Water Directive and transposing Regulations. Mandatory Values are values that must be observed if the bathing area is to be deemed compliant with the Directive. Compliance with Guide Values exceeds guidance with Mandatory Values and can be regarded as quality objectives which bathing sites should endeavour to achieve.

Bathing waters are now classed into four quality categories; 'Excellent', 'Good', 'Sufficient', or 'Poor' with a minimum target of 'Sufficient' required to be achieved for all bathing waters.

The most recent available data from the EPA⁵⁵ shows that bathing waters within the Three Peninsulas reported on are of *Excellent* water quality.

Further to this information on bathing water quality, the Blue Flag award is given to beaches and marinas that have excellent water quality and maintain other standards including effective and appropriate management to ensure the protection of the natural environment and safety standards. The Three Peninsulas bathing location at Barley Cove was also awarded with the Blue Flag in 2019.

4.9.9 Flooding

Certain areas across the area to which the Plan relates are at risk from coastal and fluvial flooding.

Historical flooding is documented at several locations across the peninsulas, including Castletownbere, Adrigole, Glengariff – Drumdour, Bantry, Shull, Ballydehob and Crookhaven.

Strategic Flood Risk Assessment (SFRA) as required by the 'The Planning System and Flood Risk Management Guidelines for Planning Authorities' (OPW and DEHLG, 2009) is relevant to project planning and development and associated environmental assessment and administrative consent of projects.

4.9.10 Existing Problems

Subject to exemptions provided for by Article 4 of the WFD, based on available water data,

certain surface and groundwater bodies will need improvement in order to comply with the objectives of the WFD.

There is historic and predictive evidence of elevated levels of flood risk from fluvial and coastal sources at various locations across the Three Peninsulas.

⁵⁵ EPA Report on *Bathing Water Quality in Ireland 2018*

Figure 4.6 Surface Water Status (2010-2015)

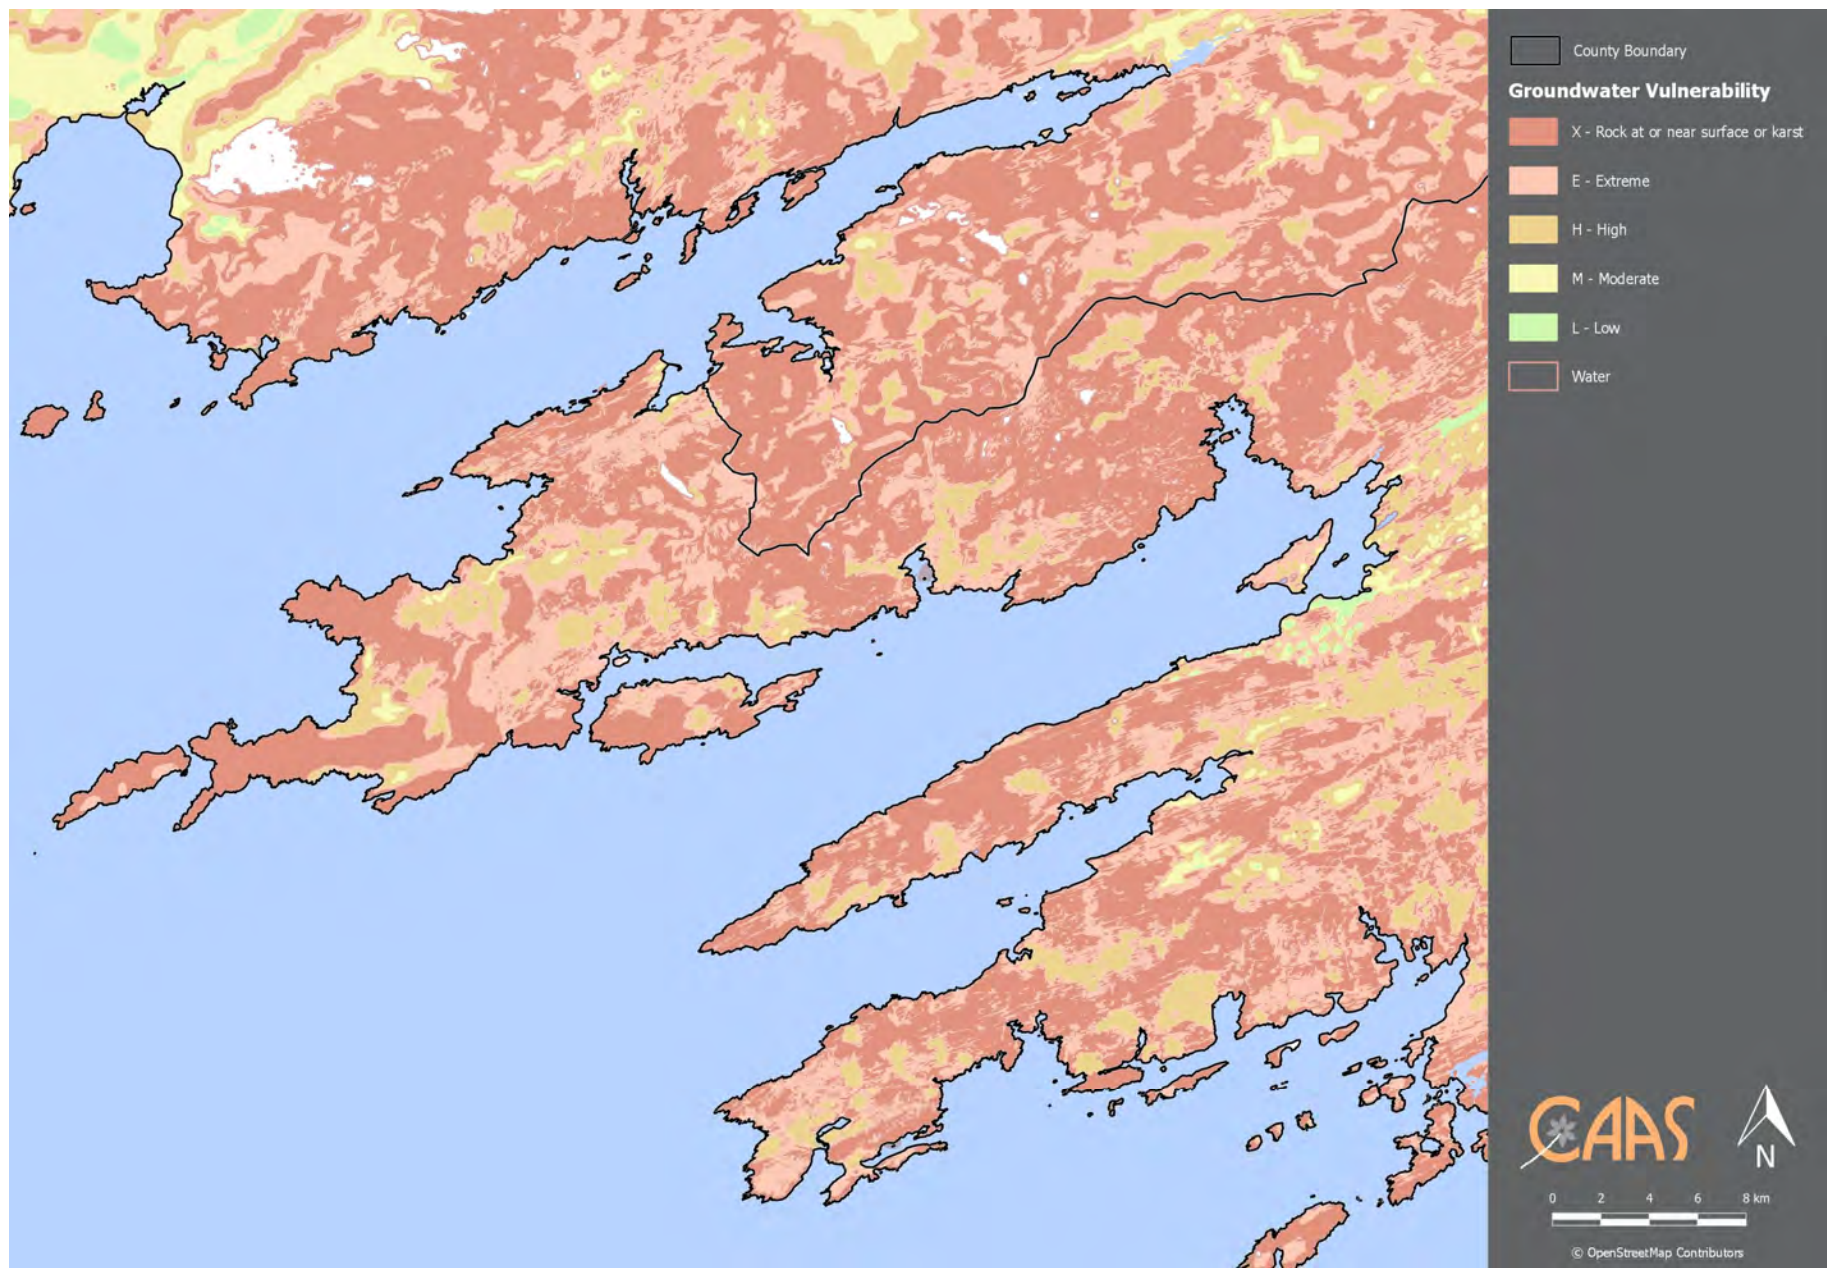

Figure 4.7 Groundwater Vulnerability

4.10 Air and Climatic Factors

4.10.1 Climatic Factors

Various provisions relating to climatic factors have been integrated into the Plan, compliance with which will need to be demonstrated by those seeking or maintaining funding from Fáilte Ireland. Such measures include those relating to (for more detail refer to Section 9):

- Walking and cycling; and
- Contribution towards European and national objectives for climate adaptation and mitigation, taking into account a wide range of detailed measures including those relating to resilience.

Interactions with climatic factors are also present with other environmental components including water/flooding (see Section 4.9).

Ireland's Provisional Greenhouse Gas Emissions 1990-2017 (EPA, 2018) details provisional estimates of greenhouse gas emissions for the period 1990-2017. For 2017, total national greenhouse gas emissions are estimated to be 60.75 million tonnes carbon dioxide equivalent (Mt CO₂eq). This is 0.9% lower (0.53 Mt CO₂eq) than emissions in 2016.

The EPA 2018 publication *Ireland's Greenhouse Gas Emission Projections 2017-2035* provides an assessment of Ireland's progress towards achieving its emission reduction targets set down under the EU Effort Sharing Decision (Decision No 406/2009/EC) for the years 2013-2020 and a longer-term assessment based on current projections. Ireland's 2020 target is to achieve a 20% reduction of non-Emission Trading Scheme (non-ETS) sector emissions (i.e. agriculture, transport, the built environment, waste and non-energy intensive industry) on 2005 levels with annual limits set for each year over the period 2013-2020. Key Insights identified as part of the report's package of documents are that:

- Latest EPA greenhouse gas emissions projections indicate an overall increase in greenhouse gas emissions from most sectors. The projected growth in emissions is largely underpinned by

projected strong economic growth and relatively low fuel prices leading to increasing energy demand over the period.

- The positive impact on emissions of existing and planned policies and measures is tempered by the strong economic outlook and associated increase in energy demand.
- Ireland is not projected to meet 2020 emissions reduction targets and is not on the right trajectory to meet longer term EU and national emission reduction commitments.
- Fossil fuels such as coal and peat continue to be key contributors to emissions from the power generation sector and the extent of their use will be a key determinant in influencing future emissions trends from this sector.
- A strong growth in emissions projections from the transport sector is attributed to a rise in fuel consumption particularly for diesel cars and diesel freight up to 2025. A projected accelerated deployment of electric vehicles between 2025 and 2030 does however result in a projected decline in emissions during this period.
- Agriculture emissions are projected to continue to grow steadily over the period. This is based on an updated outlook that sees an increase in animal numbers particularly for the dairy herd.
- The gap between the two scenarios – With Existing Measures and With Additional Measures – is narrowing over the period to 2020 indicating that mitigation options in the short-term are largely established.
- These projections do not consider the impact of policies and measures that form part of the recently announced National Development Plan or the full impact of policies and measures included in the National Mitigation Plan. It is anticipated that additional impact will be provided to the EPA by relevant Government Departments and Agencies and included in the 2019 Emission Projections.

Ireland's National Policy position is to reduce CO₂ emissions in 2050 by 80% on 1990 levels across the Energy Generation, Built Environment and Transport sectors, with a

goal of Climate neutrality in the Agriculture and Land-Use sector. The 2016 emissions for all of these sectors are rising, making achievement of long-term goals more difficult.

The Government's 2019 Climate Action Plan reflects the central priority that climate change will have in Ireland's political and administrative systems into the future, setting out governance arrangements including the carbon-proofing of government policies, the establishment of carbon budgets, the strengthening of the Climate Change Advisory Council and providing greater accountability to the Oireachtas.

The National Mitigation Plan (Department of Communications, Climate Action and Environment, 2017), represents an initial step to set Ireland on a pathway to achieve the level of decarbonisation required. It is a whole-of-Government Plan, reflecting in particular the central roles of the key Ministers responsible for the sectors covered by the Plan – Electricity Generation, the Built Environment, Transport and Agriculture, as well as drawing on the perspectives and responsibilities of a range of other Government Departments.

The National Adaptation Framework (Department of Communications, Climate Action and Environment, 2018), sets out the national strategy to reduce the vulnerability of the country to the negative effects of climate change and to avail of positive impacts. The National Adaptation Framework outlines a whole of government and society approach to climate adaptation. Under the Framework, a number of Government Departments will be required to prepare sectoral adaptation plans in relation to a priority area that they are responsible for.

The use of alternative fuels, including electricity, forms a significant part of government policy to reduce emissions, including from transport. Greater use of alternative fuels, including renewable energy, has the potential to further contribute towards energy security.

4.10.2 Ambient Air Quality

In order to protect human health, vegetation and ecosystems, EU Directives set down air quality standards in Ireland and the other Member States for a wide variety of pollutants. These pollutants are generated through fuel

combustion, in space heating, traffic, electricity generation and industry and, in sufficient amounts, could affect the well-being of the areas inhabitants. The EU Directives include details regarding how ambient air quality should be monitored, assessed and managed.

The principles to this European approach are set out in the Ambient Air Quality and Cleaner Air for Europe (CAFE) Directive (2008/50/EC) (which replaces the earlier Air Quality Framework Directive 1996 and the first, second and third *Daughter Directives*; the fourth *Daughter Directive* will be included in CAFE at a later stage).

In order to comply with the directives mentioned above, the EPA measures the levels of a number of atmospheric pollutants. For the purposes of monitoring in Ireland, four zones are defined in the Air Quality Standards Regulations 2002 (SI No. 271 of 2002).

The EPA's (2019) *Air Quality in Ireland 2018* identifies that:

- Levels at monitoring sites in Ireland were below the EU legislative limit values in 2018;
- Ireland was above World Health Organization (WHO) air quality guideline value levels at a number of monitoring sites for fine particulate matter, ozone and nitrogen dioxide;
- Ireland was above the European Environment Agency reference level for PAH, a toxic chemical, at three monitoring sites.

Problem pollutants identified by the EPA include particulate matter from burning of solid fuel and nitrogen dioxide from transport emissions in urban areas. Indications that Ireland will exceed EU limit values for nitrogen dioxide in the near future.

With regards to solutions, the report identifies that:

- To tackle the problem of particulate matter, clean ways of heating homes and improve energy efficiency of homes can be progressed; and
- To reduce the impact of nitrogen dioxide, transport options in the Government's Climate Action Plan can be implemented and transport choices can be considered by individuals

The current⁵⁶ air quality in the Rural West Air Quality Region is identified by the EPA as being *good*.

4.10.3 Noise

Noise is unwanted sound. The Noise Directive - Directive 2002/49/EC relating to the assessment and management of environmental noise - is part of an EU strategy setting out to reduce the number of people affected by noise in the longer term and to provide a framework for developing existing EU policy on noise reduction from source. The Directive requires competent authorities in Member States to:

- Draw up *strategic noise maps* for major roads, railways, airports and agglomerations, using harmonised noise indicators and use these maps to assess the number of people which may be impacted upon as a result of excessive noise levels;
- Draw up action plans to reduce noise where necessary and maintain environmental noise quality where it is good; and,
- Inform and consult the public about noise exposure, its effects, and the measures considered to address noise.

In compliance with the Directive and transposing Environmental Noise Regulations (SI No. 140 of 2006), Noise Action Plans have been prepared for each local authority area within the country. These action plans address the agglomeration of Dublin and major roads, railways and airports. The Action Plans include noise mapping and are required to include measures to manage noise issues and effects, including noise reduction if necessary.

4.10.4 Existing Problems

The Climate Change Advisory Council's Annual Review 2019 identifies that the most recent projections demonstrate that, under different assumptions, Ireland will not meet its emissions reduction targets, even with the additional policies and measures included in the National Development Plan. The projections also show that progress on reducing emissions is sensitive to the future path of fuel prices. A significant and sustained rate of emissions reduction of approximately -

2.5% per year is required to meet our objectives for 2050. It is noted that additional measures within the recent Climate Action Plan are not included.

4.11 Material Assets

4.11.1 Water Services

4.11.1.1 Waste Water

The EPA's 2019 report '*Urban Waste Water Treatment in 2018*' identified that:

- Waste water treatment at 21 large urban areas did not meet European standards;
- Raw sewage is released into the environment from 36 urban areas;
- Waste water from 57 areas is the sole threat to waters at risk of pollution;
- Waste water contributed to poor quality bathing waters at three beaches in 2018;
- Discharges from 13 areas must improve to protect freshwater pearl mussels;
- Disinfection systems must be installed at two villages to safeguard shellfish; and
- Eight waste water collection systems have been found non-compliant with European Union requirements.

Based on the EPA's assessment of monitoring information provided by Irish Water and the enforcement activities carried out by the EPA, this report identifies urban areas with the most important environmental issues that must be addressed.

There are four urban areas in County Kerry listed currently as priority areas and 25 areas in County Cork, where improvements are required to resolve urgent environmental issues.

Waste Water Treatment Plants serving the area to which the Plan relates are not currently listed as priority areas, where improvements are required to resolve urgent environmental issues.

Settlements and rural areas across the Three Peninsulas are served by a combined sewer network, including septic tanks and sewerage treatment schemes.

⁵⁶ 27/11/2019 (<http://www.epa.ie/air/quality/>)

Irish Water in conjunction with Cork County Council are planning for new waste water treatment plants in Coachford, Innishannon, Ballyvourney/ Ballymakeera and Dripsey. This project will provide new plants in each of the four areas, as well as additional associated infrastructure required to connect the new plants into the existing waste water infrastructure in these villages. Waste water treatment upgrades are also planned in Castletownbere and Bantry to prevent from discharging untreated waste water to Bantry Bay.

Since 2015, Irish Water, working in partnership with Kerry County Council, has upgraded the waste water treatment plants in Ballylongford, Tarbert, Kilgarvan and Ardfert. Significant improvements have also been made at Dingle, Cahersiveen, Killarney and Tralee, with further improvements also planned for Tralee and Kenmare. Further capacity improvements will help to support new development in these areas, including tourism related development.

4.11.1.2 Water Supply

Drinking water supply in the area to which the Plan relates is provided by domestic water wells and private/public water supply schemes.

Under Section 58 of the Environmental Protection Agency Act 1992, the EPA is required to collect and verify monitoring results for all water supplies in Ireland covered by the European Communities (Drinking Water) Regulations, 2000. The EPA publishes their results in annual reports that are supported by Remedial Action Lists (RALs). The RAL identifies water supplies that are not in compliance with the Regulations mentioned above.

The most recent available EPA Remedial Action List (RAL Q2 of 2019) identifies that:

- four Kerry drinking water supplies with high levels of Trihalomethanes, which are a by-product of the disinfection process; two have inadequate treatment for cryptosporidium and one have excessive levels of aluminium in the treated water; and
- eight Cork drinking water supplies with high levels of Trihalomethanes, which are a by-product of the disinfection process; two have inadequate treatment for cryptosporidium.

RAL Q2 of 2019 lists four water schemes in County Cork that supply the area to which the Plan relates including Durrus, Glengarriff, Schull and Whiddy Island.

4.11.2 Public Assets and Infrastructure

The biggest settlements across the Three Peninsulas include Kenmare (in County Kerry) and Bantry (in County Cork).

Bantry, Castletownbere and Schull are designated as County Towns and economic and employment centres providing for the needs of their extensive rural hinterlands, consisting of several villages, smaller settlements and individual dwellings.

Kenmare town is located at the intersection of two well-known tourist routes i.e. The Ring of Kerry and the Ring of Beara. The R569 regional road connects Kenmare to Kilgarvan and Cork to Killarney route.

Kerry's and Cork's coastal and inland waters are a major asset in terms of tourism, marine leisure activities and economic activities such as commercial fishing and aquaculture.

The Three Peninsulas is served by rail, bus and regional and strategic roads. The N40, in particular, is identified as a critical national road artery serving Cork City and connections to Cork Airport, Port of Cork, Ringaskiddy, Cork Science Park, West Cork and South Kerry. Many regional roads form important link routes between National Roads and the larger towns and villages. Many routes carry also important public transport services.

Public assets and infrastructure that have the potential to be impacted upon by the development of tourism related infrastructure, if unmitigated, include resources such as public open spaces, parks and recreational areas; public buildings and services; utility infrastructure (electricity, gas, telecommunications, water supply, waste water infrastructure etc.). These resources are generally located within the immediate outskirts of urban/suburban areas.

Cork Harbour is the second most significant port in the state. It is critical to the economic success of the South West Region. Cork International Airport is an important strategic

asset to the County and an important economic driver for the South West Region. It plays a key role in terms of access to the region from Britain and other destinations in Europe in particular.

Whiddy Island Oil Trans-shipment Terminal and Castletownbere fisheries port are of national importance. Whiddy Island, in Bantry Bay, is the location of large storage facilities for the Irish Strategic Oil Reserve and commercial users.

Various provisions relating to material assets have been integrated into the Plan, compliance with which will need to be demonstrated by those seeking or maintaining funding from Fáilte Ireland. Such measures include those relating to Critical Infrastructure and the Mitigation of Traffic (for more detail refer to Section 9).

4.11.3 Waste Management

Waste management across the Three Peninsulas is guided by the Southern Region Waste Management Plan 2015-2021. The Southern Waste Region comprises the 10 local authority areas of Carlow, Clare, Cork County, Cork City, Limerick City and County, Kerry, Kilkenny, Tipperary, Waterford City and County and Wexford. The Plan provides a framework for the prevention and management of waste in a sustainable manner.

4.11.4 Existing Problems

The provisions of the Plan will contribute towards protection of the environment with regard to impacts arising from material assets.

The provisions of infrastructure and supporting services for development, particularly water and waste water services, is critical.

2018 saw long dry spells, which Met Éireann compared to 1976 when similar drought conditions were experienced across the country. The prolonged hot weather during the summer caused a huge increase in water usage across the country. As demand for water rose to critical levels, Irish Water's supplies were put under severe stress as more water was being used than could be produced. Public Water Supply Schemes in County Kerry in County Cork were also under pressure during this extended period of dry weather. As

a result, measures were taken to reduce consumption to help replenishing water supplies and to minimise the impact on communities and businesses in Counties Cork and Kerry⁵⁷.

Irish Water is currently preparing a National Water Resources Plan (NWRP) to address issues with the supply and demand for drinking water in Ireland over the short, medium and long term. Measures have been integrated into the VEDP that will ensure that those receiving funding from Fáilte Ireland will not direct additional tourists towards specific locations in instances where significant problems with critical infrastructure have been identified (for more detail refer to Section 9).

4.12 Cultural Heritage

4.12.1 Archaeological Heritage

Archaeology is the study of past societies through the material remains left by those societies and the evidence of their environment. Archaeological sites and monuments vary greatly in form and date; examples include earthworks of different types and periods, (e.g. early historic ringforts and prehistoric burial mounds), megalithic tombs from the Prehistoric period, medieval buildings, urban archaeological deposits and underwater features.

The European Convention on Protection of the Archaeological Heritage known as the Valletta Convention of 1992. This was ratified by Ireland in 1997 and requires that appropriate consideration be given to archaeological issues at all stages of the planning and development process.

Archaeological heritage is protected under the National Monuments Acts (1930-2004), Natural Cultural Institutions Act 1997 and the Planning Acts.

The Record of Monuments and Places (RMP) is an inventory, put on a statutory basis by amendment to the National Monuments Act 1994, of sites and areas of archaeological significance, numbered and mapped. It is

⁵⁷ Information from Irish Water's website www.water.ie

available from the National Monuments Service and at archaeology.ie.

The term 'monument' includes all man-made structures of whatever form or date except buildings habitually used for ecclesiastical purposes. All monuments in existence before 1700 A.D. are automatically considered to be historic monuments within the meaning of the Acts. Monuments of architectural and historical interest also come within the scope of the Acts. Monuments include: any artificial or partly artificial building, structure or erection or group of such buildings, structures or erections; any cave, stone or other natural product, whether or not forming part of the ground, that has been artificially carved, sculptured or worked upon or which (where it does not form part of the place where it is) appears to have been purposely put or arranged in position; any, or any part of any, prehistoric or ancient tomb, grave or burial deposit, or, ritual, industrial or habitation site; and any place comprising the remains or traces of any such building, structure or erection, any such cave, stone or natural product or any such tomb, grave, burial deposit or ritual, industrial or habitation site, situated on land or in the territorial waters of the State', but excludes 'any building or part of any building, that is habitually used for ecclesiastical purposes' (National Monuments Acts 1930-2004).

A recorded monument is a monument included in the list and marked on the map, which comprises the RMP set out county by county under Section 12 of the National Monuments (Amendment) Act, 1994 by the Archaeological Survey of Ireland. The definition includes Zones of Archaeological Potential in towns and all other monuments of archaeological interest, which have so far been identified.

There are various recorded monuments provided with protection across the area to which the Plan relates. Clusters of these monuments can be found within existing urban centres, along the coastline and in certain upland and lowland areas.

The archaeology of the Kenmare area and the Beara Peninsula is dominated by stone circles, with over 20 extant examples or sites of circles recorded stone alignments, standing stones

and wedge tombs with significant numbers of burnt mounds.⁵⁸

These monuments are mapped on Figure 4.8.

There are two areas of archaeological landscapes designated within the north-east part of the Beara Peninsula, important in regional and national context:⁵⁹

- Drombohilly Upper and Lower/Uragh: Stone circles, boulder burials, standing stones, hut sites, enclosures, field systems, fulacht fiadh, cairns etc. Extensive upland evidence from activity across the Bronze Age from Late Neolithic/Early Bronze Age wedge tombs to Late Bronze age stone circles; and
- Dromagorteen/Crinagort/Curragraigue /Erneen: Megalithic tombs, stone circles, boulder burial, standing stones, cairns, fulacht fiadh, extensive hut site complexes and field systems. Similar to Drombohilly/Uragh area, extensive evidence for activity from the Late Neolithic/Early Bronze Age to the Late Bronze Age.

The Underwater Archaeology Unit was established within the National Monuments Service to manage and protect Ireland's underwater cultural heritage, including the quantification of the underwater resource and assessing development impacts in order to manage and protect this aspect of Ireland's heritage. The Shipwreck Inventory is principally a desktop survey with information gathered from a broad range of cartographic, archaeological and historical sources, both documentary and pictorial. An inventory of wrecks covering the coastal waters off County Dublin was published in 2008. Wrecks over 100 years old and archaeological objects found underwater are protected under the National Monuments (Amendment) Acts 1987 and 1994. Significant wrecks less than 100 years old can be designated by Underwater Heritage Order on account of their historical, archaeological or artistic importance. Such Orders can also be used to designate areas of seabed or land covered by water to more clearly define and protect wreck sites and

⁵⁸ *Kerry County Development Plan 2015-2021, Chapter 11: Built and Cultural Heritage*

⁵⁹ *Landscape Character Assessment prepared for the Renewable Energy Strategy 2012 & Adopted/ Proposed Archaeological Landscapes, Kerry County Council (2012).*

archaeological objects. Under the legislation all diving on known protected wreck sites or with the intention of searching for underwater cultural heritage is subject to licensing requirements.

There are a number of historically recorded shipwrecking events located in vicinity of the area to which the Plan relates.

Therefore, coastal waters, tidal estuaries and rivers within and surrounding the area to which the Plan relates, may contain many features and finds associated with maritime/riverine heritage such as shipwrecks, piers, quay walls, fords, stepping stones and associated archaeological objects and features.

4.12.2 Architectural Heritage

The term architectural heritage is defined in the Architectural Heritage (National Inventory) and Historic Monuments Act 1999 as meaning all: structures and buildings together with their settings and attendant grounds, fixtures and fittings; groups of structures and buildings; and, sites which are of technical, historical, archaeological, artistic, cultural, scientific, social, or technical interest.

Records of Protected Structures are legislated for under Section 12 and Section 51 of the Planning and Development Act 2000 as amended. Protected structures are defined in the Planning and Development Act 2000 as amended as structures, or parts of structures that are of special interest from an architectural, historical, archaeological, artistic, cultural, scientific, social or technical point of view.

In relation to a protected structure or proposed protected structure, the following are encompassed:

- (i) The interior of the structure;
- (ii) The land lying within the curtilage⁶⁰ of the structure;

⁶⁰ Curtilage is normally taken to be the parcel of ground immediately associated with the Protected Structure, or in use for the purposes of the structure. Protection extends to the buildings and land lying within the curtilage. While the curtilage sometimes coincides with the present property boundary, it can originally have included lands, features or even buildings now in separate ownership, e.g. the lodge of a former country house, or the garden features located in land subsequently sold off. Such lands are described as being attendant grounds, and the protection extends to them just as if they were still within the curtilage of the Protected Structure.

- (iii) Any other structures lying within that curtilage and their interiors; and,
- (iv) All fixtures and features that form part of the interior or exterior of any structure or structures referred to in subparagraph (i) or (iii).

Protected structures designated across the Three Peninsulas are mapped on Figure 4.8. Clusters of architectural heritage across the Three Peninsulas are concentrated within already developed areas such as Castletown, Bearhaven, Rossmackowen, Kenmare, Kilgarvan, Lauragh, Bonane, Eyerics and Tuosist on Beara Peninsula; Crokhaven, Goleen, Toormore and Skull on the Mizen Head Peninsula; Kilcrohane, Ahakista, Durrus and Bantry on the Sheep's Head Peninsula and on the Whiddy Island between Beara and Sheep's Head Peninsula. The architectural heritage of the area to which the Plan relates, includes examples of townhouses, churches, castles, bridges, walls, towers, shopfronts, artillery and fortifications.

In addition to Protected Structures, the Planning and Development Act, 2000 provides the legislative basis for the protection of Architectural Conservation Areas (ACAs). An ACA is a place, area or group of structures or townscape that is of special architectural, historical, archaeological, artistic, cultural, scientific, social or technical interest or value, or contributes to the appreciation of protected structures, whose character it is an objective to preserve in a development plan. The ACA designation requires that planning permission must be obtained before significant works can be carried out to the exterior of a structure in the ACA that might alter the character of the structure or the ACA.

There are five ACAs designated across the area to which the Plan relates: one in Kenmare town (to the north of Beara Peninsula), three in Bantry (to the north of Sheep's Head Peninsula) and one in Ballydehob (south-east of the Mizen Head Peninsula).

4.12.3 Existing Problems

The context of archaeological and architectural heritage has changed over time however no existing conflicts with legislative objectives governing archaeological and architectural heritage have been identified.

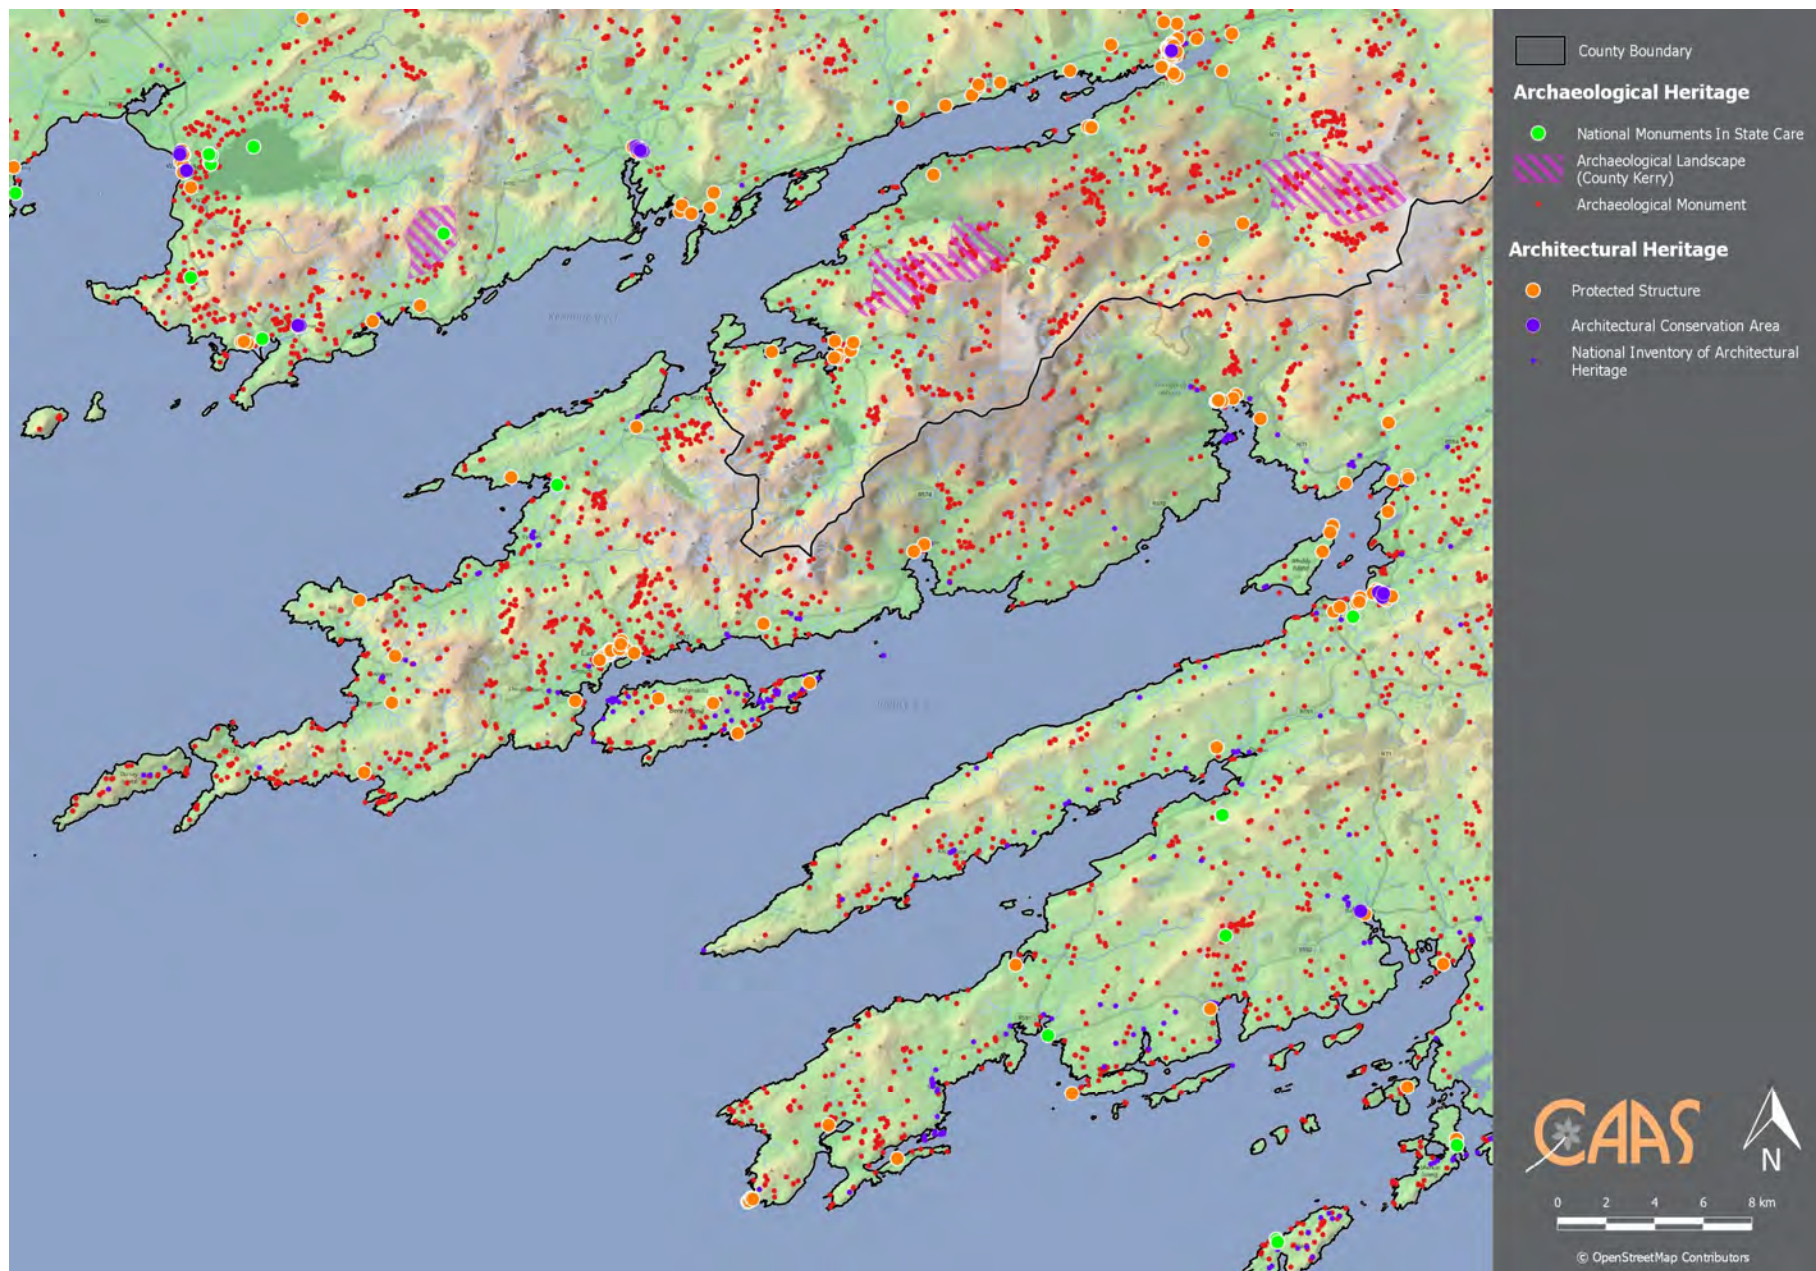

Figure 4.8 Archaeological and Architectural Heritage

4.13 Landscape

4.13.1 Topography

The area to which the Plan relates is located in the southwestern corner of Ireland. The unique topography of the area includes rocky peninsulas, namely Mizen Head, Beara and Sheep's Head, separated by relatively low-lying bays such as Bantry, Dunmanus and Roaringwater Bay.

*"The high ridges and mountainous peaks of the peninsulas, such as Hungry Hill, are characterised by a jagged profile and include the occasional corrie lake and steep pass while others, notably on the Mizen Head peninsula, are more rounded with occasional rock outcrops and streams. The same variety and ruggedness characterises much of the shoreline, with rocky promontories and islands extending out into the sea. The sheltered recesses of the bay areas typically comprise flatter terrain extending inland and rising to low ridges and hills, including drumlins within Bantry Bay. Roaringwater Bay includes many small islands, including Shirkin Island, while Bantry Bay includes the notably larger Bere Island and Whiddy Island. Typically, the rocky peninsulas comprise a mix of moorland, some relatively fertile patches of farmland and woodland including some smaller patches of coniferous plantations on higher ground. Fields of regular shape are more prevalent inland on the flatter ground but become more irregularly shaped and less fertile on the slopes of the surrounding hills, and include patches of bracken, rush and scrub as well as a mix of broadleaf hedgerows and coniferous shelterbelts."*⁶¹

⁶¹ Cork County Landscape Strategy (2007)

4.13.2 Landscape Character Assessment

The area to which the Plan relates⁶² is identified as being situated within one Landscape Character Type in County Cork:

- No. 4, Rugged Ridge Peninsulas - this landscape type is classified as 'very high value', 'very high sensitivity' and 'national importance'.

Landscape Character Types which have a very 'high' or 'high landscape' value and 'high' or 'very high' landscape sensitivity and are of 'county' or 'national importance' are considered to be the most valuable landscapes.

Part of the north-east of the Beara Peninsula is located within County Kerry and is identified as being situated within three Landscape Character Areas:

- LCA 40 - Kenmare River Valley;
- LCA 41 - Upper Sheen River Valley; and
- LCA 42 - Glanmore River Valley and Lough Inchiquin.

There are also two archaeological landscapes designated within/partially within these areas as mapped on Figure 4.8 and listed below:

- No.17 – Drombohilly Upper and Lower/ Uragh; and
- No.18 Dromagorteen/ Crinagort/ Curragraigue/ Erneen.⁶³

Homesteads and settlements, field boundaries and field patterns, buildings and monuments, demesnes, planted woodlands, cut bogs, roads, quarries, mines and factories all attest to the imprint of people on the landscape and give distinctive character to different places across the Three Peninsulas.

⁶² The Beara Peninsula is located partially within counties Kerry and Cork while Sheep's Head and Mizen Head are located wholly within County Cork.

⁶³ Landscape Character Assessment prepared for the Renewable Energy Strategy 2012 & Adopted/ Proposed Archaeological Landscapes, Kerry County Council (2012).

4.13.3 Protected Views and Prospects

The Three Peninsulas contain many sites, areas and vantage points from which views over areas of great natural beauty, local landmarks, historic landscapes, may be obtained.

There are 35 scenic routes identified within Rugged Ridge Peninsulas Landscape Character Type in Cork County Development Plan.

In addition to scenic routes in County Cork, there are also important prospects as identified in Kerry County Development Plan. Prospects are prominent landscapes or areas of special amenity value or special interest that are visible from the surrounding area.

The following landscape designations are also provided for by the Kerry County Development Plan are considered when assessing planning applications and are mapped on Figure 4.9:

- Prime Special Amenity Area;
- Secondary Special Amenity Area; and
- Views and Prospects.

4.13.4 Existing Environmental Problems

The legislative objectives governing landscape and visual appearance were not identified as being conflicted with.

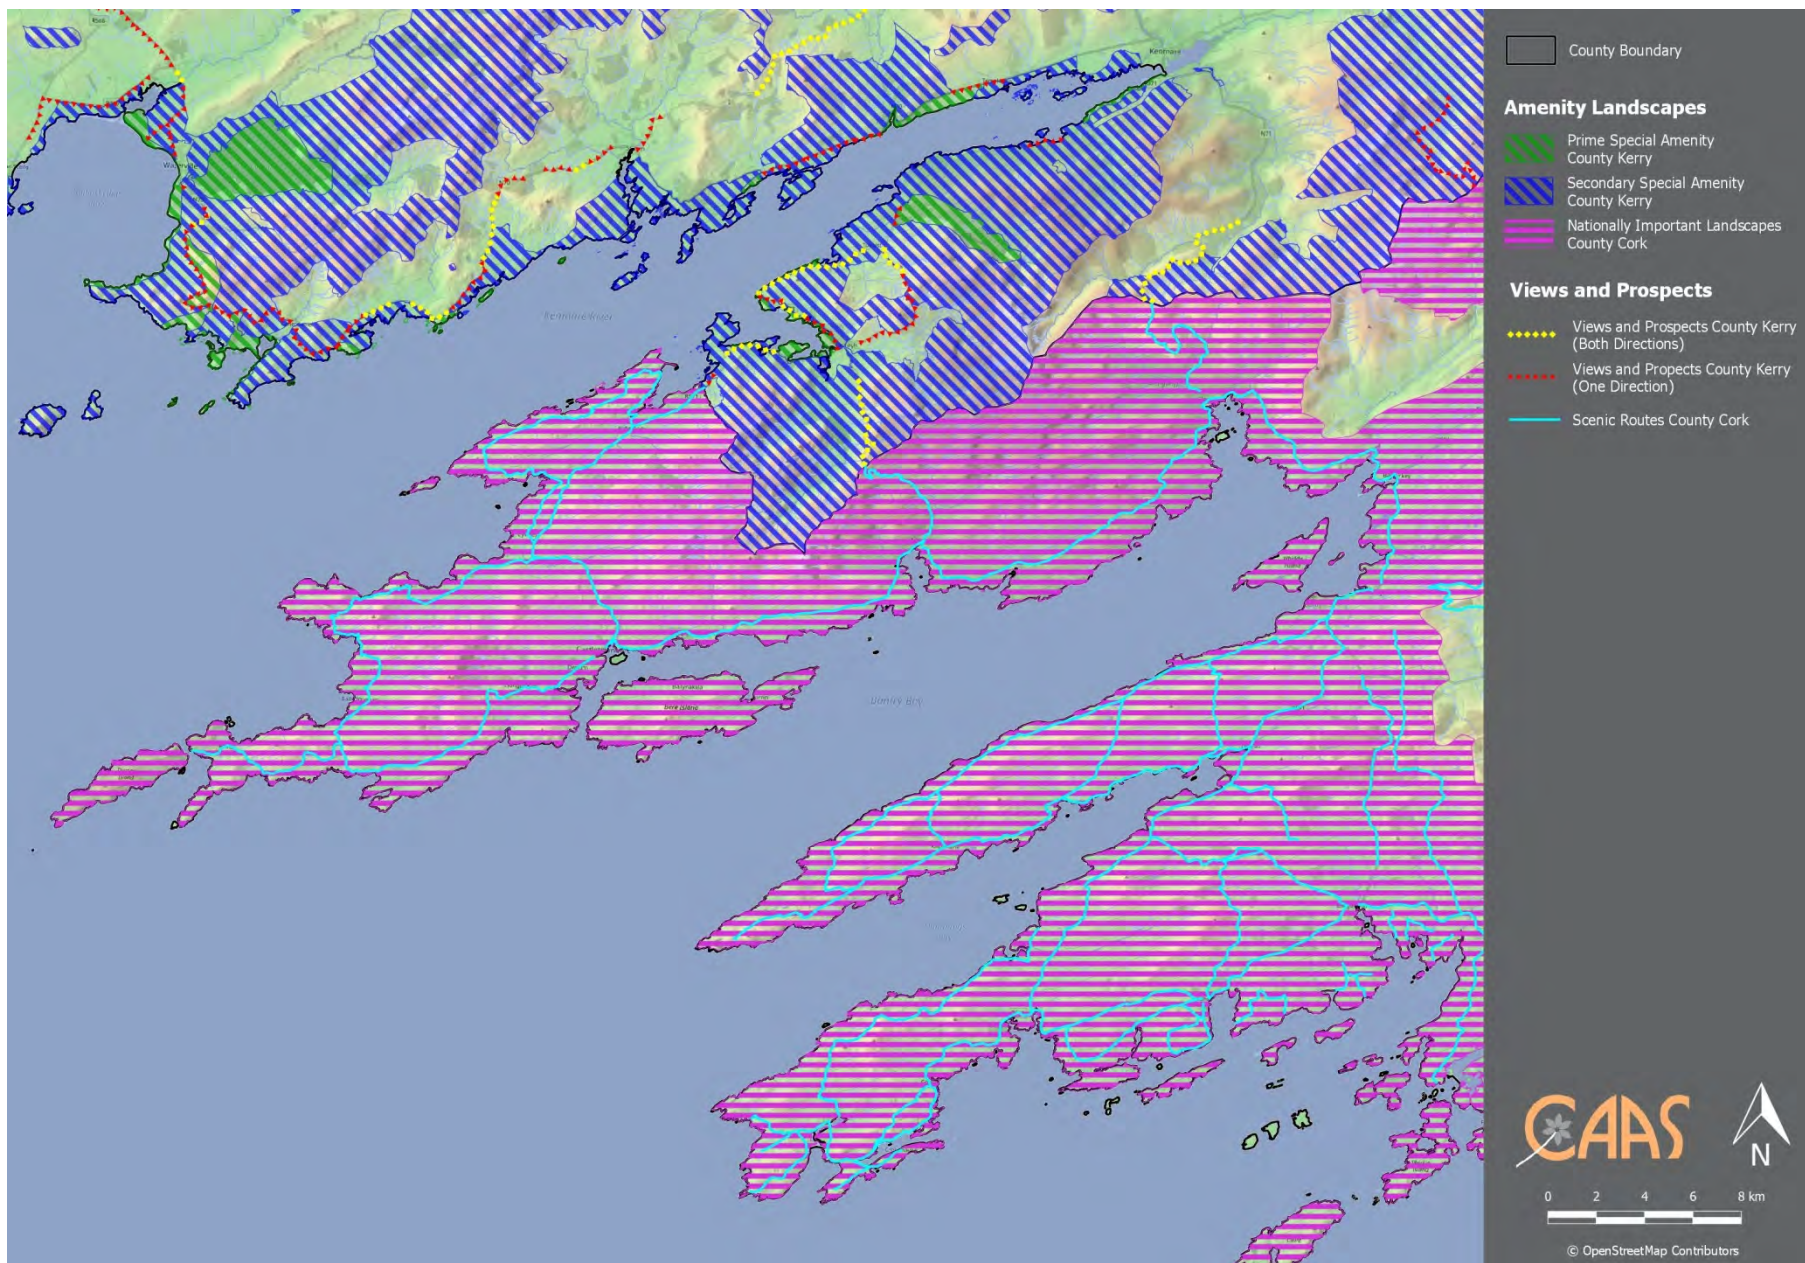

Figure 4.9 Landscape Designations

Section 5 Strategic Environmental Objectives

Strategic Environmental Objectives (SEOs) are methodological measures developed from policies that generally govern environmental protection objectives established at international, Community or Member State level e.g. the environmental protection objectives of various European Directives that have been transposed into Irish law and that are required to be implemented.

The SEOs are set out under a range of topics and are used as standards against which the provisions of the Plan and the alternatives are evaluated in order to help identify which provisions would be likely to result in significant environmental effects and where such effects would be likely to occur, if - in the case of adverse effects - unmitigated.

The SEOs are linked to indicators that can facilitate monitoring the environmental effects of the Plan as well identifying targets that the Plan can help work towards.

All SEOs, indicators and targets are provided on Table 5.1 overleaf.

Further detail on legislation, plans and programmes are provided under Section 2 (and associated Appendix I "Relationship with Legislation and Other Plans and Programmes") and Section 4.

Table 5.1 Strategic Environmental Objectives, Indicators and Targets

Environmental Component	Strategic Environmental Objectives	Indicators	Targets
Biodiversity, Flora and Fauna	B1: To contribute towards compliance with the Habitats and Birds Directives with regard to the protection of European Sites and Annexed habitats and species ⁶⁴	B1: Conservation status of habitats and species as assessed under Article 17 of the Habitats Directive	B1: Maintenance of favourable conservation status for all habitats and species protected under National and International legislation to be unaffected by implementation of the Plan ⁶⁵
	B2: To contribute towards compliance with Article 10 of the Habitats Directive with regard to the management of features of the landscape which - by virtue of their linear and continuous structure or their function act as stepping stones (designated or not) - are of major importance for wild fauna and flora and essential for the migration, dispersal and genetic exchange of wild species	B2: Percentage loss of functional connectivity without remediation resulting from Plan	B2: No significant ecological networks or parts thereof which provide functional connectivity to be lost without remediation resulting from the Plan
	B3: To contribute towards avoidance of significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites ⁶⁶ and to ensure compliance with the Wildlife Acts 1976-2010 with regard to the protection of species listed on Schedule 5 of the principal Act	B3i: Number of significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites resulting from the Plan B3ii: Number of significant impacts on the protection of listed species	B3i: Avoid significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites resulting from the Plan B3ii: No significant impacts on the protection of listed species resulting from the Plan
Population and Human Health	PHH1: To contribute towards the protection of populations and human health from exposure to incompatible landuses	PHH1: Occurrence (any) of a spatially concentrated deterioration in human health arising from environmental factors resulting from the Plan, as identified by the Health Service Executive and Environmental Protection Agency	PHH1: No spatial concentrations of health problems arising from environmental factors as a result of the Plan
Soil	S1: To minimise land take and loss to extent of soil resource	S1: Artificial surfaces land cover extent	S1: Contribute towards the target of the National Planning Framework's SEA (2018) to "Maintain built surface cover nationally to below the EU average of 4%."
Water	W1: To contribute towards the maintenance and improvement, where possible, of the quality and status of surface waters	W1i: Classification of Overall Status (comprised of ecological and chemical status) under the European Communities Environmental Objectives (Surface Waters) Regulations 2009 (SI No. 272 of 2009) W1ii: Mandatory and Guide values as set by the EU Bathing Water Directive and transposing Bathing Water Quality Regulations (SI No. 79 of 2008)	W1i: No deterioration in the status of any surface water or adverse effect upon the ability of any surface water to achieve 'good status' as a result of the Plan W1ii: No deterioration in the value of bathing waters or adverse effect upon the ability of any bathing water to achieve Mandatory values and, where possible, Guide values as a result of the Plan

⁶⁴ 'Annexed habitats and species' refer to those listed under Annex I, II & IV of the EU Habitats Directive and Annex I of the EU Birds Directive.

⁶⁵ Except as provided for in Article 6(4) of the Habitats Directive, viz. There must be: (a) No alternative solution available; (b) Imperative reasons of overriding public interest for the programme to proceed; and (c) Adequate compensatory measures in place.

⁶⁶ The definition of a 'wildlife site' provided by the Planning and Development Act 2000, as amended, includes Natural Heritage Areas (NHAs) and proposed NHAs.

Environmental Component	Strategic Environmental Objectives	Indicators	Targets
	W2: To contribute towards maintaining and improving, where possible, the chemical and quantitative status of groundwaters	W2: Interactions with Groundwater Quality Standards and Threshold Values under Directive 2006/118/EC resulting from development adhering to the Plan	W2: Not to affect the ability of groundwaters to comply with Groundwater Quality Standards and Threshold Values under Directive 2006/118/EC, subject to exemptions provided for by Article 4 of the WFD
	W3: To contribute towards compliance with the provisions of the Flood Risk Management Guidelines	W3: Compliance of relevant lower tier assessments and decision making with the Flood Risk Management Guidelines	W3: For lower tier assessments and decision making to comply with the Flood Risk Management Guidelines
Air and Climatic Factors	AC1: To contribute towards climate adaptation and mitigation	AC1: Demonstration of compliance with provisions relating to climate adaptation and mitigation have been integrated into the Plan.	C1: To maximise the amount of measures relating to climate adaptation and mitigation being implemented
Material Assets	M1: For development to be served with adequate and appropriate critical infrastructure with sufficient capacity (drinking water, waste water, waste and transport) that does not present a danger to human health	M1: Number of instances whereby additional tourists are directed by beneficiaries of funding towards areas in the Plan area where adequate and appropriate critical infrastructure with sufficient capacity is unavailable	M1: No instances whereby additional tourists are directed by beneficiaries of funding towards areas in the Plan area where adequate and appropriate critical infrastructure with sufficient capacity that does not present a danger to human health are unavailable
	M2: To contribute towards the protection of public assets and infrastructure, including that relating to recreation and leisure, transport, utilities and marine areas and fisheries	M2: Number of significant adverse effects on the use of or access to public assets and infrastructure	M2: No significant adverse effects on the use of or access to public assets and infrastructure
	M3: To reduce waste volumes, minimise waste to landfill and increase recycling and reuse	M3: Preparation and implementation of construction and environmental management plans	M3: For construction and environmental management plans to be prepared and implemented for relevant projects
Cultural Heritage	CH1: To contribute towards the protection of archaeological heritage including entries to the Record of Monuments and Places and/or their context	CH1: Percentage of entries to the Record of Monuments and Places protected from significant adverse effects arising from the Plan	CH1: No unauthorised adverse effects on archaeological heritage resulting from implementation of the Plan
	CH2: To contribute towards the protection of architectural heritage including entries to the Records of Protected Structures and Architectural Conservation Areas and their context	CH2: Percentage of entries to the Records of Protected Structures and Architectural Conservation Areas and their context protected from significant adverse effects arising from the Plan	CH2: No unauthorised adverse effects on architectural heritage resulting from implementation of the Plan
Landscape	L1: To avoid conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils	L1: Number of unmitigated conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils	L1: No unmitigated conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils

Section 6 Description of Alternatives

6.1 Introduction

As per the requirements of the SEA Directive, this SEA considers reasonable alternatives, which are capable of being implemented for Plan, taking into account the objectives and the geographical scope of the Plan.

6.2 Current Situation (Alternative 1: Business as Usual)

Strengths in the arts, a strong food culture and a rich cultural heritage are experienced by tourists to the Three Peninsulas. There are a number of existing challenges to the tourism product (and associated value of tourism to the local economy) in the Three Peninsulas area including:

- Increase in visitor numbers with potential to disturb or damage the natural environment;
- High level of seasonality;
- Visitors are primarily day trippers;
- Few experiences designed to promote overnight stays;
- New accommodation options required to better service the more rural areas and long-distance trails;
- Preservation of key heritage sites such as Dunboy Castle;
- Lack of cohesive approach; and
- Lack of resources to coordinate and develop experiences and events.

This current situation presents **Alternative 1 (Business as Usual)** to be considered by the SEA. Numbers of visitors (and associated day-trip journeys) would be likely to continue to increase under this scenario – consistent with the development of tourism over many decades.

6.3 Prepare a Plan (Alternatives 2A and 2B: Prepare a Plan)

The challenges posed by the current situation (see Section 6.2) establish a potential need for a plan that seeks to strengthen the value of tourism to the local economy and better manage tourism in the area that relates to the Plan; facilitating, promoting, supporting and coordinating stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. Such a plan would not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent (such frameworks fall under the remit of other public authorities). Any projects would continue to be required to comply, as relevant, with the various provisions of documents that form the statutory decision-making and consent-granting framework.

Features of such a Plan (in combination with the wider and extensive policy and wider and extensive policy and planning framework planning framework) would include:

- Position the peninsulas as a 'must do' destination and motivate visitors to stay overnight and spend more;
- Extend the length of the season;
- Improve the overall economy of communities through strengthening individual businesses, creating new entrepreneurial opportunities sustaining and increasing job creation and increasing the attractiveness of the area for other forms of economic growth;
- Align to the Wild Atlantic Way brand and target markets;
- Support community values and aspirations, and strengthen community appreciation of local culture and intangible heritage;
- Support sense of place enhancement; and
- Promote collaboration and partnership, support engagement of businesses, and build lasting links between national and regional partners, local agencies and associations, and local tourism experiences.

Under Alternative 2, there are two separate alternatives:

Alternative 2A: A Plan with Additional Requirements for Environmental Protection and Management

Fáilte Ireland provides funding sustainable tourism projects including land use and infrastructural development and land use activities. In order to achieve funding (including promotion) for land use or infrastructural development or land use activities from Fáilte Ireland, **Alternative 2A** would require Fáilte Ireland's stakeholders to demonstrate compliance with measures relating to sustainable development, environmental protection and environmental management contained within the following Fáilte Ireland published documents:

- Wild Atlantic Way Operational Programme Appendix 5 "Site Maintenance Guidelines" and other relevant measures from the Fáilte Ireland visitor and habitat management guidelines series (and any subsequent replacements); and
- Wild Atlantic Way Operational Programme Appendix 6 "Environmental Management for Local Authorities and Others" (and any subsequent replacements).

In order to be realised, projects included in the Plan (in a similar way to other projects from any other sector) would have to demonstrate compliance, as relevant, with various provisions of legislation, policies, plans and programmes that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards.

Further environmental requirements would be integrated into the Plan under Alternative 2A, relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services.

Alternative 2B: A Plan without Additional Requirements for Environmental Protection and Management

Alternative 2B would not include the requirements for environmental protection and management described under Alternative 2A. Projects would continue to be required to comply, as relevant, with the various provisions of documents that form the statutory decision-making and consent-granting framework.

Section 7 Evaluation of Alternatives

7.1 Introduction

This section provides a comparative evaluation of the environmental effects of implementing the alternatives that are detailed under Section 6. This determination sought to understand whether each alternative was likely to improve, conflict with or have a neutral interaction with environmental components.

7.2 Methodology

The relevant aspects of the current state of the environment (see Section 4) and the Strategic Environmental Objectives (see Section 5 and Table 7.1) are used in the evaluation of alternatives.

The alternatives are evaluated using compatibility criteria (see Table 7.2 below) in order to determine how they would be likely to affect the status of the SEOs. The SEOs and the alternatives are arrayed against each other to identify which interactions - if any - would cause effects on specific components of the environment. Where the appraisal identifies a likely conflict with the status of an SEO the relevant SEO code is entered into the conflict column - e.g. B1 which stands for the SEO likely to be affected - in this instance 'To contribute towards compliance with the Habitats and Birds Directives with regard to the protection of European Sites and Annexed habitats and species'⁶⁷.

The interactions identified are reflective of likely significant environmental effects⁶⁸.

The degree to which effects can be fully determined at this level of decision-making is limited, as the Plan will be implemented alongside planning and project development and associated environmental assessments and administrative consent of projects. Nonetheless a comparative evaluation of the various alternatives can be provided.

⁶⁷ 'Annexed habitats and species' refer to those listed under Annex I, II & IV of the EU Habitats Directive and Annex I of the EU Birds Directive.

⁶⁸ These effects include secondary, cumulative, synergistic, short, medium and long-term permanent and temporary, positive and negative effects.

Table 7.1 Strategic Environmental Objectives⁶⁹

Environmental Component	SEO Code	Strategic Environmental Objectives
Biodiversity, Flora and Fauna	B1	To contribute towards compliance with the Habitats and Birds Directives with regard to the protection of European Sites and Annexed habitats and species ⁷⁰
	B2	To contribute towards compliance with Article 10 of the Habitats Directive with regard to the management of features of the landscape which - by virtue of their linear and continuous structure or their function act as stepping stones (designated or not) - are of major importance for wild fauna and flora and essential for the migration, dispersal and genetic exchange of wild species
	B3	To contribute towards avoidance of significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites ⁷¹ and to ensure compliance with the Wildlife Acts 1976-2010 with regard to the protection of species listed on Schedule 5 of the principal Act
Population and Human Health	PHH1	To contribute towards the protection of populations and human health from exposure to incompatible landuses
Soil	S1	To minimise land take and loss to extent of soil resource
Water	W1	To contribute towards the maintenance and improvement, where possible, of the quality and status of surface waters
	W2	To contribute towards maintaining and improving, where possible, the chemical and quantitative status of groundwaters
	W3	To contribute towards compliance with the provisions of the Flood Risk Management Guidelines
Air and Climatic Factors	AC1	To contribute towards climate adaptation and mitigation
Material Assets	M1	For development to be served with adequate and appropriate critical infrastructure with sufficient capacity (drinking water, waste water, waste and transport) that does not present a danger to human health
	M2	To contribute towards the protection of public assets and infrastructure, including that relating to recreation and leisure, transport, utilities and marine areas and fisheries
	M3	To reduce waste volumes, minimise waste to landfill and increase recycling and reuse
Cultural Heritage	CH1	To contribute towards the protection of archaeological heritage including entries to the Record of Monuments and Places and/or their context
	CH2	To contribute towards the protection of architectural heritage including entries to the Records of Protected Structures and Architectural Conservation Areas and their context
Landscape	L1	To avoid conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils

Table 7.2 Criteria for appraising the effect of Alternatives on SEOs

Likely to Improve status of SEOs			Potential Conflict with status of SEOs - likely to be mitigated by complying with other measures included within the Plan		Probable Conflict with status of SEOs- unlikely to be fully mitigated
to the Greatest degree	to a Moderate degree	to a Lesser degree	to a Moderate degree	to a Greater degree	

⁶⁹ See Section 5 for a description of Strategic Environmental Objectives.

⁷⁰ 'Annexed habitats and species' refer to those listed under Annex I, II & IV of the EU Habitats Directive and Annex I of the EU Birds Directive.

⁷¹ The definition of a 'wildlife site' provided by the Planning and Development Act 2000, as amended, includes Natural Heritage Areas (NHAs) and proposed NHAs.

7.3 Cumulative Effects

Cumulative effects are one of the types of effects that have been considered by the assessment of the alternatives. Cumulative effects can be described as the addition of many small impacts to create one larger, more significant, impact.

There are two types of potential cumulative effects that have been considered, namely:

- Potential *intra-Plan* cumulative effects - these arise from the interactions between different types of potential environmental effects resulting from a plan, programme, etc. Where there are elevated levels of environmental sensitivities (such as those identified under Section 4), future development could result in environmental conflicts and lead to a deterioration in environmental integrity. The interrelationships between environmental components that help determine these potential effects are identified on Table 8.4 in Section 8 e.g. interrelationships between: human health and water quality; human health and air quality; human health and flood risk; and ecology and water quality.
- Potential *inter-Plan* cumulative effects - these arise when the effects of the implementation of one plan occur in combination with those of other plans, programmes, developments, etc.

In considering the relationship with legislation and other plans and programmes it is important to note that the Plan will form part of a wider and extensive policy and planning framework that covers sectors including tourism, agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications and land use planning (see Section 2, 4 and 5 and Appendix II) for a range of sectors at a range of levels (e.g. National, Regional, County and Local). Legislation, plans and programmes from these other sectors also take into account demands from both residents and tourists when considering infrastructure and service needs. These plans, in turn, are also subject to their own SEA and AA requirements and include their own requirements relating to environmental protection and management. In this way, the environment is protected in a holistic manner so that the interactions of other uses and their associated plans and programmes are taken into account. Where they exist, the SEA recognises the existence of other environmental assessments with a view to avoid duplication of assessment, in compliance with the SEA Directive.

The National Planning Framework (NPF) sets out Ireland's planning policy direction for the next 22 years. The NPF is to be implemented through Regional Spatial and Economic Strategies (RSEs) and lower tier Development Plans and Local Area Plans. The RSE for the Southern Region (the Plan area is located within the Southern Region) sets out objectives relating tourism development, that have been subject to environmental assessment, including those relating to: enhancing provision of tourism and leisure amenity; promoting tourism activity; developing a road network and public transport services, facilitating improved visitor access and longer dwell times; developing walking and cycling trails, opening greater accessibility to the marine and countryside environment by sustainable modes; and facilitating appropriate tourism development, including that relating to greenways, blueways and peatlands. The RSE is informing the review of existing, assessed Development Plans and Local Area Plans, which already include various provisions relating to land use, tourism and infrastructure. Such reviews will also be subject to environmental assessments.

Implementation of the Plan shall be consistent with and conform with the NPF, RSE and lower-tier land use plans, including provisions relating to sustainable development, environmental protection and environmental management that have been integrated into these documents including through SEA and AA processes. In order to be realised, projects included in the Plan (in a similar way to other projects from any other sector) will have to comply, as relevant, with various legislation, policies, plans and programmes (including requirements for lower-tier Appropriate Assessment, Environmental Impact Assessment and other licencing requirements as appropriate) that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards. These provisions are in addition to those that have been integrated into the Plan that will contribute towards sustainable development, environmental protection and environmental management (see Section 9).

Effects⁷² that may arise as a result of implementing the Plan, in combination with the existing statutory planning/decision-making and consent-granting framework, have been mitigated to the extent that the only residual adverse effects likely to occur as a result of implementation of the Plan are those that are identified under Table 8.3.

Cumulative effects that have been considered include those resulting from the Plan in-combination with the following:

- Land use policy, plans and programmes (e.g. the National Planning Framework, the Regional Spatial and Economic Strategy, Development Plans and Local Area Plans);
- Water services, waste management, transport and energy infrastructure plans (e.g. Irish Water's Water Services Strategic Plan and associated Capital Investment Plan, Regional Waste Management Plans, Transportation Policies and Strategies, Grid25 and associated Implementation Programme) and the Local Economic and Community Plans; and
- Environmental protection and management plans (e.g. River Basin Management Plans, National Mitigation Plan, National Adaptation Framework, and Flood Risk Management Plans).

Potential cumulative effects include the following arising from the alternatives in combination with the plans etc. detailed above (note that potential adverse cumulative effects will be mitigated by provisions that have been integrated into the Plan - see Section 9):

- Contribution towards sustainable development, environmental protection and environmental management – various provisions for which are provided for in the aforementioned plans (**Alternatives 1, 2A and 2B**).
- Need for and use of services, infrastructure and other development (to service development, including tourism), including those related to water services, transport, access or accommodation, that are planned for and consented through the statutory framework – and associated potential adverse environmental effects on various environmental components including biodiversity and flora and fauna, the status of waters, human health, soil, emissions, cultural heritage and landscape (**Alternatives 1, 2A and 2B**).
- Contribution towards climate adaptation and mitigation through measures such as those relating to walking and cycling, flood risk management and resilience (**Alternatives 1, 2A and 2B**).
- Contribution towards travel related greenhouse gas and other emissions to air as a result of increases in tourist numbers (**Alternatives 1, 2A and 2B**).
- Helps to minimise likelihood of exceeding capacity in material assets as a result of not directing additional tourists towards specific locations in instances where significant problems with critical infrastructure (drinking water, waste water, waste and transport) have been identified (**Alternative 2A**). This would positively impact upon the protection and management of environmental components such as human health, water, soil, air and climatic factors.
- Contribution towards the protection and management of biodiversity and flora and fauna (in designated sites, including European Sites and Wildlife Sites, and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats) through visitor management strategies, as relevant and appropriate (**Alternative 2A**).
- In combination with plans and programmes from all sectors potential adverse effects on all environmental components arising from all development in greenfield and brownfield areas (e.g. infrastructural, residential, accommodation, economic, forestry, agricultural etc.). The type of these effects are consistent with those described on Table 7.3. These plans and programmes from other sectors undergo SEA and comply with environmental legislation while projects are subject to EIA and AA, as relevant (**Alternatives 1, 2A and 2B**).

⁷² Effects include in-combination effects – those arising from services and infrastructure (to service development, including tourism) that are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. Mitigation includes that which has been integrated into the Plan – please refer to Section 9 of this report.

7.4 Detailed Consideration of Alternatives

Table 7.3 below describes effects common to all Alternatives (1, 2A and 2B).

Table 7.3 Effects Common to All Alternatives

Environmental Component	Environmental Effects from all Alternatives, in combination with the existing statutory planning/decision-making and consent-granting framework ⁷³	
	Significant Positive Effect, likely to occur	Potential Significant Adverse Effect, if unmitigated
Biodiversity and flora and fauna	<ul style="list-style-type: none"> Contribution towards the protection and management of biodiversity and flora and fauna (in designated sites, including European Sites and Wildlife Sites, and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats) Contribution towards the maintenance of existing green infrastructure and its ecosystem services. Contribution towards protection of biodiversity and flora and fauna as a result of contributing towards the protection of environmental vectors, air, water and soil. 	<p>Arising from both construction and operation of tourism related development/activities:</p> <ul style="list-style-type: none"> Loss of/damage to biodiversity in designated sites (including European Sites and Wildlife Sites) and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats; and disturbance to biodiversity and flora and fauna; Habitat loss, fragmentation and deterioration, including patch size and edge effects; and Disturbance (e.g. due to noise and lighting along transport corridors) and displacement of protected species such as birds and bats.
Population and human health	<ul style="list-style-type: none"> Contribution towards the protection of human health. Contribution towards the protection amenity usage and access. Contribution towards the sustainable growth of tourism and associated sustenance and growth of communities across the Three Peninsulas. 	<ul style="list-style-type: none"> Potential interactions if effects upon environmental vectors such as water are not mitigated. Potential interactions if additional tourists are directed towards specific locations in instances where significant problems with critical infrastructure (drinking water, waste water, waste and transport) have been identified.
Soil	<ul style="list-style-type: none"> Contribution towards minimising land-take and loss of extent of soil resource. Contribution towards the protection of the environment from contamination. Contributes towards protection of designated sites of geological heritage. 	<ul style="list-style-type: none"> Adverse impacts upon the hydrogeological and ecological function of the soil resource. Adverse effects on designated geological heritage sites. Potential for increase in coastal /river bank erosion.
Water	<ul style="list-style-type: none"> Contribution towards the protection of water resources (including the status of surface and groundwaters), bathing water quality and water-based designations. Contribution towards flood risk management and appropriate drainage. 	<ul style="list-style-type: none"> Adverse impacts upon the status of water bodies and entries to the WFD Register of Protected Areas (ecological and human value), arising from changes in quality, flow and/or morphology. Increase in flood risk.
Air and climatic factors	<ul style="list-style-type: none"> Contribution towards climate adaptation and mitigation. 	<ul style="list-style-type: none"> Potential conflict, in combination with plans and programmes from all sectors including transport and land use planning, between increases in visitors (which is likely to result in an increase in greenhouse gas emissions and other emissions to air, including from aviation, with associated interactions with climatic factors) and local, national and European objectives to reduce carbon emissions. Potential conflicts between transport movements, including car movements, and air quality.

⁷³ Effects include in-combination effects – those arising from services, infrastructure and other development (to service development, including tourism) that are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. Effects would be to varying degrees – refer to Table 7.4 for comparative evaluation.

Environmental Component	Environmental Effects from all Alternatives, in combination with the existing statutory planning/decision-making and consent-granting framework	
	Significant Positive Effect, likely to occur	Potential Significant Adverse Effect, if unmitigated
Material Assets	<ul style="list-style-type: none"> Contributes towards protection and allows for continued use of public assets and infrastructure. Contribution towards compliance with national and regional water services and waste management policies. 	<ul style="list-style-type: none"> Increased number of visitors have the potential to increase traffic levels. The need to provide adequate and appropriate water services (it is the function of Irish Water to provide for such needs). Increases in waste levels and residual wastes from visitors and construction of developments. Potential impacts upon public assets and infrastructure.
Cultural Heritage	<ul style="list-style-type: none"> Contribution towards the long-term protection of archaeological and architectural heritage. 	<ul style="list-style-type: none"> Potential effects on designated and unknown archaeological heritage. Potential effects on architectural heritage.
Landscape	<ul style="list-style-type: none"> Contribution towards the protection of landscape designations. 	<ul style="list-style-type: none"> Occurrence of adverse visual impacts, especially in marine, island and ridge areas where, and conflicts with the appropriate protection of statutory designations relating to the landscape. Changes in the appearance of the landscape.

Alternative 1: Business as Usual

Sustainable development, environmental management and environmental protection under Alternative 1 is provided through the existing statutory planning and consent framework. These measures would contribute towards positive effects on the protection and management of all environmental components (see Table 7.3).

Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue to be mitigated through that process.

In the absence of a Plan, there would continue to be an increase in tourist numbers – consistent with the development of tourism over many decades. The most popular locations across the Three Peninsulas would see the largest increases in visitors, which would occur during the peak season. This would give rise to greater concentration of tourists during peak seasons and in the most popular locations thereby increasing potential environmental effects on all components and peak load additions on various infrastructure in particular locations/at particular times.

Contributions towards an increase in travel related greenhouse gas and other emissions to air, including from aviation, would not occur as a result of a Plan that seeks to lengthen dwell time and grow visitor numbers however increases in tourist numbers would occur. Similarly, the positive mitigatory effects as a result of provisions of a Plan, such as those relating to sustainable mobility, traffic management and compliance with climate adaptation and management plans/strategies would not be provided for.

There would be one layer of mitigation under Alternative 1, through the existing statutory planning and consent framework.

Alternative 2A: A Plan with Additional Requirements for Environmental Protection and Management

In addition to the measures relating to sustainable development, environmental protection, environmental management (and associated effects - see Table 7.3), which are provided under all alternatives, and measures relating to seasonality and regionality, provided for by this alternative and Alternative 2B, this alternative would provide additional requirements for environmental protection and management, including those taken from the Wild Atlantic Way Operational Programme and those relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services. In order to be realised, projects included in the Plan (in a similar way to other projects from any other sector) would have to demonstrate compliance, as relevant, with various provisions of legislation, policies, plans and programmes that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards.

Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue to be mitigated through that process.

Although a Plan would help to improve the seasonal and geographic spread of visitors, a Plan's objective would be to increase the number of visitors to the Three Peninsulas. Although this would be likely to happen without a Plan, a Plan would have the potential to increase numbers of tourists – and associated potential adverse effects – to a greater degree than would be the case if there was no Plan.

This would be likely to contribute towards an increase in travel related greenhouse gas and other emissions to air, including from aviation. These increases would be mitigated by provisions that have been integrated into the Plan, including those relating to sustainable mobility and compliance with the Climate Action Plan 2019, the National Climate Change Adaptation Framework (2018 and any subsequent versions) and the National Mitigation Plan (2017 and any subsequent versions).

A Plan would also help to promote new experiences – including those relating to land use activities and developments. These would also have the potential to increase adverse effects. Notwithstanding this, there would be three layers of mitigation, through:

- The existing statutory planning and consent framework;
- Visitor management strategies; and
- Additional environmental requirements for environmental protection and management, under this alternative.

Alternative 2B: A Plan without Additional Requirements for Environmental Protection and Management

Certain measures relating to sustainable development, environmental management and environmental protection (and associated effects - see Table 7.3), which are provided under all alternatives, this Alternative (2B) would provide measures to improve seasonality and regionality – Alternative 2A would provide this also. Seasonality and regionality provide a greater spread of tourists throughout the year and across the Three Peninsulas thereby reducing potential environmental effects and peak load additions on various infrastructure in particular locations/at particular times.

Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue to be mitigated through that process.

Although a Plan would help to improve the seasonal and geographic spread of visitors, a Plan's objective would be to increase the number of visitors to the Three Peninsulas. Although this would be likely to happen without a Plan, a Plan would have the potential to increase numbers of tourists – and associated potential adverse effects – to a greater degree than would be the case if there was no plan. This would be likely to contribute towards an increase in travel related greenhouse gas and other emissions to air, including from aviation. These increases would be mitigated by the wider planning framework.

A Plan would also help to promote new experiences – including those relating to land use activities and developments. These would also have the potential to increase adverse effects. Notwithstanding this, there would be one layer of mitigation, through the existing statutory planning and consent framework.

7.5 Selected Alternative for the Plan

Taking into account the environmental effects detailed above and the challenges and opportunities present for tourism across the Three Peninsulas, Fáilte Ireland have proceeded with Alternative 2A "A Plan with Additional Requirements for Environmental Protection and Management". A comparative assessment of all three alternatives against SEOs is provided on Table 7.4 overleaf.

Table 7.4 Comparative Evaluation of Alternatives against SEOs

	Likely to Improve status of SEOs			Potential Conflict with status of SEOs - likely to be mitigated by complying with other measures included within the Plan		Probable Conflict with status of SEOs- unlikely to be fully mitigated
	to the Greatest degree	to a Moderate degree	to a Lesser degree	to a Moderate degree	to a Greater degree	
Alternative 1: Business as Usual			<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 Sustainable development, environmental management and environmental protection is provided through the existing statutory planning and consent framework. These measures would contribute towards positive effects on the protection and management of all environmental components (see Table 7.3).</p>		<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue to be mitigated through that process.</p> <p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 In the absence of a Plan, there would likely to be a continuing increase in tourist numbers – consistent with the development of tourism over many decades. The most popular locations across the Three Peninsulas would be likely to see the largest increases in visitors, which would be likely to occur during the peak season. This would be likely to give rise to greater concentration of tourists during peak seasons and in the most popular locations thereby increasing potential environmental effects on all components and peak load additions on various infrastructure in particular locations/at particular times.</p>	
Alternative 2A: A Plan with Additional Requirements for Environmental Protection and Management	<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 In addition to the measures relating to sustainable development, environmental protection, environmental management (and associated effects - see Table 7.3) and measures relating to seasonality, regionality and visitor management strategies, provided for by this alternative and Alternative 2B, this Alternative (2A) would provide additional requirements for environmental protection and management.</p>			<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue to be mitigated through that process.</p> <p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1 Although a Plan would help to improve the seasonal and geographic spread of visitors, a Plan's objective would be to increase the number of visitors to the Three Peninsulas. Although this would be likely to happen without a Plan, a Plan would have the potential to increase numbers of tourists – and associated potential adverse effects – to a greater degree. A Plan would also help to promote new experiences – including those relating to land use activities and developments. These would also have the potential to increase adverse effects.</p> <p>Notwithstanding these issues, there would be three layers of mitigation, through:</p> <ul style="list-style-type: none"> • The existing statutory planning and consent framework; • Visitor management strategies; and • Additional environmental requirements for environmental protection and management, under this alternative. 		

SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan

	Likely to Improve status of SEOs		Potential Conflict with status of SEOs - likely to be mitigated by complying with other measures included within the Plan		Probable Conflict
Alternative 2B: A Plan without Additional Requirements for Environmental Protection and Management		<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p> <p>In addition to the measures relating to sustainable development, environmental management and environmental protection (and associated effects - see Table 7.3), this alternative would provide measures relating to seasonality and regionality – such measures would also be provided for by Alternative 2A.</p>		<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p> <p>Tourism related development would continue to be planned for and consented through the existing statutory planning and consent framework. Potential adverse effects (see Table 7.3) would continue be mitigated through that process.</p> <p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p> <p>Although a Plan would help to improve the seasonal and geographic spread of visitors, a Plan's objective would be to increase the number of visitors to the Three Peninsulas. Section 8 Evaluation of Plan Provisions

8.1 Introduction

The relevant aspects of the current state of the environment (see Section 4) and the Strategic Environmental Objectives (see Section 5 and Table 8.1) are used in the assessment of the Plan.

The provisions are evaluated using compatibility criteria (see Table 8.2) in order to determine how they would be likely to affect the status of the SEOs. The SEOs and the Plan provisions are arrayed against each other to identify which interactions - if any - would cause effects on specific components of the environment. Where the appraisal identifies a likely conflict with the status of an SEO the relevant SEO code is entered into the conflict column - e.g. B1 which stands for the SEO likely to be affected - in this instance 'To contribute towards compliance with the Habitats and Birds Directives with regard to the protection of European Sites and Annexed habitats and species'⁷⁴.

The interactions identified are reflective of likely significant environmental effects⁷⁵:

1. Interactions that would be likely to improve the status of a particular SEO would be likely to result in a significant positive effect on the environmental component to which the SEO relates.
2. Interactions that would potentially conflict with the status of an SEO and would be likely to be mitigated would be likely to result in potential significant negative effects however these effects will be mitigated by measures which have been integrated into the Plan (see Section 9).
3. Interactions that would probably conflict with the status of an SEO and would be unlikely to be mitigated would be likely to result in a significant negative effect on the environmental component to which the SEO relates.

The degree to which effects can be fully determined at this level of decision-making is limited, as the Plan will be implemented alongside planning and project development and associated environmental assessments and administrative consent of projects. More detailed environmental measures may emanate from such assessments, further facilitating the mitigation of adverse effects.

⁷⁴ 'Annexed habitats and species' refer to those listed under Annex I, II & IV of the EU Habitats Directive and Annex I of the EU Birds Directive.

⁷⁵ These effects include secondary, cumulative, synergistic, short, medium and long-term permanent and temporary, positive and negative effects.

Table 8.1 Strategic Environmental Objectives

Environmental Component	Code	Strategic Environmental Objectives
Biodiversity, Flora and Fauna	B1	To contribute towards compliance with the Habitats and Birds Directives with regard to the protection of European Sites and Annexed habitats and species ⁷⁶
	B2	To contribute towards compliance with Article 10 of the Habitats Directive with regard to the management of features of the landscape which - by virtue of their linear and continuous structure or their function act as stepping stones (designated or not) - are of major importance for wild fauna and flora and essential for the migration, dispersal and genetic exchange of wild species
	B3	To contribute towards avoidance of significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites ⁷⁷ and to ensure compliance with the Wildlife Acts 1976-2010 with regard to the protection of species listed on Schedule 5 of the principal Act
Population and Human Health	PHH1	To contribute towards the protection of populations and human health from exposure to incompatible landuses
Soil	S1	To minimise land take and loss to extent of soil resource
Water	W1	To contribute towards the maintenance and improvement, where possible, of the quality and status of surface waters
	W2	To contribute towards maintaining and improving, where possible, the chemical and quantitative status of groundwaters
	W3	To contribute towards compliance with the provisions of the Flood Risk Management Guidelines
Air and Climatic Factors	AC1	To contribute towards climate adaptation and mitigation
Material Assets	M1	For development to be served with adequate and appropriate critical infrastructure with sufficient capacity (drinking water, waste water, waste and transport) that does not present a danger to human health
	M2	To contribute towards the protection of public assets and infrastructure, including that relating to recreation and leisure, transport, utilities and marine areas and fisheries
	M3	To reduce waste volumes, minimise waste to landfill and increase recycling and reuse
Cultural Heritage	CH1	To contribute towards the protection of archaeological heritage including entries to the Record of Monuments and Places and/or their context
	CH2	To contribute towards the protection of architectural heritage including entries to the Records of Protected Structures and Architectural Conservation Areas and their context
Landscape	L1	To avoid conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils

Table 8.2 Criteria for appraising the effect of Plan provisions on SEOs

Likely to Improve status of SEOs	Potential Conflict with status of SEOs- likely to be mitigated	Probable Conflict with status of SEOs- unlikely to be mitigated	No Likely interaction with status of SEOs
---	---	--	--

⁷⁶ 'Annexed habitats and species' refer to those listed under Annex I, II & IV of the EU Habitats Directive and Annex I of the EU Birds Directive.

⁷⁷ The definition of a 'wildlife site' provided by the Planning and Development Act 2000, as amended, includes Natural Heritage Areas (NHAs) and proposed NHAs.

8.2 Overall Findings

The overall findings of the SEA are that:

- **The Plan contributes towards Compliance with Environmental Legislation and Guidelines**

Fáilte Ireland are integrating all recommendations arising from the SEA and AA processes into the Plan (see Section 9 of this report), facilitating compliance of the Plan with various European and National legislation and Guidelines relating to the sustainable development, environmental protection and environmental management.

Implementation of the Plan will contribute towards efforts to achieve a number of the 17 Sustainable Development Goals⁷⁸ of the 2030 Agenda for Sustainable Development, which were adopted by world leaders in 2015 at a United Nations Summit and came into force in 2016.

- **The Plan provides for Environmental Protection and Management**

Fáilte Ireland provides funding for sustainable tourism projects that emerge as part of specific, competitive, themed and time-bound grant schemes or as part of wider strategic partnerships. These include projects relating to land use, infrastructural development and land use activities and attractions. Reference made to such projects included in the Plan does not guarantee funding. While funding is provided to certain projects, Fáilte Ireland is not the developer.

In order to achieve funding (including promotion) for land use or infrastructural development or land use activities from Fáilte Ireland, Fáilte Ireland's stakeholders shall be required to demonstrate compliance⁷⁹ with measures relating to sustainable development, environmental protection and environmental management contained within the following Fáilte Ireland published documents:

- Wild Atlantic Way Operational Programme Appendix 5 "*Site Maintenance Guidelines*" and other relevant measures from the Fáilte Ireland visitor and habitat management guidelines series (and any subsequent replacements); and
- Wild Atlantic Way Operational Programme Appendix 6 "*Environmental Management for Local Authorities and Others*" (and any subsequent replacements).

In order to be realised, projects included in the Plan (in a similar way to other projects from any other sector) will have to comply, as relevant, with various provisions of legislation, policies, plans and programmes that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards. Such legislation, policies, plans and programmes include:

- Requirements for lower-tier environmental assessment, including EIA and AA;
- The Kerry and Cork County Development Plans, including various provisions relating to sustainable development, environmental protection and environmental management; and

⁷⁸ Including: Goal 3 Ensure healthy lives and promote well-being for all at all ages; Goal 6 Ensure availability and sustainable management of water and sanitation for all; Goal 7 Ensure access to affordable, reliable, sustainable and modern energy for all; Goal 8 Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all; Goal 9 Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation; Goal 11 Make cities and human settlements inclusive, safe, resilient and sustainable; Goal 12 Ensure sustainable consumption and production patterns; Goal 13 Take urgent action to combat climate change and its impacts; Goal 15 Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

⁷⁹ Demonstration of compliance may be supported by monitoring undertaken by the beneficiary.

- The Climate Action Plan 2019, the National Climate Change Adaptation Framework (2018 and any subsequent versions) and the National Mitigation Plan (2017 and any subsequent versions).

Further requirements have been integrated into the Plan under the headings of “Infrastructure Capacity”, “Visitor Management” and “Green Infrastructure and Ecosystem Services” – see Section 9 of this Environmental Report.

- **The Plan is likely to contribute towards, in combination with other governmental policies, plans etc., an increase in greenhouse gas emissions – although such increases will be mitigated**

The Plan seeks to lengthen dwell time and grow visitor numbers to the Plan area and would, in combination with other governmental policies, plans etc., be likely to contribute towards an increase in travel related greenhouse gas and other emissions to air, including from aviation. These increases will be mitigated by provisions that have been integrated into the Plan, including those relating to sustainable mobility and compliance with the Climate Action Plan 2019, the National Climate Change Adaptation Framework (2018 and any subsequent versions) and the National Mitigation Plan (2017 and any subsequent versions).

Furthermore, as identified in the Climate Action Plan (Government of Ireland, 2019):

“Since 2012, greenhouse gas emissions associated with flights operating in the European Economic Area (EEA), including domestic flights as well as those to and from third countries, are covered by the EU ETS⁸⁰. Airlines are required to monitor, report and verify their emissions, and to surrender allowances against those emissions. Airlines receive tradable allowances covering a certain level of emissions from their flights per year and must purchase allowances to cover any shortfall between their allocated sum of free emissions allowances and their actual emissions, as reported annually.

To support the planned development of a global Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA) by the International Civil Aviation Organisation (ICAO), the EU agreed in 2014 to limit the scope of aviation in the EU ETS to flights within the EEA. CORSIA will come into effect in 2021 and aims to stabilise global aviation emissions at 2020 levels by requiring airlines to offset any emissions growth after 2020 by purchasing eligible emission units generated by projects that reduce emissions in other sectors. As Ireland is a member of ICAO, Irish aircraft operators will have to offset any emissions growth after 2020 by purchasing eligible emission units, i.e. pay full carbon price.”

- **The Plan is Consistent with the existing Statutory Decision-Making and Consent-Granting Framework**

Implementing the Plan will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, stakeholders and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The Plan does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent.

The Plan is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The National Planning Framework (NPF) sets out Ireland’s planning policy direction for the next 22 years. The NPF is to be implemented through Regional Spatial and Economic Strategies (RSESs) and lower tier Development Plans and Local Area Plans. The RSES for the

⁸⁰ Emissions Trading Scheme (ETS)

Southern Region (that includes the area to which the Plan relates) sets out objectives relating to tourism development, that have been subject to environmental assessment, including those relating to: enhancing provision of tourism and leisure amenity; promoting tourism activity; developing a road network and public transport services, facilitating improved visitor access and longer dwell times; developing walking and cycling trails, opening greater accessibility to the marine and countryside environment by sustainable modes; and facilitating appropriate tourism development, including that relating to greenways, blueways and peatlands. The RSES is informing the review of existing, assessed lower-tier Development Plans and Local Area Plans, which already include various provisions relating to land use, tourism and infrastructure. Such reviews will also be subject to environmental assessments.

Implementation of the Plan shall be consistent with and conform with the NPF, RSES and lower-tier land use plans, including provisions relating to sustainable development, environmental protection and environmental management that have been integrated into these documents, including through SEA and AA processes. In order to be realised, projects included in the VEDP (in a similar way to other projects from any other sector) will have to comply, as relevant, with various legislation, policies, plans and programmes (including requirements for lower-tier Appropriate Assessment, Environmental Impact Assessment and other licencing requirements as appropriate) that form the statutory decision-making and consent-granting framework, of which the Plan is not part and does not contribute towards.

- **Potentially Significant Adverse Effects to be mitigated**

Potentially significant adverse environmental effects arising from the Plan, in combination with the existing statutory decision-making and consent-granting framework, are detailed on Table 8.3. These effects will be mitigated by the various provisions that have been integrated into the Plan including those that have arisen through the SEA and AA processes (see Section 9).

Table 8.3 details the various types of environmental effects likely to arise with respect to the Plan (as developed from the selected alternatives – see Section 7) as a direct result of activities under the Plan and in combination with the existing statutory decision-making and consent-granting framework. By complying with appropriate mitigation measures - including those that have been integrated into the Plan - potentially significant adverse environmental effects which could arise as a result of implementing the Plan would be likely to be avoided, reduced or offset.

Table 8.3 Overall Findings – Environmental Effects arising from Plan Provisions

Environmental Component	Environmental Effects, in combination with the existing statutory planning/decision-making and consent-granting framework ⁸¹			SEO Codes
	Significant Positive Effect, likely to occur	Potential Significant Adverse Effect, if unmitigated	Residual Adverse Non-Significant Effects	
Biodiversity and flora and fauna	<ul style="list-style-type: none"> Contribution towards the protection and management of biodiversity and flora and fauna (in designated sites, including European Sites and Wildlife Sites, and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats) including through: <ul style="list-style-type: none"> Visitor management strategies; and VEDP requirements for environmental protection and management. Contributes towards the maintenance of existing green infrastructure and its ecosystem services. Contribution towards protection of biodiversity and flora and fauna as a result of contributing towards the protection of environmental vectors, air, water and soil. 	<p>Arising from both construction and operation of tourism related development/activities:</p> <ul style="list-style-type: none"> Loss of/damage to biodiversity in designated sites (including European Sites and Wildlife Sites) and Annexed habitats and species, listed species, ecological connectivity and non-designated habitats; and disturbance to biodiversity and flora and fauna; Habitat loss, fragmentation and deterioration, including patch size and edge effects; and Disturbance (e.g. due to noise and lighting along transport corridors) and displacement of protected species such as birds and bats. 	<ul style="list-style-type: none"> Loss of an extent of non-protected habitats and species arising from the replacement of semi-natural land covers with artificial surfaces arising from projects consented through the statutory planning/consent-granting framework. Losses or damage to ecology (these would be: in compliance with relevant legislation; and mitigated as projects would demonstrate compliance with various environmental protection and management measures) 	B1 B2 B3
Population and human health	<ul style="list-style-type: none"> Contribution towards the protection of human health including through VEDP requirements for environmental protection and management. Contribution towards the protection of human health as a result of not directing additional tourists towards specific locations in instances where significant problems with critical infrastructure (drinking water, waste water, waste and transport) have been identified. Contribution towards the protection amenity usage and access. Contribution towards the sustainable growth of tourism and associated sustenance and growth of communities across the Three Peninsulas. 	<ul style="list-style-type: none"> Potential interactions if effects upon environmental vectors such as water are not mitigated. Potential interactions if additional tourists are directed towards specific locations in instances where significant problems with critical infrastructure (drinking water, waste water, waste and transport) have been identified. 	<ul style="list-style-type: none"> Potential interactions with residual effects on environmental vectors. This has been mitigated by provisions that have been integrated into the Plan, including those relating to sustainable development, environmental protection and environmental management. 	PHH1

⁸¹ Effects include in-combination effects – those arising from services, infrastructure and other development (to service development, including tourism) that are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. Mitigation includes that which has been integrated into the Plan – please refer to Section 9 of this report.

Environmental Component	Environmental Effects, in combination with the existing statutory planning/decision-making and consent-granting framework ^{B1}			SEO Codes
	Significant Positive Effect, likely to occur	Potential Significant Adverse Effect, if unmitigated	Residual Adverse Non-Significant Effects	
Soil	<ul style="list-style-type: none"> Various provisions (e.g. relating to maintaining the wildness of areas that have not yet been developed) help to minimise land-take and loss of extent of soil resource. Contribution towards the protection of the environment from contamination. Contributes towards protection of designated sites of geological heritage. 	<ul style="list-style-type: none"> Adverse impacts upon the hydrogeological and ecological function of the soil resource. Adverse effects on designated geological heritage sites. Potential for increase in coastal /river bank erosion. 	<ul style="list-style-type: none"> Loss of an extent of soil function arising from the replacement of semi-natural land covers with artificial surfaces and from sea level rise/coastal erosion. 	S1
Water	<ul style="list-style-type: none"> Contribution towards the protection of water resources (including the status of surface and groundwaters), bathing water quality and water-based designations including through integrating requirements for environmental protection and management into the Plan. Contribution towards flood risk management and appropriate drainage. 	<ul style="list-style-type: none"> Adverse impacts upon the status of water bodies and entries to the WFD Register of Protected Areas (ecological and human value), arising from changes in quality, flow and/or morphology. Increase in flood risk. 	<ul style="list-style-type: none"> Increased loadings as a result of development to comply with River Basin Management Plan. Flood related risks remain due to uncertainty with regard to extreme weather events – however such risks will be mitigated by: measures that have been integrated into the Plan; and the statutory planning/consent-granting framework. 	W1 W2 W3
Air and climatic factors	<ul style="list-style-type: none"> Contribution towards climate adaptation and mitigation through measures relating to: <ul style="list-style-type: none"> Walking and cycling; and Contribution towards European and national objectives for climate adaptation and mitigation, taking into account a wide range of detailed measures including those relating to resilience. 	<ul style="list-style-type: none"> Potential conflict, in combination with plans and programmes from all sectors including transport and land use planning, between increases in visitors (which is likely to result in an increase in greenhouse gas emissions and other emissions to air, including from aviation, with associated interactions with climatic factors) and local, national and European objectives to reduce carbon emissions. Potential conflicts between transport movements, including car movements, and air quality. 	<ul style="list-style-type: none"> An increase in travel related greenhouse gas and other emissions to air, including from aviation. This has been mitigated by provisions that have been integrated into the Plan, including those relating to sustainable mobility and compliance with the Climate Action Plan 2019, the National Climate Change Adaptation Framework (2018 and any subsequent versions) and the National Mitigation Plan (2017 and any subsequent versions). Risks remain due to uncertainty with regard to climate and interactions with issues including flooding and material assets. 	AC1
Material Assets	<ul style="list-style-type: none"> Contributes towards protection and allows for continued use of public assets and infrastructure. Contains clear objectives around seasonality and regionality which look not only to spread the benefits of tourism but also the potential impacts/ load associated with tourism. Helps to minimise likelihood of exceeding capacity in material assets as a result of not directing additional tourists towards specific locations in instances where significant problems with critical infrastructure (drinking water, waste water, waste and transport) have been identified. Contribution towards compliance with national and regional water services and waste management policies. 	<ul style="list-style-type: none"> Increased number of visitors have the potential to increase traffic levels. The need to provide adequate and appropriate water services (it is the function of Irish Water to provide for such needs). Increases in waste levels and residual wastes from visitors and construction of developments. Potential impacts upon public assets and infrastructure. 	<ul style="list-style-type: none"> Residual wastes to be disposed of in line with higher level waste management policies. Increased loading on critical infrastructure (drinking water, waste water, waste and transport) where no significant problems have been identified with this infrastructure. Exceedance of capacity in critical infrastructure risks remain due to uncertainty with regard to climate – however such risks will be mitigated by: measures that have been integrated into the Plan; and the statutory planning/consent-granting framework. Any impacts upon public assets and infrastructure to comply with statutory planning/consent-granting framework. 	M1 M2 M3

Environmental Component	Environmental Effects, in combination with the existing statutory planning/decision-making and consent-granting framework ^{B1}			SEO Codes
	Significant Positive Effect, likely to occur	Potential Significant Adverse Effect, if unmitigated	Residual Adverse Non-Significant Effects	
Cultural Heritage	<ul style="list-style-type: none"> Contribution towards the long-term protection of archaeological and architectural heritage by encouraging greater levels of awareness and appreciation through, use, interpretation and access, in line with the requirements relating to the protection of cultural heritage including: entries to the Record of Monuments and Places and/or their context; and entries to the Records of Protected Structures and Architectural Conservation Areas and their context. 	<ul style="list-style-type: none"> Potential effects on designated and unknown archaeological heritage. Potential effects on architectural heritage. 	<ul style="list-style-type: none"> Potential alteration to the context and setting of architectural heritage however, these will occur in compliance with legislation. Potential alteration to the context and setting of archaeological heritage however, this will occur in compliance with legislation. Potential loss of unknown archaeology however, this loss will be mitigated by measures integrated into the Plan. 	CH1 CH2
Landscape	<ul style="list-style-type: none"> Contribution towards the protection of landscape designations as a result of: facilitating compliance with relevant plans; and maintaining the wildness of areas that have not yet been developed. 	<ul style="list-style-type: none"> Occurrence of adverse visual impacts, especially in marine, island and ridge areas where, and conflicts with the appropriate protection of statutory designations relating to the landscape. Changes in the appearance of the landscape. 	<ul style="list-style-type: none"> Residual visual effects (these would comply with landscape designation provisions). 	L1

8.3 Appropriate Assessment

Stage 2 Appropriate Assessment (AA) has been undertaken alongside preparation of the Plan. The requirement for AA is provided under the EU Habitats Directive (Directive 1992/43/EEC).

The conclusion of the AA is that the Plan will not affect the integrity of the European Sites, alone or in combination with other plans or projects.

The preparation of the Plan, SEA and AA has taken place concurrently and the findings of the AA have informed the SEA. Various content has been integrated into the Plan through the SEA and AA processes (see Section 9).

8.4 Interrelationship between Environmental Components

The SEA Directive requires the Environmental Report to include information on the likely significant effects on the environment, on issues such as biodiversity, fauna, flora, population, human health, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage, landscape and the interrelationship between the above factors.

Likely significant effects on environmental components that are identified include those that are interrelated; implementation of the Plan will not affect the interrelationships between these components. The presence of significant interrelationships between environmental components is identified on Table 8.4.

Table 8.4 Potential for Interrelationships between Environmental Components

Component	Biodiversity, flora and fauna	Population and human health	Soil	Water	Air and Climatic factors	Material assets	Cultural heritage	Landscape
Biodiversity, flora and fauna		No	Yes	Yes	Yes	Yes	No	Yes
Population and human health			Yes	Yes	Yes	Yes	No	Yes
Soil				Yes	Yes	Yes	No	No
Water					Yes	Yes	No	No
Air and Climatic factors						Yes	No	No

8.5 More Detailed Assessment of Plan Provisions

8.5.1 Focus, Vision and Key Objectives

	Likely to Improve status of SEOs	Potential Conflict with status of SEOs- likely to be mitigated	Probable Conflict with status of SEOs- unlikely to be mitigated	No Likely interaction with status of SEOs
<p>The focus of the Three Peninsulas Visitor Experience Development Plan (VEDP) is on strengthening the value of tourism to the local economy. The area's Destination Promise is:</p> <p><i>"A haven of absolute beauty and rest that draws you in from the moment you arrive - where you can discover kinship, sense empowerment, and absorb creative energy."</i></p> <p>The Plan's Vision is as follows:</p> <p><i>Extend the season, increase overnight visitation and visitor spend, and attract visitors to engage with the true essence and story of the peninsulas and islands of the Three Peninsulas of West Cork and Kerry without compromising the environment or culture of the region.</i></p> <p>The Key Objectives of the Plan are to develop compelling experiences for this stretch of the Wild Atlantic Way that will:</p> <ul style="list-style-type: none"> • Position the peninsulas as a 'must do' destination and motivate visitors to stay overnight and spend more; • Extend the length of the season; • Improve the overall economy of communities through strengthening individual businesses, creating new entrepreneurial opportunities sustaining and increasing job creation and increasing the attractiveness of the area for other forms of economic growth; • Align to the Wild Atlantic Way brand and target markets; • Support community values and aspirations, and strengthen community appreciation of local culture and intangible heritage; • Support sense of place enhancement; • Promote collaboration and partnership, support engagement of businesses, and build lasting links between national and regional partners, local agencies and associations, and local tourism experiences; and • Protect the natural heritage and special environmental character of the Region. 	<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p>	<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p>		
<p>SEA Commentary:</p> <p><i>The assessment of the Plan's overarching Focus, Vision and Key Objectives against Strategic Environmental Objectives (SEOs B1, B2, B3, PHH1, S1, W1, W2, W3, AC1, M1, M2, M3, CH1, CH2 and L1) is consistent with the:</i></p> <ul style="list-style-type: none"> • <i>Environmental effects detailed under subsections 8.2 to 8.4; and</i> • <i>Assessments of the selected alternatives for the Plan provided at Section 7 of this report.</i> <p><i>Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent. The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.</i></p> <p><i>The SEA process that has been undertaken alongside the preparation of the Plan has brought about various changes to the emerging Plan through an iterative process. These measures are reproduced under Section 9 "Mitigation Measures" of this SEA Environmental Report. By integrating all SEA recommendations into the Plan, Fáilte Ireland is helping to ensure that:</i></p> <ul style="list-style-type: none"> • <i>The potential significant adverse effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are avoided, reduced or offset; and</i> • <i>The beneficial environmental effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are maximised.</i> 				

These Plan provisions would contribute towards the promotion of new experiences – including those relating to land use activities and developments – and would be likely to contribute towards an increase in the number and dwell time of visitors and associated potential adverse effects. Such effects would include in-combination arising from services and infrastructure to service development, including tourism, which are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. New built developments and increases in the number and dwell time of visitors would continue to be planned for, mitigated and consented through the existing statutory planning and consent framework. The mitigation of potential adverse effects arising (see Table 8.3) would also be contributed towards by additional VEDP measures, including those relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services. Any amendment to the VEDP or integration of VEDP provisions into other Plans, Programmes etc. would have to be subject to Screening for SEA and AA processes and full assessments as relevant.

Sustainability and the environment have been integrated into various parts of the overarching Vision and Key Objectives, for example:

- Vision: “without compromising the environment or culture of the region”; and
- Key Objective: Protect the natural heritage and special environmental character of the Region.

8.5.2 Catalyst Projects

	Likely to Improve status of SEOs	Potential Conflict with status of SEOs-likely to be mitigated	Probable Conflict with status of SEOs-unlikely to be mitigated	No Likely interaction with status of SEOs
<p>The thirteen Catalyst Projects identified by the Plan as follows:</p> <ol style="list-style-type: none"> 1. Develop the concept of a Twilight Series of weekend evening food and cultural events within the region 2. Establish a year round venue for the West Cork Music Festival 3. Develop the proposed Bonane Heritage & Interpretation Centre 4. Restore the Boathouse on Innacullin / Garinish Island 5. Work towards including the Mizen Head Signal Station in the Great Lighthouses of Ireland tourism initiative. 6. Complete the restoration of Lonehart Battery on Bere Island 7. Progress the Schuill Harbour development 8. Develop and improve moorings at Castletownbere for leisure vessels 9. Implement the Beara Breifne Masterplan and develop connectivity between the between the Beara Way, Sheep’s Head Way and the Kerry Way 10. Support the development of O’Daly Bardic School project 11. Work toward opening the disused copper mine at Allihies for pre booked guided tours 12. Develop the two car aerial tramway system to Dursey Island, the visitor centre and related visitor facilities 13. Improve the tourism offering of Bantry through its ‘Destination Town’ designation 	<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p>	<p>B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1</p>		
<p>Note: for the above when proposals are progressed to feasibility stage consultation with relevant interested parties will take place.</p>				

SEA Commentary:

The assessment of the Plan’s Catalyst Projects against Strategic Environmental Objectives (SEOs B1, B2, B3, PHH1, S1, W1, W2, W3, AC1, M1, M2, M3, CH1, CH2 and L1) is consistent with the:

- *Environmental effects detailed under subsections 8.2 to 8.4; and*
- *Assessments of the selected alternatives for the Plan provided at Section 7 of this report.*

Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent. The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The SEA process that has been undertaken alongside the preparation of the Plan has brought about various changes to the emerging Plan through an iterative process. These measures are reproduced under Section 9 "Mitigation Measures" of this SEA Environmental Report. By integrating all SEA recommendations into the Plan, Fáilte Ireland is helping to ensure that:

- The potential significant adverse effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are avoided, reduced or offset; and
- The beneficial environmental effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are maximised.

These Plan provisions would contribute towards the promotion of new experiences – including those relating to land use activities and developments – and would be likely to contribute towards an increase in the number and dwell time of visitors and associated potential adverse effects. Such effects would include in-combination arising from services and infrastructure to service development, including tourism, which are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. New built developments and increases in the number and dwell time of visitors would continue to be planned for, mitigated and consented through the existing statutory planning and consent framework. The mitigation of potential adverse effects arising (see Table 8.3) would also be contributed towards by additional VEDP measures, including those relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services. Any amendment to the VEDP or integration of VEDP provisions into other Plans, Programmes etc. would have to be subject to Screening for SEA and AA processes and full assessments as relevant.

8.5.3 Action Plan

All of the actions identified by the Plan are aligned to two Themes:

- **Cultural Fusion** (with Hero Themes of Flavours of Fusion, Artistic Encounters and Celestial Sanctuary); and
- **Vibrant Resilience** (with Hero Themes of Harmonious Confrontation, Kith Kin and Clan and Marginal Livelihoods).

For each action, a timeframe for implementation is indicated: short-term, medium-term and long-term. Leads and Partners for each action are also identified, comprising:

- | | |
|--|--|
| • AT An Teagasc | • ITOA Irish Tour Operators Association |
| • BBPC Bantry Bay Port Company Bantry Harbour Board | • KCC Kerry County Council |

Cultural Fusion				Likely to Improve status of SEOs	Potential Conflict with status of SEOs- likely to be mitigated	Probable Conflict with status of SEOs- unlikely to be mitigated	No Likely interaction with status of SEOs
1.1	EXPERIENCE: The Twilight Series – develop the concept of a series of Friday evening food and cultural events held in turn in Kenmare, Bantry, Glengarriff and Ballydehob (concept can be hosted in additional settings). These are evening markets that are designed to be primarily about local foods and flavours, together with tasting events. While the focus is on raising awareness of the culinary culture of Three Peninsulas – West Cork & Kerry, these events also provide an opportunity to profile local arts, craft, music and performance. (CATALYST Project).	Long-Term	Taste Kerry, Taste Cork,	FI, KCC, CCC, WCLD, SKDP, LEOs, LEs, LCs, IFA, LTGs	B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1	B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1	
1.2	EXPERIENCE: Meet the Makers – work with culinary experts to develop and market bespoke tours to experience the kitchens and dairies of artisan food producers and learn the traditions associated with wild ingredients such as elderflowers and how to make local dishes. These tours should be packaged with distinctive accommodation facilities, such as a country boutique guest house and have the potential to be aimed at a high-value market segment.	Medium-Term	LEs, Taste Kerry, Taste Cork	FI, KCC, CCC, WCLD, SKDP, LEOs, LTGs, IFA, LES			
1.3	EXPERIENCE: Soup for the Soul – develop a three day cooking adventure to be hosted in autumn or winter. This experience is designed to give visitors the opportunity to go foraging in these months and then learn how to use these local ingredients to cook a range of eclectic soups and wholesome organic breads with local owners and chef.	Short-Term	LEs, Taste Cork	FI, CCC, LTG, WCLD			
1.4	Work with food entrepreneurs to identify other ways of combining different types of experiences with the core food component, such as assisting with establishing exclusive shop openings, particularly out of season.	Short-Term	Taste Cork Taste Kerry	FI, CCC, LTG WCLD, SKDP, LEs, IFA			
1.5	Strengthen the integration of food producers and food service operators through developing ways of networking and knowledge sharing between the two sectors.	Short-Term	Taste Kerry, Taste Cork	FI, KCC, CCC, WCLD, SKDP, LEs, IFA, LEOs			
1.6	Explore the opportunity to develop covered/indoor all-weather food and craft market places for Kenmare and Bantry to increase the destination value of these attractions, appeal to the target markets and enable the South West to benefit from the growing sophistication of markets. <ul style="list-style-type: none"> Review the transferability of the work undertaken by Kenmare Marketing & Events Group to improve the overall market experience and determine what practices can be used throughout the region. Support the introduction of a cooperative stall for local producers and artisans unable to attend in person. 	Long Term	Taste Kerry, Taste Cork	KCC, CCC, LEOs, SKDP, WCLD, LEs			
1.7	Explore the opportunity to develop further food incubation units within Three Peninsulas – West Cork & Kerry . (See Taste Cork 2021 Food Support Strategy for Cork).	Medium-Term	KETB CCC	KCC, CCC, LEOs, SKDP, WCLD, LEs			

2.1	EXPERIENCE: The West Cork Music Festival - initiatives that support the profile of this festival and its extension throughout the year will strengthen its iconic status within Three Peninsulas – West Cork & Kerry . • This will include strengthening the cultural and economic impact of the West Cork Music Festival and related festivals through establishing a year-round venue for West Cork Music. (CATALYST Project).	Short-Term / Medium-Term	WCCMF, Bantry House	FI, CCC, WCLD, LEs, LTGs				
2.2	EXPERIENCE: Bring Your Own Story to Life – work with a water-based activity operator to develop a proposed kayaking experience in Kenmare Bay designed to reconnect visitors to the magic and creativity of their childhood.	Short-Term	LE, FI	LTG, KCC, SKDP, LEOs				
2.3	EXPERIENCE: Explore Art from Past to Present - work with local artists and craft artisans and academics/experts to develop a multi-day itinerary that looks at art and crafts, and the contribution of art to the cultural heritage and identity of the region from pre-historic rock art through to traditional arts and crafts such as stone carving.	Short-Term	LEs, LTGs	FI, UCC, WCLD, SKDP, LEOs, KCC, CCC				
2.4	EXPERIENCE: Treasures on the Beach - work with local artists at Kilcrohane to develop an experience that involves foraging on the beach for ‘raw’ materials, hearing the local stories, and working with an artist to develop new art work. Work with local partners and potential ‘hosts’ to include food and accommodation. This could be based on a ‘home-stay’ model.	Short-Term	LTGs, LEs	FI, KCC, CCC, WCLD				
2.5	EXPERIENCE: Capturing Shifting Lights – work with professional artists and photographers to develop a week long experience learning how to capture the dynamic qualities of light in different areas within Three Peninsulas – West Cork & Kerry . Package the experience with accommodation in at least two areas within the Three Peninsulas – locations designed to maximise the quality of the light on the landscape. This experience will likely need a transportation component depending on how much travel is involved between sites. Combine with local food experiences.	Short-Term / Medium-Term	LEs, LTGs	FI, KCC, CCC, WCLD, SKDP				
2.6	Cruise tourism • Continue to identify ways of animating all locations where cruise ships docks on the days that cruise ships are expected to dock, including Bantry town centre and the cruise terminal area, Glengarriff and Bere Island. • Work with partners to address the opportunity to build a series of short 2 to 4-hour itineraries for cruise ship visitors that wish to explore Three Peninsulas – West Cork & Kerry . The form of transportation and the nature of the experience should reflect the aspirations of local stakeholders – working with a fleet of smaller vehicles is likely to be necessary in locations such as the Sheep’s Head.	Short-Term	BBPC, BDTA, , BBPC, BCC, LTGs	FI, CCC, LEs, LC, BHAS, BPG, WCLD CCC, FI, OPW/DCHG, BCC				
2.7	Build on the success of festival-related workshops (e.g. The West Cork Chamber Music Festival) and increase opportunities for workshops out of peak-season that will offer an artistic learning experience within a cultural setting that is inclusive of the local food and stories. For example, explore the feasibility of developing additional workshops in stone carving outside of the recently developed West Cork Stone Symposium.	Medium-Term	CCC, LTGs	LCs, LEs, ETBs, OPW/DCHG, WCLD, SKDP				
2.8	Support the ongoing development of the Fastnet Film Festival in Schull.	Medium-Term	LCs	FI, CCC				

3.1	<p>EXPERIENCE: Bonane Heritage Park – continue with the plans to develop the Heritage and Interpretation Centre to enhance the visitor experience and benefit the local community. (CATALYST Project).</p> <p>This initiative also includes:</p> <ul style="list-style-type: none"> Collecting stories and recording oral history from elders in the community; Improving signage to the Park. 	Medium-Term	Bonane Heritage Park	SKDP, KCC, FI, KMEG, LC, LEs				
3.2	<p>EXPERIENCE: The Art of Prehistoric Meditation – a guided activity that involves bringing together guides with specific skills and experience in hiking higher elevations, wellness therapies and mindfulness, and a knowledge of local mythology.</p>	Medium-Term	Local Community / local guides	KMEG, LEs, LC, SKDP, Bonane Heritage Park, FI				
3.3	<p>EXPERIENCE: Escape Treasure Hunts & Fantasy Island Adventures – a new proposed concept for Garinish Island aimed at Millennial Social Energisers. This will involve creating and promoting the event, working with partners to provide the food hampers. The event should be packaged with accommodation and evening entertainment in Glengarriff.</p>	Short-Term	LTG	FI, CCC, WCICC, LTG, Les, OPW/DCHG				
3.4	<p>EXPERIENCE: Revealing the Dark Skies – the region is exceptionally rich in opportunity to reveal the connections with the past and to explore the celestial realm across the region.</p> <ul style="list-style-type: none"> Pursue International Dark Sky Community certification through the International Dark Sky Association for Bere Island and the Sheen Valley. Use mobile equipment to create a series of night sky events across the entire region in distinctive settings such as Lonehart Battery and Bonane Heritage Centre. Develop a guest speaker programme that looks at astronomy through the ages. Package Dark Skies experiences with accommodation. 	Short-Term / Medium-Term	Bere Island Project Group, Bonane Heritage Park	SKDP, WCLD, CCC, KCC, LTGs				
3.5	<p>EXPERIENCE: Acapella Notes at Sea – work with activity operators to create a unique evening acapella kayaking event on Kenmare Bay.</p>	Short / Medium Term	LEs	KCC, SKDP, KMEG, LEO				
3.6	<p>Glengarriff Nature Reserve and area – support the NPWS in exploring opportunities to expand the designated area. A more extensive land area could be considered for National Park status and would raise the profile of the oak woodlands, the Glengarriff River and the wet heathlands, along with its cultural significance as the site of the historic Prince of Wales Route from Glengarriff to Kenmare.</p> <ul style="list-style-type: none"> Work with Coillte to change the adjacent conifer plantations from an economic resource to a visitor usage resource as per recent changes in policy. Work with OPW to assess potential of including lands in the Shrone townland within the National Park, including considering the development of a safe route from Glengarriff to the Nature Reserve. Work with Cork County Council to assess similar potential of including the Blue Pool Amenity area. 	Medium-term	NPWS	OPW/DCHG, FI, CCC				
3.7	<p>Ilnacullin / Garinish Island – improve the orientation, interpretation and overall experience through the restoration of the Boathouse. (CATALYST Project).</p> <p>In addition, while the primary objective remains the conservation of Bryce House and the gardens of Ilnacullin and the preservation of its peace and tranquillity, there is scope to strengthen the visitor experience through the following initiatives:</p> <ul style="list-style-type: none"> Expanding the number of small-scale appropriate events, such as music recitals, particularly outside the peak season, and creating new shoulder season activities such as hosting a horticultural symposium or facilitating a field studies element for relevant academic programmes in horticultural and arboriculture, or architectural studies; Creating a stronger boat experience that would further orient the visitor to the island experience, the underlying story, and the local marine ecology; Developing online booking for Bryce House; Ongoing site restoration such as the Italian Garden and the Walled Kitchen Garden. 	Short-Term / Medium-Term	OPW	DCHG, FI, CCC, WCLD				

3.9	<p>Prehistoric sites – there is a need to develop resources to assist land owners with the management and preservation of the many prehistoric sites that are in private ownership. Consider developing a manual that looks at the following:</p> <ul style="list-style-type: none"> • Creating awareness of the significance of sites; • Mapping and recording sites; • Simple measures that can help protect and improve the condition of monuments, including appropriate farming practices, managing erosion, and managing invasive species; • Opportunities to improve access to visitors and meeting the needs of visitors through access, parking, interpretation, and related services; • Responsible development. 	Long-Term	National Monuments Service /DCHG, local land owners	FI, KCC, CCC, OPW, NPWS, DoAFM, DTTAS, IFA, AT				
-----	--	-----------	---	--	--	--	--	--

Commentary:

The assessment of the Plan's provisions for the Cultural Fusion Theme against Strategic Environmental Objectives (SEOs B1, B2, B3, PHH1, S1, W1, W2, W3, AC1, M1, M2, M3, CH1, CH2 and L1) is consistent with the:

- Environmental effects detailed under subsections 8.2 to 8.4; and
- Assessments of the selected alternatives for the Plan provided at Section 7 of this report.

Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent. The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The SEA process that has been undertaken alongside the preparation of the Plan has brought about various changes to the emerging Plan through an iterative process. These measures are reproduced under Section 9 "Mitigation Measures" of this SEA Environmental Report. By integrating all SEA recommendations into the Plan, Fáilte Ireland is helping to ensure that:

- The potential significant adverse effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are avoided, reduced or offset; and
- The beneficial environmental effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are maximised.

These Plan provisions would contribute towards the promotion of new experiences – including those relating to land use activities and developments – and would be likely to contribute towards an increase in the number and dwell time of visitors and associated potential adverse effects. Such effects would include in-combination arising from services and infrastructure to service development, including tourism, which are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. New built developments and increases in the number and dwell time of visitors would continue to be planned for, mitigated and consented through the existing statutory planning and consent framework. The mitigation of potential adverse effects arising (see Table 8.3) would also be contributed towards by additional VEDP measures, including those relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services. Any amendment to the VEDP or integration of VEDP provisions into other Plans, Programmes etc. would have to be subject to Screening for SEA and AA processes and full assessments as relevant.

Sustainability and the environment have been integrated into various provisions for the Cultural Fusion Theme including those relating to seasonality (for example Action 1.4), regionality (for example Action 3.4) and visitor management (for example Action 3.9).

Vibrant Resilience				Likely to Improve status of SEOs	Potential Conflict with status of SEOs- likely to be mitigated	Probable Conflict with status of SEOs- unlikely to be mitigated	No Likely interaction with status of SEOs
4.1	<p>EXPERIENCE: Beara Peninsula Bridle-Way – the trail is the only long-distance bridle-trail in Ireland. To create a marketable experience, this phase will need to continue looking at developing and promoting the supporting services.</p> <ul style="list-style-type: none"> Map the route showing the full range of services; Work with local farmers to develop paddocks/horse compounds for overnight stops; Work with the local planning offices to identify new and alternative forms of accommodation, including suitable customised camping facilities by the bridle-way – accommodation in close proximity to the trail is critical to its success; Develop user guidelines – best practices for minimal impact, pre-ride checklists, and ride etiquette; Consider organising a ‘gathering event’ to launch the trails and maintain this ‘rendez-vous’ event on an annual basis – could be organised by the British Horse Society (Comparable – BC Backcountry Horsemen). Continue to develop www.bearabridleway.com as a trip planning tool. 	Short-Term / Medium-Term	BT	CCC, FI, WCLD, LTGs, LEs, LCs, IFA, AT, NTO, NPWS, VSCG, WCDP, British Horse Society	B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1	B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1	
4.2	<p>EXPERIENCE: Bere Island Military Festival – a new festival to profile and celebrate the unique social history of military ‘occupation’ and life in the Treaty Port. Work with an event planner to re-create the weekly dance in a new annual event. Include a dance lesson component and opportunity to wear costume to increase the level of engagement. The event has the potential to be staged with a gala dinner featuring the exotic fruit and vegetables of the time. This event is likely to attract the island’s diaspora and will need to be packaged with a range of accommodation, including the opportunity for homestays.</p>	Short-Term	BIPG, WCICC	CCC, FI, LTGs, LEs			
4.3	<p>EXPERIENCE: Whiddy Island to Bere Island Blueway Heritage Trail – a guided water-based touring activity via Adrigole that promotes the story of the shared military heritage.</p> <ul style="list-style-type: none"> Work within the framework of the new Blueway Initiative towards exploring the potential of developing a Blueway route from Whiddy Island to Bere Island. Identify and map safe points to embark or disembark, together with a range of services, such as suitable accommodation. Review availability of rental services and address any gaps. Identify and promote eligible water-based activity guides and operators. 	Medium-Term	CCC, BBPC, WCICC	FI, DoAFM, Castletownbere Harbour Company, BIPG, LTGs, LEs, LCs			
4.4	<p>EXPERIENCE: Discovering the Forgotten Secrets of Islands – expand the existing ‘treasure hunt’ geo-cache activity that is offered on Whiddy Island on a request basis, and develop a bookable experience that includes other islands. These treasure hunts can highlight the shared military and social history of the islands, and should be packaged with additional services, including accommodation, local food, and local transport. The concept can be developed using a digital app that provides the clues and challenges, which will assist in the maintenance of the experience. (Comparable – see www.treasuretrails.co.uk).</p>	Short-Term / Medium-Term	WCICC, LTGs, LEs, LCs	LLTC, CCC, WCLD, IFA, NTO, VSCG			

4.5	<p>EXPERIENCE: Experience Mizen from the Sea – develop a bookable experience (on an existing concept) that incorporates a customised tour of the Mizen Head Signal Station, an introduction to the headland’s ecosystems and cultural heritage, and a whale and dolphin watching trip with a marine expert that also includes the chance to see Fastnet Lighthouse.</p> <p>To differentiate this tour from the shorter existing trips, it should target wildlife enthusiasts and photographers, and offer the opportunity to experience more of the wilds of the Mizen coastline. It should also highlight its ethical values. Package this two-day experience with accommodation, a strong culinary component and an evening entertainment activity that reflects local culture.</p>	Short-Term	Mizen Head Visitor Experience LEs, LTGs	CCC, WCLD, FI, VSCG, ILC				
4.6	<p>Mizen Head Signal Station – work with the Mizen Centre to bring the lighthouse into the Great Lighthouses of Ireland tourism initiative. (CATALYST Project).</p> <ul style="list-style-type: none"> • Leverage the programme to strengthen the visitor experience with value-add activities similar to 4.5. • Explore opportunities to enhance the interpretive exhibits at the Centre to strengthen its profile as a key Signature Discovery Point. 	Short-Term	Mizen Head Visitor Experience	Commissioners of Irish Lights, Mizen Tourism Cooperative, FI, CCC				
4.7	<p>Bere Island – complete the restoration of Lonehart Battery, including sand-blasting of the guns and expansion of the parade area to enlarge the space available for activities to position the island as a key destination for military heritage and enhance the site as a significant visitor attraction. (CATALYST Project)</p> <p>In addition to this infrastructural project and the Military Festival, work on a range of complementary projects:</p> <ul style="list-style-type: none"> • Support the current initiative on developing the island’s oral history through the community radio programme and expand the efforts to Whiddy Island. Continue to document related military stories; • Build linkages with related aspects of military heritage for the Cultural Explorer and enthusiast, including cross-selling with Spike Island in promoting the story of Bere Island as an internment camp, and the National Museum of Ireland which now displays the French longboat formerly washed up on Bere Island. 	Short-Term / Medium-Term	BIPG, WCICC	CCC, FI, WCLD, LEs, LC, Irish Defence Forces, OPW/DCHG, NPWS, UCC, DoAFM, National Museum of Ireland				
4.8	<p>Kenmare – Develop the recently bequeathed Peninsula lands as outlined in the masterplan for the lands, and use the opportunity to highlight Kenmare’s association with the coast.</p> <ul style="list-style-type: none"> • Create walks and cycle ways and connectivity with Reenagross, expanding the route ways to 8km, while maintaining the area as a green recreational space. • Enhance the location and facilities for water based activities. • Strengthen the positioning of Kenmare as a staging area for cycling in the Sheen Valley Heritage Area. 	Short-Term / Medium-Term	KCC	KMEG, SKDP, LEs, LC, DoAFM, FI				
4.9	<p>Bantry – develop a stronger focus on the story of Wolfe Tone – particularly when cruise ships are in port, through animation.</p>	Short-Term	BDTA, BHAS	BBPC, BCC, BPG, CCC, HC, WCDP, WCLD				

	<p>Water-based Outdoor Adventure and Related Pursuits of Challenge – the peninsulas have well-defined strengths as a destination for water-based outdoor adventure and should continue to build on these strengths. A more detailed assessment of opportunities should be undertaken across the three peninsulas and islands, in addition to moving forward with the following initiatives.</p>	Ongoing	KCC, Dept. of the Marine, BBPC, LCs	Community organisations, FI, CCC, DoAFM, WCLD, SKDP, WCDP,				
4.10	<p>a) Schull Harbour development (CATALYST Project). To include:</p> <ul style="list-style-type: none"> • Redevelopment of Schull Harbour to include upgrading of the existing pier; • Reclamation works and the construction of a 225-berth Marina; • The installation of pontoons; • Associated onshore facilities including Visitor/Education/Interpretive Centre. <p>b) Bantry Harbour – confirm a viable location and create a Marine Activities Centre to include:</p> <ul style="list-style-type: none"> • A slipway for launching and recovering dinghies; • A pontoon for launching coastal rowing boats; • Hardstand for storage of boats, access space, parking and ancillary activities; • Shared accessible building facilities. 	Short / Medium Term	Dept of Marine, LC	NPWS, NRA, ISA, PADI, NTO, VSCG, IFA, LTGs,				
	<p>c) Castletownbere Harbour – improve or develop new pier and leisure craft facilities with 40-80 berths to enhance its status within the new European Cool Route (described as the World’s Most Adventurous Cruising Route) and to allow for a general increase in leisure vessels stopping over. (CATALYST Project).</p>	Medium / Long Term	Dept of Marine, LC BBPC					
	<p>e) Bere Island – improve accessibility and increase the appeal of the island to visitors arriving by boat through extending the marina and developing pier facilities including pontoons and facilities for wheel chair access.</p>	Short / Medium Term	Dept of Marine, LC					
	<p>f) Assess and improve community-based infrastructure for water-based outdoor activities across the three peninsulas and islands, including:</p> <ul style="list-style-type: none"> • Enhancing the diving centre at Kilmackilloge and water sports facilities on Bere Island; • Develop pontoons and/or marina improvements at Adrigole, Glengarriff, Goleen and Kilmackilloge to improve boating opportunities. 	Short / Medium Term	Dept of Marine, LCs					
4.11	<p>Beara Brefine Way – Implement the outputs of the Beara Brefine Master Plan and work towards developing connectivity between the Beara Way and the Kerry Way, and between Sheep’s Head Way and the Beara Way through Glengarriff to develop a Camino type offering for the South West region. The use of technological enhancements becomes increasingly important as the trail expands in its ‘stature’ – to facilitate booking, story-telling, the identification of risk, etc. (CATALYST Project). (See also Experience 5.2)</p>	Ongoing	FI, Beara Brefine Way project group, CCC, KCC	DoAFM, LEADER, WCLD, SKDP, WCDP, NPWS, NRA, ISA, PADI, NTO, VSCG, IFA, LTGs, LCs,				
4.12	<p>Continuing to improve walking and cycling infrastructure, including a focus on safety issues, through:</p> <ul style="list-style-type: none"> • Enhancing all Way Marked Ways to become an international renowned walking destination and providing the tools to integrate all local visitor themes; • Installing gradient cycle signage on Healy Pass; • Assessing the region’s accommodation base against cycle-friendly criteria – identifying facilities that offer safe storage facilities, a drying room, repair facilities, packed lunches etc.; • Ongoing assessment of support businesses, such as cycle hire services; • Ongoing development of community cycling and hiking trails – e.g. Fastnet Trails, trails in Lauragh. 	Ongoing	FI, CCC, KCC	DoAFM, LEADER, WCLD, SKDP, WCDP, NPWS, NRA, ISA, PADI, NTO, VSCG, IFA, LTGs, LCs,				

5.1	<p>EXPERIENCE: The O'Daly Bardic School – support the initiative as identified in the 2019 Feasibility Study (Creating a Sustainable Tourism Offering in Kilcrohane) to celebrate the creative legacies of a medieval hereditary profession. (CATALYST Project).</p> <p>In working towards creating a HERO experience, the following activities need to be progressed:</p> <ul style="list-style-type: none"> • The inventory of archaeological sites; • The identification of sensitive sites and related management implications and opportunities; • The collection of stories related to the sites of interest – e.g. the links with local chieftains right back to the legends of Fionn macCumhaill, the drowning of King of Spain's sons who attended the school; • Ongoing explorations of the options of developing a visitor interpretive centre for the Bardic School experience and the use of new technologies to present the story and enhance the experience; • Complementary Dark Skies experiences. 	Short-Term / Medium-Term	Muintir Bháire Community Council	FI, CCC, NPWS, OPW/DCHG, HC, WCLD, LTGs, LEs, LCs				
5.2	<p>EXPERIENCE: From Béarra to Bréifne: Recreating the Epic March of O'Sullivan Beare – develop an animated and guided hiking experience event that presents the stories of the events of 1603 along the 480 km hike. Package the event with accommodation or camping options and ensure a forwarding luggage service is in place for the event.</p>	Medium-Term	Beara Breifne Way Committee	LCs, FI, CCC, WCLD, HC, LTGs, LEs, IFA				
5.3	<p>EXPERIENCE: Mystery and Murder in Bantry House – work with Bantry house and a theatrical company to develop a series of 'Mystery and Murder' dinner events. The mystery could be played out over the weekend and allow for the development of a one or two night stay in Bantry or at Bantry House.</p>	Short-Term	Bantry House	FI, BDTA				
5.4	<p>EXPERIENCE: A Day with the Men's Shed – continue to work with the men from the Durrus Men's Shed to develop and promote an experience that is an authentic opportunity to experience village life from a unique perspective. Invite a travel blogger to participate in the experience and consider the option of developing a longer-term blog on the series of events.</p> <ul style="list-style-type: none"> • Support the community group in developing the waterside trail. 	Short-Term	Durrus Men's Shed	WCLD, FI, CCC, LTGs, LEs, LCs				
5.5	<p>EXPERIENCE: An Alternative Perspective on Creating Legacies – develop an experience that highlights the stories of key women from Three Peninsulas – West Cork & Kerry – and how they shaped history and what we see today – such as Bantry House or Bryce House, or the story of Ellen Hutchins. Develop a range of activities that complement the stories, such as a focus on gardens or art and tapestries. Add value to the experience through a focus on local foods and boutique accommodation.</p>	Short / Medium-Term	Local community, DCHG,	FI, CCC, HC, Bantry House, NPWS				
5.6	<p>Medieval Castles – undertake an assessment of castle sites with a focus on reviewing access, preservation, signage and opportunities to expand existing experiences. Recommendations will vary in scope depending on ownership and location. Examples that need to be assessed as a priority include the ruins of Ardea Castle, near Tuosist, Dunboy Castle.</p>	Long-Term	DCHG	NPWS, FI, HC, IFA, LCs, WCLD, OPW				
5.7	<p>Whiddy Island – develop facilities that can act as a repository for local historical information and artefacts, and support the development of new accommodation options. This will play a significant role in increasing visitation to the island and visitor spend.</p>	Short-Medium-Term	West Cork Islands Interagency Group	LCs, LEs, WCLD, CCC, FI, LTGs, WCDP				

6.1	<p>EXPERIENCE: Dursey Island – accessing the island by cable car across the sea is a unique experience in western Europe and its potential to generate increased visitation has been recognised by the current plans to construct a two-car aerial tramway system and to build a Visitor Centre at the departure point on the mainland and waiting shelter/toilet facility on the Island. Cork County Council is in receipt of an initial grant from Fáilte Ireland to work on the design and cost elements, and on securing all necessary statutory consents prior to submitting application for further ‘Large Tourism Project’ funding. (CATALYST Project).</p> <ul style="list-style-type: none"> • Continue to support the work of CCC in preparing the application for further capital investment. • Develop a programme of proposed experiences illustrating marginal livelihoods and resilience. • Work with property owners to identify ways of increasing capacity for overnight visitation. 	Short-Term / Medium-Term	CCC, WCICC	FI, OPW/DCHG, NPWS, LTGs, LEs, LCs				
6.2	<p>EXPERIENCE: Be a Farmer on the Edge of Europe – work with local farmers to assess the potential to develop an experience that is farm-based and could potentially be paired with homestay accommodation. Combine a farm-focused activity with other experiences that highlight aspects of local culture, such as bread-making, story-telling or traditional music and high nature value farming.</p> <ul style="list-style-type: none"> • Identify farms that are adjacent to long distance trails where new experiences would add value to the trail experience and would offer accommodation options. • Establish a mentorship/advisory program for the Three Peninsulas that complements the existing rural development and farm diversification programmes run by the Department of Agriculture, Food, and the Marine. Highlight the services available through www.opt-in.ie including the <i>Rural Tourism Manual</i>. • Support farmers through assisting with discussions on planning regulations and financing options, and work with local planners and financial institutions to ensure that there is the necessary understanding of the opportunity. 	Short-Term / Medium-Term	IFA, LEs	FI, SKDP, WCLD, An Teagasc, LCs, LTGs, DoAFM				
6.3	<p>EXPERIENCE: Following Miners’ Footsteps Through the Ages – the various elements of the mining story are in place, including Allihies Copper Mine Museum, but the overall experience is not yet sufficiently compelling as a demand generator. Increasing the level of guided interpretation and storytelling, working to pull the regional story together particularly the Bronze Age components, and pursuing funding to open the Mountain Mine to pre-booked guided tours (initially) will provide the basis for a stronger visitor experience. (CATALYST Project).</p> <ul style="list-style-type: none"> • Continue to work toward opening the Mountain Mine • Cross-promote with the Copper Coast Geopark in Co. Waterford. • Develop a stronger academic interest in the Bronze Age mining of the region. • Explore opportunities to tie in the experience with an artistic component – looking at the use of copper in art and craft. 	Long-Term	FI, CCC, Allihies Copper Mine Museum	LTGs, LEs, CCC, WCLD, OPW/DCHG, HC, ITOA				
6.4	<p>EXPERIENCE: Coastal Fishing Adventure – with over 50 species of sea fish and spectacular scenery, there is the potential to build a world-class experience in a responsible and sustainable manner alongside commercial fishing. The current experience does not stand out in any way, and is disjointed, leaving the visitor to put the component parts together.</p> <ul style="list-style-type: none"> • Review resort developments in comparable destinations, such as British Columbia. • Work with economic development agencies to develop a tourism investment attraction strategy for this niche sector, that could include the development of an exclusive fishing resort offering. • Raise the profile of current coastal fishing through enhanced web presence – review FishingBC.com as an example of consolidating the offer and increasing market awareness. 	Medium Term	Irish Maritime Admin (DTTAS), (DCCAEIF)	CCC, KCC, Sea Angling Ireland, LEs, LTGs, FI				
6.5	<p>Fresh Water Fishing – improve visibility of and access to freshwater fishing opportunities for international visitors. Work with local accommodation venues to develop additional ‘catch and cook’ options for overnight anglers.</p> <ul style="list-style-type: none"> • Assess potential on rivers such as the Sheen and the Roughy. 	Short-Term / Medium-Term	IFI, Leader Companies	FI, LTGs, LEs, Local Inshore Fisherman / Sea Angling Boatman CCC, KCC				

Commentary:

The assessment of the Plan's provisions for the Vibrant Resilience Theme against Strategic Environmental Objectives (SEOs B1, B2, B3, PHH1, S1, W1, W2, W3, AC1, M1, M2, M3, CH1, CH2 and L1) is consistent with the:

- *Environmental effects detailed under subsections 8.2 to 8.4; and*
- *Assessments of the selected alternatives for the Plan provided at Section 7 of this report.*

Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent. The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The SEA process that has been undertaken alongside the preparation of the Plan has brought about various changes to the emerging Plan through an iterative process. These measures are reproduced under Section 9 "Mitigation Measures" of this SEA Environmental Report. By integrating all SEA recommendations into the Plan, Fáilte Ireland is helping to ensure that:

- *The potential significant adverse effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are avoided, reduced or offset; and*
- *The beneficial environmental effects of implementing the Plan, in combination with implementation of other provisions from the Plan and other plans, programmes, etc., are maximised.*

These Plan provisions would contribute towards the promotion of new experiences – including those relating to land use activities and developments – and would be likely to contribute towards an increase in the number and dwell time of visitors and associated potential adverse effects. Such effects would include in-combination arising from services and infrastructure to service development, including tourism, which are planned for and consented through the statutory framework including the NPF, RSES and lower-tier land use plans. Examples may include developments/operation of developments relating to water services, transport, access or accommodation. New built developments and increases in the number and dwell time of visitors would continue to be planned for, mitigated and consented through the existing statutory planning and consent framework. The mitigation of potential adverse effects arising (see Table 8.3) would also be contributed towards by additional VEDP measures, including those relating to infrastructure capacity, visitor management and green infrastructure and ecosystem services. Any amendment to the VEDP or integration of VEDP provisions into other Plans, Programmes etc. would have to be subject to Screening for SEA and AA processes and full assessments as relevant.

Sustainability and the environment have been integrated into various provisions for the Vibrant Resilience Theme including those relating to regionality (for example Action 4.10) and visitor management (for example Action 4.1).

8.5.4 Enablers of Success

The Plan identifies a series of actions for **Enablers of Success** relating to:

1. Governance
2. Destination Development
3. Improving Access to and within the Region
4. Strengthening Supporting Infrastructure
5. Building Capacity and Awareness
6. Enhancing Visitor Awareness of Hero Experiences in the Three Peninsulas
7. Animating the Destination
8. Environmental Enhancement

				Likely to Improve status of SEOs	Potential Conflict with status of SEOs-likely to be mitigated	Probable Conflict with status of SEOs-unlikely to be mitigated	No Likely interaction with status of SEOs	
ENABLER 1: Governance				Timeframe	Lead	Partner	B1 B2 B3 PHH1 S1 W1 W2 W3 AC1 M1 M2 M3 CH1 CH2 L1	
E.1.1	<p>Formation of an Implementation Group with representatives from all the key agencies to identify the ideal model to resource and implement the actions in Three Peninsulas – West Cork & Kerry Visitor Experience Development Plan. Getting this group or committee in place will be important to ensure a strategic and cohesive approach to implementation and to address the current challenges arising from the large number of agencies and organisations currently involved in the delivery of tourism.</p> <ul style="list-style-type: none"> Set up an inclusive stakeholder implementation group with independent co-chairs (tourism business owners: accommodation provider and attraction/activity provider): <ul style="list-style-type: none"> Develop a 5-year implementation plan and prioritise actions around the key levers identified to unlock growth; Clearly identify ownership of actions, timelines and outputs across all stakeholders; Identify KPI's with delivery dates. 	Short-Term / Ongoing	FI	KCC, CCC, SKDP, WCDP, WCLD, LEO,ETBs, LTC, IHF, LC				
ENABLER 2: Destination Development				Timeframe	Lead	Partner		
E.2.1	<p>Expanding air access – continue to work together to improve air access into the South West including activities related to:</p> <ul style="list-style-type: none"> Seeking to secure new route development into Kerry and Cork Airports – particularly new routes from Ireland's major Continental markets –Germany, France, Italy and Benelux countries; Encourage greater strategic co-operation between Kerry, Cork and Shannon Airports; Work with partners to see an extension of seasonal North American flights into Ireland. 	Ongoing	Kerry & Cork Airports, KCC, CCC,	FI, Tourism Ireland, DTTAS, County Convention Bureaus, LTGs				
ENABLER 3: Improving Access to and within the Region				Timeframe	Lead	Partner		
E.3.1	<p>Developing an integrated transport system – an important factor in moving visitors within the region, particularly with an expanding focus on long-distance trails. The following tourism actions support this requirement:</p> <ul style="list-style-type: none"> CCC will develop an integrated transport system that leverages local transport networks to seamlessly disperse visitors throughout the County through reviewing current transport systems and identifying where there are gaps in the service for visitors; and creating solutions where feasible to fill these gaps. (Plan 4 Action 4); Develop and pilot a water based transport strategy in the South West – grow water based visitor transportation. (South West Action Plan for Jobs). <p>Kerry County Council has identified a range of actions relating to promoting national strategic investment for appropriate road improvements on the Wild Atlantic Way coastal touring route; devising a traffic management plan for Kenmare; improving facilities for motor homes and camper vans; provide e-charging for electric vehicles, freshwater supply and waste water disposal for campervans in suitable locations in towns and villages along the Wild Atlantic Way and major tourism centres; and, carrying out an audit of tourist signposting and erecting new signage for car parks, historic sites, attractions and activity centres where required.</p>	Ongoing	CIE, Bus Éireann, Local Link,	KCC, CCC, DTTAS, DoAFM, DRCD, FI, LLTC, WCICC, BBPC,SKDP, WCDP, WCLD, LEs				

E.3.2	Work with local authorities and Department of Transport, Tourism and Sport to determine a way of marking the region's 'L roads' on printed maps.	Short-Term	DTTAS, KCC, CCC	CCC				
E.3.3	Encourage the creation of conditions that will promote investment in developing diverse categories of bed stock in the accommodation sector, while also encouraging new levels of innovation in accommodation delivery e.g. glamping.	Ongoing	CCC, KCC	FI				
E.3.4	Work with the mains town in the VEDP area that are considered as 'destination towns' to enhance appeal through an assessment of products, services, activities and experiences as outlined in Fáilte Ireland's <i>Development Guidelines for Tourism Destination Towns</i> (2019), particularly Bantry and Kenmare.	Ongoing	CCC, KCC	FI				
ENABLER 4: Strengthening Supporting Infrastructure		Timeframe	Lead	Partner				
E.4.1	Accommodation Stock Innovation – assess options to diversify the accommodation base and offering in West Cork / Kenmare Three Peninsulas on the Dingle Peninsula. Encourage the creation of conditions that will promote the creation of diverse categories of bed stock in the accommodation sector while also encouraging new levels of innovation in accommodation delivery e.g. glamping, eco tents, etc.	Short-Term	KCC, CCC,	FI				
ENABLER 5: Building Capacity and Collaboration		Timeframe	Lead	Partner				
E.5.1	Create a "Bespoke Business Support Programme" for Three Peninsulas – West Cork & Kerry area as the basis for industry training and mentoring, with a focus on developing new and innovative visitor experiences and adopting the VEDP as a basis for commercial development. Areas for focus are: <ul style="list-style-type: none"> Understanding the stories and themes of the VEDP; Creating saleable experiences; Telling 'your story' online and offline; Contracting at trade fairs; Brexit response mentoring; Service excellence; Customer service; Local experts programme; Key accounts; Market diversification. 	Short-Term	FI	KCC, CCC, SKDP, WCLD, LEO's ETB's, UCC, CIT ITT, PURE Cork				
E.5.2	Develop the capacity of the tourism industry to create saleable experiences for selling online and delivering to the international market.	Ongoing	FI	KCC, CCC, SKDP, WCLD, LEO's ETB's, UCC, CIT ITT, PURE Cork				
E.5.3	Networking – create a networking plan to develop a strong dialogue between tourism businesses. <ul style="list-style-type: none"> Familiarisation visits – organise industry familiarisation trips to build relationship between providers, strengthen awareness of what is on offer, and assist in identifying connections and partnership opportunities between tourism providers. Support Visit Cork in its development of a 'socialisation plan' designed to build awareness and engagement amongst all stakeholders across key touchpoints of the visitor journey. 	Short-Term / Ongoing	LTGs, KCC, CCC, FI, PURE Cork	FI, NPWS, OPW/DCHG SKDP, WCLD, WCICC, LEO's ETB's, UCC, CIT ITT				
E.5.4	Programme for Guides, Hosts and Ambassadors – ensure key tourism influencers within the communities have participated in relevant County Council training and Fáilte Ireland's Local Expert programme.	Short-Term / Ongoing	CCC, KCC	FI, ETBs, ITT, CIT, LTGs, LEs, LCs				

ENABLER 6: Enhancing Visitor Awareness of HERO Experiences in the Three Peninsulas		Timeframe	Lead	Partner				
E.6.1	<p>Work with Fáilte Ireland to profile key HERO experiences on the Wild Atlantic Way platform and ensure that the positioning of Three Peninsulas – West Cork & Kerry on this platform is in line with this Plan. Highlight the types of experiences that will differentiate the region and encourage increased visitation and interest.</p>	Short-Term	FI	CCC, KCC, LTGs, WCICC, LEs				
E.6.2	<p>Work within the marketing strategies of Kerry County Council and Cork County Council. Both Councils are committed to developing a compelling market presence and brands that align with the Wild Atlantic Way, and are focusing on overseas markets as identified in this Plan.</p> <ul style="list-style-type: none"> Leverage new opportunities, including the development of new County Council tourism web portal sites. Work with the Councils to ensure that appropriate visual and text is in place to capture the essence of the Three Peninsulas – West Cork & Kerry. Ensure presence on KCC's proposed online interactive map to show the activity tourism assets around the county. Work with partners to profile all events, activities, experiences and visitor sites and attractions online. Leverage KCC's focus on promoting Adventure Tourism and niche products like Astro-tourism and Gastronomic tourism which have the potential of attracting high spending visitors and addressing the challenge of seasonality and regionality. Target the diaspora network. Continue to work with partners to target the growing cruise sector, ensuring that the experiences and modes of travel are compatible from a social and environmental perspective. Work with the Convention Bureaus and accommodation venues that have meeting facilities to promote new experiences as opportunities to extend the stay of the business market and provide value for spousal/partner itineraries. 	Short-Term / Ongoing	CCC, KCC	FI, LTGs, WCICC, LEs, Festival & Event Organisers Cork & Kerry Convention Bureaus				
E.6.3	<p>SME Digital strategies:</p> <ul style="list-style-type: none"> Strengthening the distribution of experiences through engaging businesses in adopting online booking systems and online distribution; Promoting increased industry participation in social media. 	Short-Term / Ongoing	FI, CCC, KCC	ETBs, LEOs, LTGs, LEs, Festival & Event Organisers				
ENABLER 7: Animating the Destination		Timeframe	Lead	Partner				
E.7.1	<p>FESTIVALS & EVENTS</p> <p>Support existing festivals and investigate opportunities for new events where these promote the themes and experiences identified in this Plan, and proactively focus on using festivals and events to extend the tourism season and expand visitor and community experiences. In particular, work on strengthening signature events such as the West Cork Chamber Music Festival.</p> <ul style="list-style-type: none"> Work with the County Councils to ensure that all festivals and events are promoted online in the county tourism websites in addition to the websites of local tourism groups and the event itself. Develop guidelines to assist communities in hosting festivals, including providing advice on waste management and resources to improve the greening of festivals; and, capacity building in demonstrating event-friendliness and hosting. Host an annual networking event to explore opportunities for collaboration, extension of festivals, new ideas, and the sharing of information on evolving standards for festivals and events. Continue to support the emerging trend toward the development of integrated activities within events, such as combining guided hiking activities with food festivals, and use festivals to showcase other elements of the destination visitor experience to encourage return visitation. Develop community capacity to monitor and report the economic impact of festivals and events. 	Short-Term / Ongoing	CCC, KCC, LCS	FI, AOIFE, SKDP, WCLD, WCDP, WCICC, LTGs, LEs, Festival & Event Organisers				

E.7.2	<p>SENSE OF PLACE</p> <p>Improve the tourism offering of Bantry through its 'Destination Town' designation (December 2019). Use the funding to enhance public spaces, orientation, and spaces for food and craft markets. (CATALYST Project). In addition, encourage all communities to focus on strengthening their 'sense of place' and overall welcome. This is well advanced in a number of towns and villages, but is an area that requires ongoing commitment. Use the Destination Town toolkit as guide for developing Sense of Place. In addition:</p> <ul style="list-style-type: none"> Promote engagement of local business operators in the Tourism Ambassador Programmes run by the Counties; Continue to encourage participation in programmes such as the Tidy Towns Competition; Work with Local Authorities to explore opportunities for business incentives that will improve the streetscape; Assess the provision of basic visitor infrastructure along the Wild Atlantic Way and facilitate improvements in toilet facilities, view-points, signage, and parking in a manner that is sensitive to the environmental context; Pursue opportunities to animate public gathering places at weekends and when cruise ships are in port; Work with the retail sector to extend opening hours where feasible. 	Short-Term / Ongoing	CCC, KCC, LCs	FI, OPW/ DCHG, NPWS, SKDP, WCLD, WCDP, LTGs, LEs, LEOs, LCs				
ENABLER 7: Animating the Destination		Timeframe	Lead	Partner				
E.7.3	<p>STORYTELLING</p> <p>Identifying the stories and working with businesses and communities to develop a strong working knowledge of these stories is important to delivering strong theme-based experiences that allow the visitor to connect emotionally with the destination. To be effective, this will involve:</p> <ul style="list-style-type: none"> Supporting and encouraging local initiatives that are designed to collect and curate local stories. This may involve working with the elders in communities and undertaking further research; Examine the National Folklore Collection for suitable themes for storytelling; Develop a searchable database of stories which can be accessed on a password protected intranet site; Host storytelling forums and develop opportunities to extend the knowledge base to the wider tourism community; Highlight examples of where stories are told in a way that significantly impacts the visitor experience. 	Ongoing	FI, CCC, KCC	Kerry and Cork County Public Participation Networks, Active Retirement Groups, LTGs, LCs, LEs, SKDP, WCLD, WCDP, WCICC, Local Historical & Archaeological Societies				
E.7.4	<p>DIGITAL INFRASTRUCTURE</p> <p>There is a need to work with partners to ensure that new technologies are put in place to support the enhancement and delivery of experiences, the curation of content, and the flow of visitors within the region.</p> <ul style="list-style-type: none"> Work with Visit Cork and Destination Kerry to leverage their use of technology online and offline marketing tools to promote experiences and accommodation within the Three Peninsulas. Identify partners who can assist in the development of specific applications designed to improve the visitor experience by leveraging appropriate digital technologies to improve access, orientation, storytelling, interpretation and services such as online booking of accommodation, luggage transfer, etc. The development of the long-distance trails as global experiences in particular needs new technological solutions to increase the ease of accessing services and interpreting the trails. Continue to build a database of businesses that can be used in developing new clusters. 	Ongoing	CCC, KCC, PURE Cork	FI, SKDP, WCLD, LEOs				

ENABLER 8: Environmental Enhancement		Timeframe	Lead	Partner				
E.8.1	<p>All actions resulting from this VEDP will be planned, developed and implemented in an environmentally sustainable manner with environmental protection & promotion as a fundamental. This will be realised through the findings and out puts of the environmental assessment process and will include:</p> <ul style="list-style-type: none"> Developing a suite of mitigatory actions to ensure that any negative environmental impacts are reduced or eliminated at plan implementation stage and where possible positive impacts are integrated and encouraged, and Development and execution of an Environmental Monitoring Programme for the Plan during implementation and operation. <p>See Appendix 6 and 7 for further information.</p>	Ongoing	FI Where consent process is referenced the relevant competent authority	Relevant partner name under individual action.				
<p>SEA Commentary:</p> <p>The assessment of the Plan's Enablers of Success against Strategic Environmental Objectives (SEOs B1, B2, B3, PHH1, S1, W1, W2, W3, AC1, M1, M2, M3, CH1, CH2 and L1) is consistent with the:</p> <ul style="list-style-type: none"> Environmental effects detailed under subsections 8.2 to 8.4; and Assessments of the selected alternatives for the Plan provided at Section 7 of this report. <p>Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent. The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.</p> <p>The SEA process that has been undertaken alongside the preparation of the Plan has brought about various changes to the emerging Plan through an iterative process. Section 9 Mitigation Measures

9.1 Introduction

Mitigation measures are measures envisaged to prevent, reduce and, as fully as possible, offset any significant adverse impacts on the environment of implementing the Plan. Various environmental sensitivities and issues have been communicated to Fáilte Ireland through the SEA and Appropriate Assessment (AA) processes.

By integrating all SEA and AA recommendations into the Plan, Fáilte Ireland is helping to ensure that:

- The potential significant adverse effects of implementing the Plan are avoided, reduced or offset; and
- The beneficial environmental effects of implementing the Plan are maximised.

Mitigation was achieved through the following:

- Establishing the status of the Plan and its interrelationship with the Statutory Decision-Making and Consent-Granting Framework⁸²; and
- Integrating Requirements for Environmental Compliance into the Plan⁸³.

9.2 Establishing the status of the Plan and its interrelationship with the Statutory Decision-Making and Consent-Granting Framework⁸⁴

The SEA team worked with the Plan-preparation team at Fáilte Ireland in order to help establish the status of the Plan and its interrelationship with the Statutory Decision-Making and Consent-Granting Framework.

Implementing the VEDP will involve Fáilte Ireland helping to facilitate, promote, support and coordinate stakeholders (including local authorities, other government agencies, tourism operators, communities and visitors) in their activities in a way that is consistent with existing and emerging plans that have been subject to environmental assessment. **The VEDP does not provide consent, establish a framework for granting consent or contribute towards a framework for granting consent.**

The VEDP is situated alongside a hierarchy of statutory documents setting out public policy for, among other things, land use development, tourism, infrastructure, sustainable development, environmental protection and environmental management. These other existing policies, plans etc. have been subject to their own environmental assessment processes, as relevant, and form the decision-making and consent-granting framework.

The National Planning Framework (NPF) sets out Ireland's planning policy direction for the next 22 years. The NPF is to be implemented through Regional Spatial and Economic Strategies (RSEs) and lower tier Development Plans and Local Area Plans. The RSE for the Southern Region (that includes the area to which the VEDP relates) sets out objectives relating tourism development, that have been subject to environmental assessment, including those relating to: enhancing provision of tourism and leisure amenity; promoting tourism activity; developing a road network and public transport services, facilitating improved visitor access and longer dwell times; developing walking and cycling trails, opening greater accessibility to the marine and countryside environment by sustainable modes; and facilitating appropriate tourism development, including that relating to greenways, blueways and

⁸² This framework includes various environmental requirements.

⁸³ These requirements include those that have arisen through the SEA and/or AA processes.

⁸⁴ This framework includes various environmental requirements.

peatlands. The RSES is informing the review of existing, assessed lower-tier Development Plans and Local Area Plans, which already include various provisions relating to land use, tourism and infrastructure. Such reviews will also be subject to environmental assessments.

Implementation of the VEDP shall be consistent with and conform with the NPF, RSES and lower-tier land use plans, including provisions relating to sustainable development, environmental protection and environmental management that have been integrated into these documents including through SEA and AA processes. In order to be realised, projects included in the VEDP (in a similar way to other projects from any other sector) will have to comply, as relevant, with various legislation, policies, plans and programmes (including requirements for lower-tier Appropriate Assessment, Environmental Impact Assessment and other licencing requirements as appropriate) that form the statutory decision-making and consent-granting framework, of which the VEDP is not part and does not contribute towards.

Figure 9.1 provides a schematic of the relationship between Visitor Experience Development Plans and the existing Statutory Decision-Making and Consent-Granting Framework. Also indicated is the hierarchy of accompanying environmental assessment in force. Note that the Overall Findings of this SEA are provided under Section 8.2 of this SEA Environmental Report.

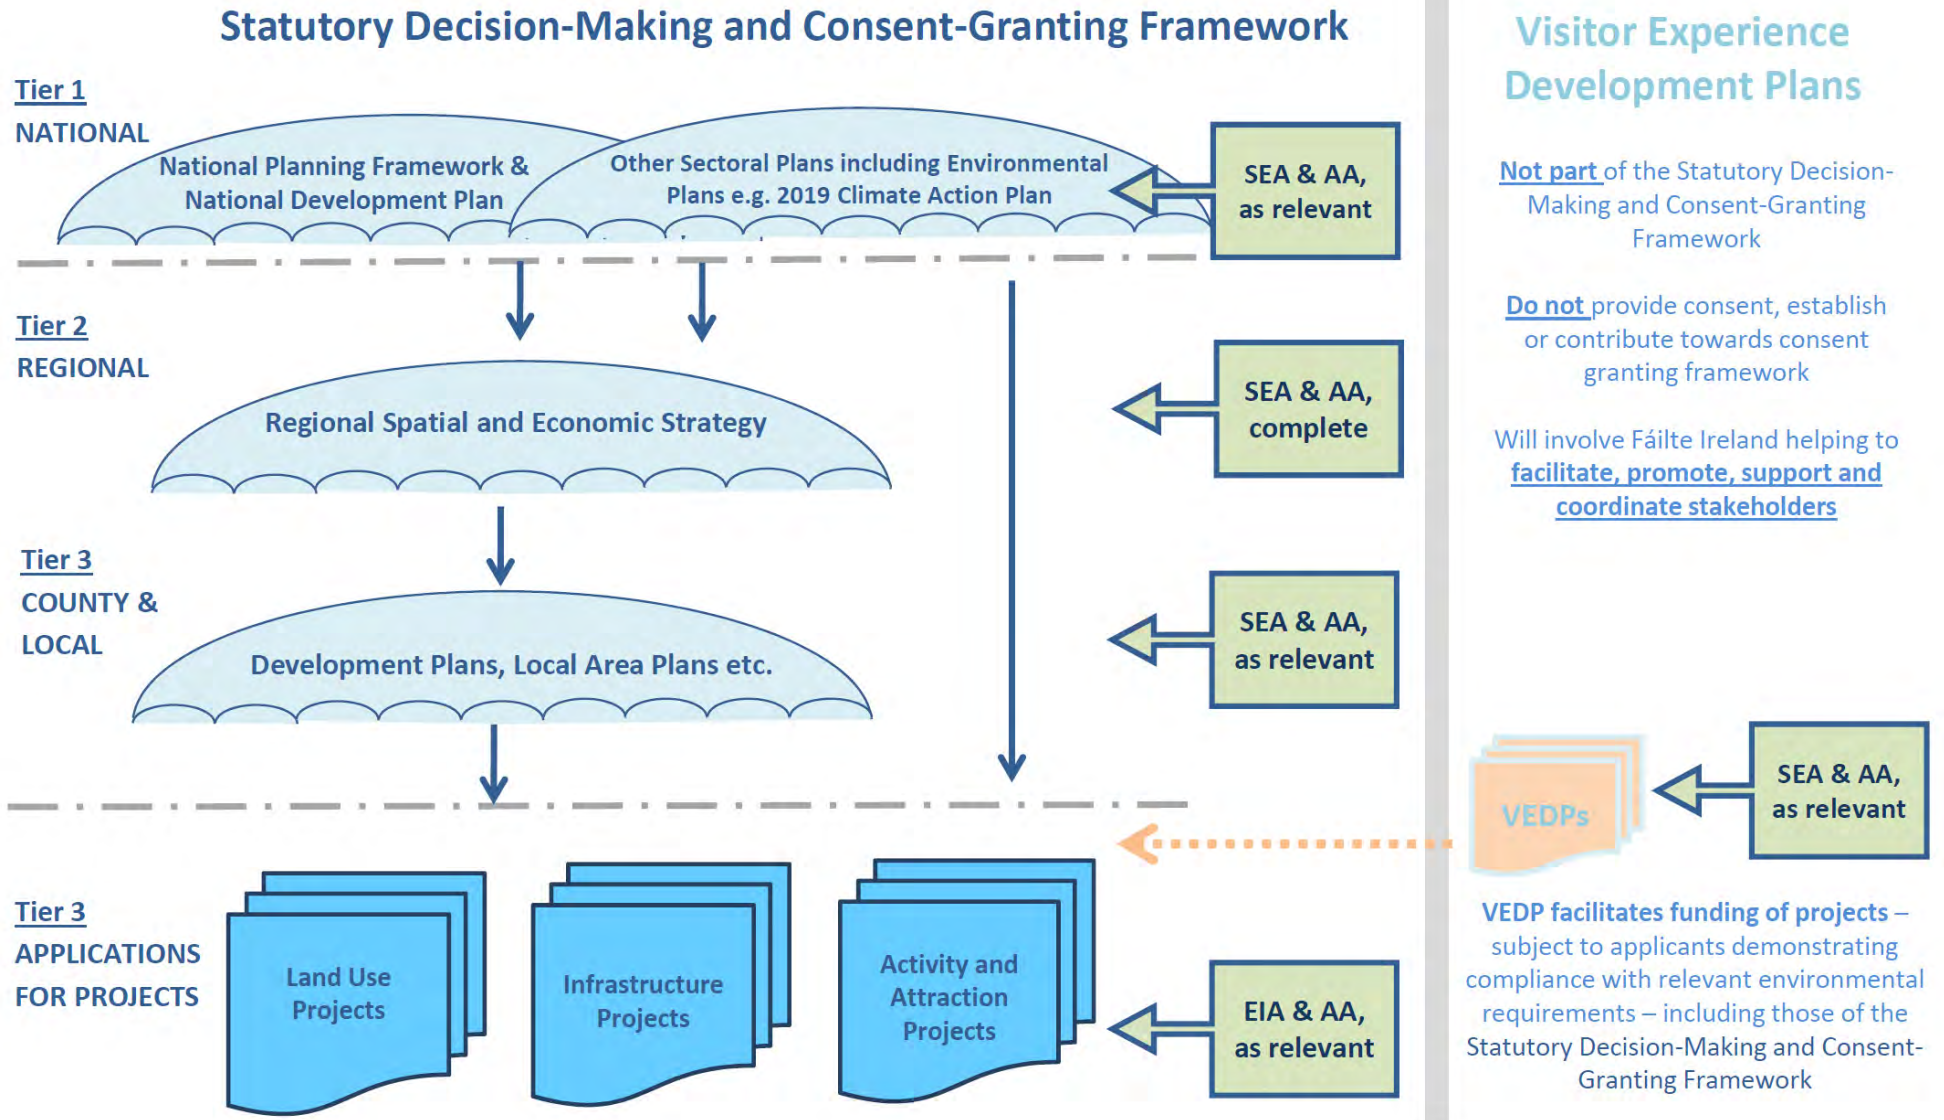

Figure 9.1 Statutory Decision-Making and Consent-Granting Framework, VEDPs and Environmental Assessment Requirements

9.3 Integrating Requirements for Environmental Protection and Management into the Plan⁸⁵

The SEA and AA team worked with the Plan-preparation team at Fáilte Ireland in order to integrate requirements for environmental protection and management into the Plan.

Guiding Principles for Sustainable & Responsible Tourism identified by the Plan as being key to the success of integrated into the Plan include:

- Increase and promote environmental protection and enhancement when progressing actions derived from this plan;
- Fáilte Ireland will follow national planning framework guidelines and liaise with relevant planning authorities to ensure any proposed developments are adequately provided for in terms of critical service infrastructure; and
- Advocate for the protection of key environmental and tourism assets.

Fáilte Ireland provides funding for sustainable tourism projects that emerge as part of specific, competitive, themed and time-bound grant schemes or as part of wider strategic partnerships. These include projects relating to land use, infrastructural development and land use activities and attractions. Reference made to such projects included in the Plan does not guarantee funding. While funding is provided to certain projects, Fáilte Ireland is not the developer.

In order to achieve funding (including promotion) for land use or infrastructural development or land use activities from Fáilte Ireland, Fáilte Ireland's stakeholders shall be required to demonstrate compliance⁸⁶ with measures relating to sustainable development, environmental protection and environmental management contained within the following Fáilte Ireland published documents:

- Wild Atlantic Way Operational Programme Appendix 5 *"Site Maintenance Guidelines"* and other relevant measures from the Fáilte Ireland visitor and habitat management guidelines series (and any subsequent replacements); and
- Wild Atlantic Way Operational Programme Appendix 6 *"Environmental Management for Local Authorities and Others"* (and any subsequent replacements).

In order to be realised, projects included in the VEDP (in a similar way to other projects from any other sector) will have to comply, as relevant, with various legislation, policies, plans and programmes (including requirements for lower-tier Appropriate Assessment, Environmental Impact Assessment and other licencing requirements as appropriate) that form the statutory decision-making and consent-granting framework, of which the VEDP is not part and does not contribute towards. Such legislation, policies, plans and programmes include:

- Requirements for lower-tier environmental assessment, including EIA and AA;
- The Kerry and Cork County Development Plans, including various provisions relating to sustainable development, environmental protection and environmental management⁸⁷; and
- The Climate Action Plan 2019, the National Climate Change Adaptation Framework (2018 and any subsequent versions) and the National Mitigation Plan (2017 and any subsequent versions)⁸⁸.

⁸⁵ These requirements include those that have arisen through the SEA and/or AA processes.

⁸⁶ Demonstration of compliance may be supported by monitoring undertaken by the beneficiary.

⁸⁷ For more information please refer to Appendix II of this report or the website of the relevant public authority.

⁸⁸ For more information please refer to Section 4.10 and/or Appendix II of this report or the website of the relevant public authority.

Infrastructure Capacity⁸⁹

With respect to infrastructural capacity (including drinking water, wastewater, waste and transport) the potential impact on existing infrastructure as well as the potential environmental effects of a likely increase in tourism-related traffic volumes along any routes resulting from the relevant initiative shall be considered and mitigated as appropriate, where relevant. The promotion of developing visitor friendly infrastructure where it is required will also be encouraged.

Visitor Management⁹⁰

Those receiving funding shall seek to manage any increase in visitor numbers and/or any change in visitor behaviour in order to avoid significant effects including loss of habitat and disturbance, including ensuring that new projects are a suitable distance from ecological sensitivities.

Extensive research by Fáilte Ireland has shown improved environmental outcomes (including improved attainment of conservation objectives) in areas with visitor management strategies. Visitor management strategies will be required for proposed plans, programmes and projects that are to receive funding as relevant and appropriate.

Green Infrastructure and Ecosystem Services⁹¹

Those receiving funding shall contribute towards the maintenance of existing green infrastructure and its ecosystem services, taking into account the output of the Mapping and Assessment of Ecosystem Services project being undertaken by the NPWS. Proposals for the development of any green infrastructure should demonstrate the synergies that can be achieved with regard to the: provision of open space amenities; sustainable management of water; protection and management of biodiversity; protection of cultural heritage; and protection of protected landscape sensitivities.

⁸⁹ This requirement has arisen through the SEA and/or AA processes.

⁹⁰ This requirement has arisen through the SEA and/or AA processes.

⁹¹ This requirement has arisen through the SEA and/or AA processes.

Section 10 Monitoring Measures

10.1 Introduction

The SEA Directive requires that the significant environmental effects of the implementation of plans and programmes are monitored. This section details the measures that have been selected in order to monitor the likely significant effects of implementing relevant Fáilte Ireland Plans, Programmes, etc.

The monitoring programme is flexible to take account of specific environmental issues and unforeseen adverse impacts should they arise. It monitors all potential effects, including positive and negative ones (including cumulative effects – refer also to Section 7.3). Monitoring can demonstrate the positive effects facilitated by the Plan and can enable, at an early stage, the identification of unforeseen adverse effects and the undertaking of appropriate remedial action.

The occurrence of persistent significant adverse environmental effects which are directly attributable to tourism would necessitate consideration of the effects in the context of the Plan and a possible review of part(s) of the Plan.

10.2 Indicators and Targets

Monitoring is based around indicators that allow quantitative measures of trends and progress over time relating to the Strategic Environmental Objectives identified in Section 5 and used in the evaluation. Each indicator to be monitored is accompanied by the target(s) that were identified with regard to the relevant strategic actions.

Table 10.1 overleaf shows the current indicators and targets that have been selected for monitoring the likely significant environmental effects of implementing relevant Fáilte Ireland Plans, Programmes, etc. These monitoring measures are updated on an ongoing basis.

Monitoring is an ongoing process and the programme allows for flexibility and further refinement of indicators and targets.

10.3 Sources

Confirmation of compliance with relevant environmental measures (see Section 9) will be a source of information for the Monitoring Programme. This documentation may include monitoring undertaken by beneficiaries to demonstrate compliance with the environmental requirements.

Other existing monitoring sources will be used, including:

- Information gathered through existing Fáilte Ireland environmental monitoring programmes (and any subsequent replacements), including the Monitoring Programme for the Wild Atlantic Way, a sub-programme of which will be extended to/reported on for the VEDP area in order to monitor any effects of visitors (see Section 4.6.3);
- Sources maintained by Kerry and Cork County Councils (such as those arising from the SEA of land use plans) and the relevant authorities e.g. the Environmental Protection Agency, the National Parks and Wildlife Service and the Central Statistics Office; and
- Lower-tier environmental assessment and decision making – including a review of project approvals granted and associated documents – will also be utilised as part of the Monitoring Programme.

10.4 Reporting and Responsibility

Reporting on environmental monitoring will address the indicators set out below. Fáilte Ireland is responsible for the ongoing review of indicators and targets, collating existing relevant monitored data, the preparation of monitoring evaluation report(s), the publication of these reports and, if necessary, the carrying out of corrective action, in combination with the relevant authorities.

Environmental monitoring for the VEDP and other existing/future Fáilte Ireland plans, programmes, etc. may be undertaken and

reported on at the same time. The findings of monitoring will be reported on periodically with frequencies to be determined during implementation.

Table 10.1 Selected Indicators, Targets and Monitoring Sources

Environmental Component	Indicators	Targets	Source and (where available) Frequency
Biodiversity, Flora and Fauna	B1: Conservation status of habitats and species as assessed under Article 17 of the Habitats Directive	B1: Maintenance of favourable conservation status for all habitats and species protected under National and International legislation to be unaffected by implementation of the Plan ⁹²	<ul style="list-style-type: none"> • Documentation demonstrating compliance with “Requirements for Environmental Protection and Management” – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Department of Culture, Heritage and the Gaeltacht report of the implementation of the measures contained in the Habitats Directive - as required by Article 17 of the Directive (every 6 years) • Department of Culture, Heritage and the Gaeltacht’s National Monitoring Report for the Birds Directive under Article 12 (every 3 years) • Consultations with the NPWS • CORINE mapping resurvey (every c. 5 years) • Input from any other existing or replacement Fáilte Ireland monitoring programmes
	B2: Percentage loss of functional connectivity without remediation resulting from Plan	B2: No significant ecological networks or parts thereof which provide functional connectivity to be lost without remediation resulting from the Plan	
	B3i: Number of significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites resulting from the Plan B3ii: Number of significant impacts on the protection of listed species	B3i: Avoid significant impacts on relevant habitats, species, environmental features or other sustaining resources in designated sites including Wildlife Sites resulting from the Plan B3ii: No significant impacts on the protection of listed species resulting from the Plan	
Population and Human Health	PHH1: Occurrence (any) of a spatially concentrated deterioration in human health arising from environmental factors resulting from the Plan, as identified by the Health Service Executive and Environmental Protection Agency	PHH1: No spatial concentrations of health problems arising from environmental factors as a result the Plan	<ul style="list-style-type: none"> • Documentation demonstrating compliance with “Requirements for Environmental Protection and Management” – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Consultations with the HSE and EPA • Input from any other existing or replacement Fáilte Ireland monitoring programmes
Soil	S1: Artificial surfaces land cover extent	S1: Contribute towards the target of the National Planning Framework’s SEA (2018) to “Maintain built surface cover nationally to below the EU average of 4%.”	<ul style="list-style-type: none"> • Documentation demonstrating compliance with “Requirements for Environmental Protection and Management” – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • CORINE mapping resurvey (every c. 5 years) • Input from any other existing or replacement Fáilte Ireland monitoring programmes

⁹² Except as provided for in Article 6(4) of the Habitats Directive, viz. There must be: (a) No alternative solution available; (b) Imperative reasons of overriding public interest for the programme to proceed; and (c) Adequate compensatory measures in place.

SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan

Environmental Component	Indicators	Targets	Source and (where available) Frequency
Water	W1i: Classification of Overall Status (comprised of ecological and chemical status) under the European Communities Environmental Objectives (Surface Waters) Regulations 2009 (SI No. 272 of 2009)	W1i: No deterioration in the status of any surface water or adverse effect upon the ability of any surface water to achieve 'good status' as a result of the Plan	<ul style="list-style-type: none"> • Documentation demonstrating compliance with "Requirements for Environmental Protection and Management" – see Section 9 • Lower tier environmental assessment and decision making by local authorities • Data issued under the Water Framework Directive Monitoring Programme for Ireland (multi-annual) • EPA <i>The Quality of Bathing Water in Ireland</i> reports • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Input from any other existing or replacement Fáilte Ireland monitoring programmes
	W1ii: Mandatory and Guide values as set by the EU Bathing Water Directive and transposing Bathing Water Quality Regulations (SI No. 79 of 2008)	W1ii: No deterioration in the value of bathing waters or adverse effect upon the ability of any bathing water to achieve Mandatory values and, where possible, Guide values as a result of the Plan	
	W2: Interactions with Groundwater Quality Standards and Threshold Values under Directive 2006/118/EC resulting from development adhering to the Plan	W2: Not to affect the ability of groundwaters to comply with Groundwater Quality Standards and Threshold Values under Directive 2006/118/EC, subject to exemptions provided for by Article 4 of the WFD	
	W3: Compliance of relevant lower tier assessments and decision making with the Flood Risk Management Guidelines	W3: For lower tier assessments and decision making to comply with the Flood Risk Management Guidelines	
Air and Climatic Factors	AC1: Demonstration of compliance with provisions relating to climate adaptation and mitigation have been integrated into the Plan.	C1: To maximise the amount of measures relating to climate adaptation and mitigation being implemented	<ul style="list-style-type: none"> • Documentation demonstrating compliance with "Requirements for Environmental Protection and Management" – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Input from any other existing or replacement Fáilte Ireland monitoring programmes
Material Assets	M1: Number of instances whereby additional tourists are directed by beneficiaries of funding towards areas in the Plan area where adequate and appropriate critical infrastructure with sufficient capacity is unavailable	M1: No instances whereby additional tourists are directed by beneficiaries of funding towards areas in the Plan area where adequate and appropriate critical infrastructure with sufficient capacity that does not present a danger to human health are unavailable	<ul style="list-style-type: none"> • Documentation demonstrating compliance with "Requirements for Environmental Protection and Management" – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Consultations with the partners such as the EPA, Irish Water and/or Cork/Kerry County Councils • Input from any other existing or replacement Fáilte Ireland monitoring programmes
	M2: Number of significant adverse effects on the use of or access to public assets and infrastructure	M2: No significant adverse effects on the use of or access to public assets and infrastructure	
	M3: Preparation and implementation of construction and environmental management plans	M3: For construction and environmental management plans to be prepared and implemented for relevant projects	
Cultural Heritage	CH1: Percentage of entries to the Record of Monuments and Places protected from significant adverse effects arising from the Plan	CH1: No unauthorised adverse effects on archaeological heritage resulting from implementation of the Plan	<ul style="list-style-type: none"> • Documentation demonstrating compliance with "Requirements for Environmental Protection and Management" – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies)

SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan

Environmental Component	Indicators	Targets	Source and (where available) Frequency
	CH2: Percentage of entries to the Records of Protected Structures and Architectural Conservation Areas and their context protected from significant adverse effects arising from the Plan	CH2: No unauthorised adverse effects on architectural heritage resulting from implementation of the Plan	<ul style="list-style-type: none"> • Input from any other existing or replacement Fáilte Ireland monitoring programmes • Documentation demonstrating compliance with “Requirements for Environmental Protection and Management” – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Input from any other existing or replacement Fáilte Ireland monitoring programmes
Landscape	L1: Number of unmitigated conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils	L1: No unmitigated conflicts with the appropriate protection of statutory designations relating to the landscape, including those included in the land use plans of Cork and Kerry County Councils	<ul style="list-style-type: none"> • Documentation demonstrating compliance with “Requirements for Environmental Protection and Management” – see Section 9 • Lower tier environmental assessment and decision making by local authorities • SEA Monitoring Programme reports for the land use plans of relevant local authorities (as required, monitoring reports published on various timescales and frequencies) • Input from any other existing or replacement Fáilte Ireland monitoring programmes

Appendix I SEA Determination

SEA Determination

Strategic Environmental Assessment (SEA) Screening Determination

for the:

Draft Three Peninsulas – West Cork and Kerry Visitor Experience Development Plan

Article 3 para. 2 of the SEA Directive¹, introduced the requirement that SEA be carried out on plans and programmes, or modifications to these:

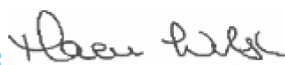

- a) which are prepared for agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications, tourism, town and country planning or land use and which set the framework for future development consent of projects listed in Annexes I and II to the EIA Directive², or
- b) which, in view of the likely effect on sites, have been determined to require an assessment pursuant to Article 6 or 7 of the Habitats Directive³ i.e. the Directive requires that SEA is undertaken where Stage 2 Appropriate Assessment (AA)⁴ is being undertaken on plans, programmes etc.

The tourism sector Plan does not contribute towards the framework for future development consent of projects listed in Annexes I and II to the EIA Directive and does not contain provisions or define rules that must be complied with when administrative consent of other projects is being granted.

The Plan does, however, fall under the definition of a “plan” contained within the Birds and Natural Habitats Regulations 2011 (as amended) and therefore must be screened for the need to undertake AA. The Screening for AA has found that the Plan has the potential, if unmitigated, to affect the ecological integrity European Sites and that measures to ensure that potential effects are avoided are required. Taking into account the requirements of the Habitats Directive and recent case law (including, European Court of Justice Judgement C323-17), Stage 2 AA must therefore be carried out for the Plan. As Stage 2 AA is being undertaken on the Plan, SEA must also be undertaken for this Plan - see requirement at b) above.

This determination has been made having regard to the European Communities (Environmental Assessment of Certain Plans and Programmes) Regulations 2004 (Statutory Instrument Number (SI No. 435 of 2004), as amended by the European Communities (Environmental Assessment of Certain Plans and Programmes) (Amendment) Regulations 2011 (SI No. 200 of 2011).

Signatory:

Date: 11.02.20

¹ Directive 2001/42/EC of the European Parliament and of the Council of Ministers, of 27th June 2001, on the Assessment of the Effects of Certain Plans and Programmes on the Environment

² Directive 2011/92/EU of the European Parliament and of the Council of 13 December 2011, on the assessment of the effects of certain public and private projects on the environment (codification), as amended by Directive 2014/52/EU

³ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora

⁴ AA is provided for by the Habitats Directive and is a focused and detailed impact assessment of the implications of a strategic action or project, alone and in combination with other strategic actions and projects, on the integrity of a European Site in view of its conservation objectives.

Appendix II Relationship with Legislation and Other Plans and Programmes

This appendix is not intended to be a full and comprehensive review of EU Directives, the transposing regulations or the regulatory framework for environmental protection and management. The information is not exhaustive and it is recommended to consult the Directive, Regulation, Plan or Programme to become familiar with the full details of each.

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
European Level			
SEA Directive (2001/42/EC)	<ul style="list-style-type: none"> Contribute to the integration of environmental considerations into the preparation and adoption of plans and programmes with a view to promoting sustainable development. Provide for a high level of protection of the environment by carrying out an environmental assessment of plans and programmes which are likely to have significant effects on the environment. 	<ul style="list-style-type: none"> Carry out an environmental assessment for plans or programmes referred to in Articles 2 to 4 of the Directive. Prepare an environmental report which identifies, describes and evaluates the likely significant effects on the environment of implementing the plan or programme and reasonable alternatives that consider the objectives and the geographical scope of the plan or programme. Consult with relevant authorities, stakeholders and public allowing sufficient time to make a submission. Consult other Member States where the implementation of a plan or programme is likely to have transboundary environmental effects. Inform relevant authorities and stakeholders on the decision to implement the plan or programme. Issue a statement to include requirements detailed in Article 9 of the Directive. Monitor and mitigate significant environmental effects identified by the assessment. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
EIA Directive (2011/92/EU as amended by 2014/52/EU)	<ul style="list-style-type: none"> Requires the assessment of the environmental effects of public and private projects which are likely to have significant effects on the environment. Aims to assess and implement avoidance or mitigation measures to eliminate environmental effects, before consent is given of projects likely to have significant effects on the environment by virtue, inter alia, of their nature, size or location are made subject to a requirement for development consent and an assessment with regard to their effects. Those projects are defined in Article 4. 	<ul style="list-style-type: none"> All projects listed in Annex I are considered as having significant effects on the environment and require an EIA. For projects listed in Annex II, a "screening procedure" is required to determine the effects of projects on the basis of thresholds/criteria or a case by case examination. This should take into account Annex III. The environmental impact assessment shall identify, describe and assess in an appropriate manner, in the light of each individual case and in accordance with Articles 4 to 12, the direct and indirect effects of a project on the following factors: human beings, fauna and flora, soil, water, air, climate and the landscape, material assets and the cultural heritage, the interaction between each factor. Consult with relevant authorities, stakeholders and public allowing sufficient time to make a submission before a decision is made. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Habitats Directive (92/43/EEC)	<ul style="list-style-type: none"> Promote the preservation, protection and improvement of the quality of the environment, including the conservation of natural habitats and of wild fauna and flora. Contribute towards ensuring biodiversity through the 	<ul style="list-style-type: none"> Propose and protect sites of importance to habitats, plant and animal species. Establish a network of European sites hosting the natural habitat types listed in Annex I and habitats of the species listed in Annex II, to enable the natural habitat types and 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
	<p>conservation of natural habitats and of wild fauna and flora.</p> <ul style="list-style-type: none"> • Maintain or restore to favourable conservation status, natural habitats and species of wild fauna and flora of community interest. • Promote the maintenance of biodiversity, taking account of economic, social, cultural and regional requirements. 	<p>the species' habitats concerned to be maintained or, where appropriate, restored at a favourable conservation status in their natural range.</p> <ul style="list-style-type: none"> • Carry out comprehensive assessment of habitat types and species present. • Establish a system of strict protection for the animal species and plant species listed in Annex IV. 	<p>bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Birds Directive (2009/147/EC)	<ul style="list-style-type: none"> • Conserve all species of naturally occurring birds in the wild state including their eggs, nests and habitats. • Protect, manage and control these species and comply with regulations relating to their exploitation. • The species included in Annex I shall be the subject of special conservation measures concerning their habitat in order to ensure their survival and reproduction in their area of distribution. 	<ul style="list-style-type: none"> • Preserve, maintain or re-establish a sufficient diversity and area of habitats for all the species of birds referred to in Annex 1. • Preserve, maintain and establish biotopes and habitats to include the creation of protected areas (Special Protection Areas). • Ensure the upkeep and management in accordance with the ecological needs of habitats inside and outside the protected zones, re-establish destroyed biotopes and creation of biotopes. • Measures for regularly occurring migratory species not listed in Annex I is required as regards their breeding, moulting and wintering areas and staging posts along their migration routes. The protection of wetlands and particularly wetlands of international importance. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU Nitrates Directive (91/676/EC)	<ul style="list-style-type: none"> • Reducing water pollution caused or induced by nitrates from agricultural sources and - preventing further such pollution. 	<p>Ireland's Nitrates Action Programme is designed to prevent pollution of surface waters and ground water from agricultural sources and to protect and improve water quality. Ireland's third NAP came into operation in 2014. Each Member State's NAP must include:</p> <ul style="list-style-type: none"> • a limit on the amount of livestock manure applied to the land each year • set periods when land spreading is prohibited due to risk • set capacity levels for the storage of livestock manure 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU Integrated Pollution Prevention Control Directive (2008/1/EC)	<ul style="list-style-type: none"> • The purpose of this Directive is to achieve integrated prevention and control of pollution arising from the activities listed in Annex I. It lays down measures designed to prevent or, where that is not practicable, to reduce emissions in the air, water and land from the abovementioned activities, including measures concerning waste, in order to achieve a high level of protection of the environment taken as a whole, without prejudice to Directive 85/337/EEC and other relevant Community provisions. 	<p>The IPPC Directive is based on several principles:</p> <ul style="list-style-type: none"> • an integrated approach • best available techniques, • flexibility; and • public participation 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU Plant Protection (products) Directive 2009/127/EC	<ul style="list-style-type: none"> • The Directive aims at reducing the risks and impacts of pesticide use on human health and • the environment by introducing different targets, tools and measures such as Integrated Pest Management (IPM) or National Action Plans (NAPs). 	<ul style="list-style-type: none"> • The Framework Directive applies to pesticides which are plant protection products. • Regarding pesticide application equipment already in professional use, the Framework Directive introduces requirements for the inspection and maintenance to be carried out on such equipment. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the</p>

SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
EU Renewables Directive (2009/28/EC)	<ul style="list-style-type: none"> The Renewable Energy Directive establishes an overall policy for the production and promotion of energy from renewable sources in the EU. It requires the EU to fulfil at least 20% of its total energy needs with renewables by 2020 – to be achieved through the attainment of individual national targets. All EU countries must also ensure that at least 10% of their transport fuels come from renewable sources by 2020. 	<ul style="list-style-type: none"> The Directive promotes cooperation amongst EU countries (and with countries outside the EU) to help them meet their renewable energy targets. The Directive specifies national renewable energy targets for each country, taking into account its starting point and overall potential for renewables. EU countries set out how they plan to meet these targets and the general course of their renewable energy policy in national renewable energy action plans. Progress towards national targets is measured every two years when EU countries publish national renewable energy progress reports. 	<p>regulatory framework for environmental protection and management.</p> <p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Indirect Land Use Change Directive (2012/0288(COD))	<ul style="list-style-type: none"> Article 3(4) of Directive 2009/28/EC of the European Parliament and of the Council (3) requires Member States to ensure that the share of energy from renewable energy sources in all forms of transport in 2020 is at least 10 % of their final energy consumption. The blending of biofuels is one of the methods available for Member States to meet this target, and is expected to be the main contributor. Other methods available to meet the target are the reduction of energy consumption, which is imperative because a mandatory percentage target for energy from renewable sources is likely to become increasingly difficult to achieve sustainably if overall demand for energy for transport continues to rise, and the use of electricity from renewable energy sources. 	<ul style="list-style-type: none"> Limit the contribution that conventional biofuels (with a risk of ILUC emissions) make towards attainment of the targets in the Renewable Energy Directive; Improve the greenhouse gas performance of biofuel production processes (reducing associated emissions) by raising the greenhouse gas saving threshold for new installations subject to protecting installations already in operation on 1st July 2014; Encourage a greater market penetration of advanced (low-ILUC) biofuels by allowing such fuels to contribute more to the targets in the Renewable Energy Directive than conventional biofuels; Improve the reporting of greenhouse gas emissions by obliging Member States and fuel suppliers to report the estimated indirect land-use change emissions of biofuels. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Alternative Fuels Infrastructure Directive (2014/94/EU)	<ul style="list-style-type: none"> This Directive establishes a common framework of measures for the deployment of alternative fuels infrastructure in the Union in order to minimise dependence on oil and to mitigate the environmental impact of transport. 	<ul style="list-style-type: none"> This Directive sets out minimum requirements for the building-up of alternative fuels infrastructure, including recharging points for electric vehicles and refuelling points for natural gas (LNG and CNG) and hydrogen, to be implemented by means of Member States' national policy frameworks, as well as common technical specifications for such recharging and refuelling points, and user information requirements. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU Energy Efficiency Directive (2012/27/EU)	<ul style="list-style-type: none"> Establishes a set of binding measures to help the EU reach its 20% energy efficiency target by 2020. Under the Directive, all EU countries are required to use energy more efficiently at all stages of the energy chain, from production to final consumption. 	<ul style="list-style-type: none"> Energy distributors or retail energy sales companies have to achieve 1.5% energy savings per year through the implementation of energy efficiency measures EU countries can opt to achieve the same level of savings through other means, such as improving the efficiency of heating systems, installing double glazed windows or insulating roofs The public sector in EU countries should purchase energy 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for</p>

SEA Environmental Report for The Three Peninsulas West Cork and Kerry Visitor Experience Development Plan

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
		efficient buildings, products and services <ul style="list-style-type: none"> • Every year, governments in EU countries must carry out energy efficient renovations on at least 3% (by floor area) of the buildings they own and occupy • Energy consumers should be empowered to better manage consumption. This includes easy and free access to data on consumption through individual metering • National incentives for SMEs to undergo energy audits • Large companies will make audits of their energy consumption to help them identify ways to reduce it • Monitoring efficiency levels in new energy generation capacities. 	environmental protection and management.
EU Seveso Directive (2012/18/EU)	<ul style="list-style-type: none"> • This Directive lays down rules for the prevention of major accidents which involve dangerous substances, and the limitation of their consequences for human health and the environment, with a view to ensuring a high level of protection throughout the Union in a consistent and effective manner. 	The Seveso Directive is well integrated with other EU policies, thus avoiding double regulation or other administrative burden. This includes the following related policy areas: <ul style="list-style-type: none"> • Classification, labelling and packaging of chemicals; • The Union's Civil Protection Mechanism; • The Security Union Agenda including CBRN-E and Protection of critical infrastructure; • Policy on environmental liability and on the protection of the environment through criminal law; • Safety of offshore oil and gas operations. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
European Union Biodiversity Strategy to 2020	<ul style="list-style-type: none"> • Aims to halt or reverse biodiversity loss and speed up the EU's transition towards a resource efficient and green economy. • Halting the loss of biodiversity and the degradation of ecosystem services in the EU by 2020, and restoring them in so far as feasible. 	<ul style="list-style-type: none"> • Outlines six targets and twenty actions to aid European Union in halting the loss to biodiversity and eco-system services. • The six targets cover: <ul style="list-style-type: none"> ○ Full implementation of EU nature legislation to protect biodiversity ○ Maintaining, enhancing and protecting for ecosystems, and green infrastructure ○ Ensuring sustainable agriculture, and forestry ○ Sustainable management of fish stocks ○ Reducing invasive alien species ○ Addressing the global need to contribute towards averting global biodiversity loss 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
EU Green Infrastructure Strategy	Aims to create a robust enabling framework in order to promote and facilitate Green Infrastructure (GI) projects.	<ul style="list-style-type: none"> • Promoting GI in the main EU policy areas. • Supporting EU-level GI projects. • Improving access to finance for GI projects. • Improving information and promoting innovation. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
UN Kyoto Protocol (2nd Kyoto Period), the Second European Climate Change Programme (ECCP II), Paris climate conference (COP21) 2015 (Paris	The UN Kyoto Protocol set of policy measures to reduce greenhouse gas emissions. The Second European Climate Change Programme (ECCP II) aims to identify and develop all the necessary elements	<ul style="list-style-type: none"> • The Kyoto Protocol is implemented through the European Climate Change Programme (ECCP II). • EU member states implement measures to improve on or compliment the specified measures and policies arising from the ECCP. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and

Agreement)	<p>of an EU strategy to implement the Kyoto Protocol.</p> <p>At the Paris climate conference (COP21) in December 2015, 195 countries adopted the first-ever universal, legally binding global climate deal. The agreement sets out a global action plan to put the world on track to avoid dangerous climate change by limiting global warming to well below 2°C.</p>	<ul style="list-style-type: none"> Under COP21, governments agreed to come together every 5 years to set more ambitious targets as required by science; report to each other and the public on how well they are doing to implement their targets; track progress towards the long-term goal through a robust transparency and accountability system. 	<p>bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU 2020 Climate and Energy Package	<ul style="list-style-type: none"> Binding legislation which aims to ensure the European Union meets its climate and energy targets for 2020. Aims to achieve a 20% reduction in EU greenhouse gas emissions from 1990 levels. Aims to raise the share of EU energy consumption produced from renewable resources to 20%. Achieve a 20% improvement in the EU's energy efficiency. 	<p>Four pieces of complimentary legislation:</p> <ul style="list-style-type: none"> Reform of the EU Emissions Trading System (EU ETS) to include a cap on emission allowances in addition to existing system of national caps. Member States have agreed national targets for non-EU ETS emissions from countries outside the EU. Meet the national renewable energy targets of 16% for Ireland by 2020. Preparing a legal framework for technologies in carbon capture and storage. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
EU 2030 Framework for Climate and Energy	<ul style="list-style-type: none"> A 2030 Framework for climate and energy, including EU-wide targets and policy objectives for the period between 2020 and 2030 that has been agreed by European countries. Targets include a 40% cut in greenhouse gas emissions compared to 1990 levels, at least a 27% share of renewable energy consumption and at least 27% energy savings compared with the business-as-usual scenario. 	<p>To meet the targets, the European Commission has proposed the following policies for 2030:</p> <ul style="list-style-type: none"> A reformed EU emissions trading scheme (ETS). New indicators for the competitiveness and security of the energy system, such as price differences with major trading partners, diversification of supply, and interconnection capacity between EU countries. First ideas for a new governance system based on national plans for competitive, secure, and sustainable energy. These plans will follow a common EU approach. They will ensure stronger investor certainty, greater transparency, enhanced policy coherence and improved coordination across the EU. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>The Clean Air for Europe Directive (2008/50/EC) (EU Air Framework Directive)</p> <p>Fourth Daughter Directive (2004/107/EC)</p>	<ul style="list-style-type: none"> The CAFE Directive merges existing legislation into a single directive (except for the fourth daughter directive). Sets new air quality objectives for PM_{2.5} (fine particles) including the limit value and exposure related objectives. Accounts for the possibility to discount natural sources of pollution when assessing compliance against limit values. Allows the possibility for time extensions of three years (PM₁₀) or up to five years (NO₂, benzene) for complying with limit values, based on conditions and the assessment by the European Commission. The Fourth Daughter Directive lists pollutants, target values and monitoring requirements for the following: arsenic, cadmium, mercury, nickel and polycyclic aromatic hydrocarbons in ambient air. 	<ul style="list-style-type: none"> Sets objectives for ambient air quality designed to avoid, prevent or reduce harmful effects on human health and the environment as a whole. Aims to assess the ambient air quality in Member States on the basis of common methods and criteria. Obtains information on ambient air quality in order to help combat air pollution and nuisance and to monitor long-term trends and improvements resulting from national and community measures. Ensures that such information on ambient air quality is made available to the public. Aims to maintain air quality where it is good and improving it in other cases. Aims to promote increased cooperation between the Member States in reducing air pollution. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
Noise Directive (2002/49/EC)	The Noise Directive - Directive 2002/49/EC relating to the assessment and management of environmental noise - is part of an EU strategy setting out to reduce the number of people affected by noise in the longer term and to provide a framework for developing existing Community policy on noise reduction from source.	The Directive requires competent authorities in Member States to: <ul style="list-style-type: none"> • Draw up strategic noise maps for major roads, railways, airports and agglomerations, using harmonised noise indicators and use these maps to assess the number of people which may be impacted upon as a result of excessive noise levels; • Draw up action plans to reduce noise where necessary and maintain environmental noise quality where it is good; and • Inform and consult the public about noise exposure, its effects, and the measures considered to address noise. The Directive does not set any limit value, nor does it prescribe the measures to be used in the action plans, which remain at the discretion of the competent authorities.	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Floods Directive (2007/60/EC)	<ul style="list-style-type: none"> • Establishes a framework for the assessment and management of flood risks • Reduce adverse consequences for human health, the environment, cultural heritage and economic activity associated with floods in the Community 	<ul style="list-style-type: none"> • Assess all water courses and coast lines at risk from flooding through Flood Risk Assessment • Prepare flood hazard maps and flood risk maps outlining the extent or potential of flooding and assets and humans at risk in these areas at River Basin District level (Article 3(2) (b)) and areas covered by Article 5(1) and Article 13(1) (b) in accordance with paragraphs 2 and 3. • Implement flood risk management plans and take adequate and coordinated measures to reduce flood risk for the areas covered by the Articles listed above. • Inform the public and allow the public to participate in planning process. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Water Framework Directive (2000/60/EC)	<ul style="list-style-type: none"> • Establish a framework for the protection of water bodies to include inland surface waters, transitional waters, coastal waters and groundwater and their dependent wildlife and habitats. • Preserve and prevent the deterioration of water status and where necessary improve and maintain "good status" of water bodies. • Promote sustainable water usage. • The Water Framework Directive repealed the following Directives: <ul style="list-style-type: none"> ○ The Drinking Water Abstraction Directive ○ Sampling Drinking Water Directive ○ Exchange of Information on Quality of Surface Freshwater Directive ○ Shellfish Directive ○ Freshwater Fish Directive ○ Groundwater (Dangerous Substances) Directive ○ Dangerous Substances Directive 	<ul style="list-style-type: none"> • Protect, enhance and restore all water bodies and meet the environmental objectives outlined in Article 4 of the Directive. • Achieve "good status" for all waters. • Manage water bodies based on identifying and establishing river basins districts. • Involve the public and streamline legislation. • Prepare and implement a River Basin Management Plan for each river basin districts identified and a Register of Protected Areas. • Establish a programme of monitoring for surface water status, groundwater status and protected areas. • Recover costs for water services. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Groundwater Directive (2006/118/EC)	<ul style="list-style-type: none"> • Protect, control and conserve groundwater. • Prevent the deterioration of the status of all bodies of groundwater. • Implements measures to prevent and control groundwater pollution, including criteria for assessing 	<ul style="list-style-type: none"> • Meet minimum groundwater standards listed in Annex 1 of Directive. • Meet threshold values adopted by national legislation for the pollutants, groups of pollutants and indicators of pollution which have been identified as contributing to the 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
European Communities (Environmental Assessment of Certain Plans and Programmes Regulations 2004 (S.I. 435 of 2004), as amended by S.I. 200 of 2011	<ul style="list-style-type: none"> The purpose of these Regulations is to transpose into Irish law Directive 2001/42/EC of 27 June 2001 (O.J. No. L 197, 21 July 2001) on the assessment of the effects of certain plans and programmes on the environment — commonly known as the Strategic Environmental Assessment (SEA) Directive. 	<p>mandatory objectives for the conservation of the natural heritage and for the conservation of European sites and any other sites which may be prescribed. There are also discretionary powers to set objectives for the conservation of a variety of other elements of the natural heritage.</p> <ul style="list-style-type: none"> The Regulations cover plans and programmes in all of the sectors listed in article 3(2) of the Directive except land-use planning. These Regulations also amend certain provisions of the Planning and Development Act 2000 to provide the statutory basis for the transposition of the Directive in respect of land-use planning. Transposition in respect of the land-use planning sector is contained in the Planning and Development (Strategic Environmental Assessment) Regulations 2004 (S.I. No. 436 of 2004). 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
European Communities (Birds and Natural Habitats) Regulations 2011 (S.I. 477 of 2011, as amended)	<ul style="list-style-type: none"> These Regulations provide a new for the implementation in Ireland of Council Directive 92/43/EEC on habitats and protection of wild fauna and flora (as amended) and for the implementation of Directive 2009/147/EC of the European Parliament and of the Council on the protection of wild birds. 	<ul style="list-style-type: none"> They provide, among other things, for: the appointment and functions of authorized officers; identification, classification and other procedures relative to the designation of Community sites. The Regulations have been prepared to address several judgments of the CJEU against Ireland, notably cases C-418/04 and C-183/05, in respect of failure to transpose elements of the Birds Directive and the Habitats Directive into Irish law. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Waste Management Act 1996, as amended	<ul style="list-style-type: none"> To make provision in relation to the prevention, management and control of waste; to give effect to provisions of certain acts adopted by institutions of the European communities in respect of those matters; to amend the Environmental Protection Agency Act, 1992, and to repeal certain enactments and to provide for related matters. 	<ul style="list-style-type: none"> The Waste Management Act contains a number of key legal obligations, including requirements for waste management planning, waste collection and movement, the authorisation of waste facilities, measures to reduce the production of waste and/or promote its recovery. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
European Communities Environmental Objectives (FPM) Regulations 2009 (S.I. 296 of 2009)	<ul style="list-style-type: none"> The purpose of these Regulations is to support the achievement of favourable conservation status for freshwater pearl mussels 	<p>Actions:</p> <ul style="list-style-type: none"> Set environmental quality objectives for the habitats of the freshwater pearl mussel populations named in the First Schedule to these Regulations that are within the boundaries of a site notified in a candidate list of European sites, or designated as a Special Area of Conservation, under the European Communities (Natural Habitats) Regulations, 1997 (S.I. No. 94/1997). Require the production of sub-basin management plans with programmes of measures to achieve these objectives. Set out the duties of public authorities in respect of the sub-basin management plans and programmes of measure 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
European Communities Environmental Objectives (Groundwater) Regulations 2010 (S.I. 9 of 2010), as amended (S.I. No. 366 of 2016)	<ul style="list-style-type: none"> To amend the European Communities Environmental Objectives (Groundwater) Regulations 2010 (S.I. No. 9 of 2010) to make further provision to implement Commission Directive 2014/80/EU of 20 June 2014 amending Annex II to Directive 2006/118/EC of the European Parliament and of the Council on the protection of groundwater against pollution and deterioration. 	<p>The substances and threshold values set out in Schedule 5 to S.I. No. 9 of 2010 have been reviewed and amended where necessary, based on existing monitoring information and international guidelines on appropriate threshold values.</p> <ul style="list-style-type: none"> Part A of Schedule 6 has been amended to include changes to the rules governing the determination of background levels for the purposes of establishing threshold values for groundwater pollutants and indicators of pollution. Part B of Schedule 6 has been amended to include nitrites and phosphorus (total) / phosphates among the minimum list of pollutants and their indicators which the Environmental Protection Agency (EPA) must consider when establishing threshold values Part C of Schedule 6 amends the information to be provided to the Minister by the EPA with regard to the pollutants and their indicators for which threshold values have been established 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
European Communities (Good Agricultural Practice for Protection of Waters) Regulations 2014 (S.I. No. 31 of 2014)	<ul style="list-style-type: none"> These Regulations, which give effect to Ireland's 3rd Nitrates Action Programme, provide statutory support for good agricultural practice to protect waters against pollution from agricultural sources 	<p>The Regulations include measures such as:</p> <ul style="list-style-type: none"> Periods when land application of fertilisers is prohibited Limits on the land application of fertilisers Storage requirements for livestock manure; and Monitoring of the effectiveness of the measures in terms of agricultural practice and impact on water quality. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Climate Action and Low Carbon Development Act 2015	<ul style="list-style-type: none"> An Act to provide for the approval of plans by the Government in relation to climate change for the purpose of pursuing the transition to a low carbon, climate resilient and environmentally sustainable economy. 	<p>When considering a plan or framework, for approval, the Government shall endeavour to achieve the national transition objective within the period to which the objective relates and shall, in endeavouring to achieve that objective, ensure that such objective is achieved by the implementation of measures that are cost effective and shall, for that purpose, have regard to:</p> <ul style="list-style-type: none"> The ultimate objective specified in Article 2 of the United Nations Framework Convention on Climate Change done at New York on 9 May 1992 and any mitigation commitment entered into by the European Union in response or otherwise in relation to that objective, The policy of the Government on climate change, Climate justice, Any existing obligation of the State under the law of the European Union or any international agreement referred to in section 2; and The most recent national greenhouse gas emissions inventory and projection of future greenhouse gas emissions, prepared by the Agency. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
<p>The Sustainable Development Goals National Implementation Plan (2018 – 2020)</p>	<ul style="list-style-type: none"> National Implementation Plan 2018 - 2020 is in direct response to the 2030 Agenda for Sustainable Development and provides a whole-of-government approach to implement the 17 Sustainable Development Goals (SDGs). The Plan provides a 'SDG Matrix' which identifies the responsible Government Departments for each of the 169 targets. It also includes a 'SDG Policy Map' indicating the relevant national policies for each of the targets. 	<p>The Plan identifies four strategic priorities to guide implementation:</p> <ul style="list-style-type: none"> Awareness: raise public awareness of the SDGs; Participation: provide stakeholders opportunities to engage and contribute to follow-up and review processes, and further develop national implementation of the Goals; Support: encourage and support efforts of communities and organisations to contribute towards meeting the SDGs, and foster public participation; and Policy alignment: develop alignment of national policy with the SDGs and identify opportunities for policy coherence. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Infrastructure and Capital Investment Plan (2016-2021)</p>	<ul style="list-style-type: none"> €27 billion multi-annual Exchequer Capital Investment Plan, which is supported by a programme of capital investment in the wider State sector, and which over the period 2016 to 2021 will help to lay the foundations for continued growth in Ireland. 	<ul style="list-style-type: none"> This Capital Plan reflects the Government's commitment to supporting strong and sustainable economic growth and raising welfare and living standards for all. It includes allocations for new projects across a number of key areas and funding to ensure that the present stock of national infrastructure is refreshed and maintained. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Aquaculture Acts 1997 to 2006 : (Sea-Fisheries and Maritime Jurisdiction Act 2006 (8/2006), s. 1(3))</p> <ul style="list-style-type: none"> Fisheries (Amendment) Act 1997 (23/1997) Fisheries and Foreshore (Amendment) Act 1998 (54/1998), ss. 2, 3 and 4 Fisheries (Amendment) Act 2001 (40/2001) Sea-Fisheries and Maritime Jurisdiction Act 2006 (8/2006), s. 101 	<p>The Aquaculture and Foreshore Management Division ensures the efficient and effective management of Aquaculture licensing and Foreshore licensing in respect of Aquaculture and Sea Fishery related activities.</p>	<p>The Strategic Objectives of the Aquaculture & Foreshore Management Division are:</p> <ul style="list-style-type: none"> to develop and manage an efficient and effective regulatory framework in respect of Aquaculture licensing and Foreshore licensing of Aquaculture and Sea Fishery related activities; to secure a fair financial return from the State's foreshore estate in the context of Aquaculture licensing and Foreshore licensing in respect of Aquaculture and Sea Fishery related activities; to progressively reduce arrears in the clearing of licence applications. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Foreshore Acts 1933 to 2011</p>	<p>The Foreshore Acts require that a lease or licence must be obtained from the Minister for Housing, Planning and Local Government for the carrying out of works or placing structures or material on, or for the occupation of or removal of material from, State-owned foreshore, which represents the greater part of the foreshore. Construction of permanent structures on privately owned foreshore also required the prior permission of the Minister under the Foreshore Act.</p>	<ul style="list-style-type: none"> Developments on the foreshore require planning permission in addition to a Foreshore Lease/Licence/Permission. All Foreshore Leases, Licences and Permissions are without prejudice to the powers of the local planning authority. Applicants should, therefore, consult initially with the local planning authority regarding their proposal. In the case of developments on foreshore for, by or on behalf of a Local Authority where an EIS is required, applications should be made to An Bord 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
		<ul style="list-style-type: none"> • Develop a drought plan advising measures to be taken before and during drought events • Develop a plan detailing how we deal with the material that is produced as a result of treating drinking water • Identify, develop and assess options to help meet potential shortfalls in water supplies • Assess the water resources available at a national level including lakes, rivers and groundwater 	environmental protection and management.
National Strategic Plan for Aquaculture Development (2014-2020)	Vision: <i>“Aquaculture in RC is economically, socially and ecologically sustainable, with a developed infrastructure, strong human potentials and an organized market. The consumption of aquaculture products is equal or above EU average, while the technological development of the sector is among the best in the EU.”</i>	General development and growth objectives of marine and freshwater aquaculture (2014 – 2020): <ul style="list-style-type: none"> • Strengthen the social, business and administrative environment for aquaculture development • Increase in the total production to 24,050 tonnes while adhering to the principles of economic, social and ecological sustainability • Improvement of the perception and increase in the national consumption of National products 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Construction 2020, A Strategy for a Renewed Construction Sector	<ul style="list-style-type: none"> • Construction 2020 sets out a package of measures agreed by the Government and is aimed at stimulating activity in the building industry. • The Strategy aims both to increase the capacity of the sector to create and maintain jobs, and to deliver a sustainable sector, operating at an appropriate level. It seeks to learn the lessons of the past and to ensure that the right structures and mechanisms are in place so that they are not repeated. 	This Strategy therefore addresses issues including: <ul style="list-style-type: none"> • A strategic approach to the provision of housing, based on real and measured needs, with mechanisms in place to detect and act when things are going wrong; • Continuing improvement of the planning process, striking the right balance between current and future requirements; • The availability of financing for viable and worthwhile projects; • Access to mortgage finance on reasonable and sustainable terms; • Ensuring we have the tools we need to monitor and regulate the sector in a way that underpins public confidence and worker safety; • Ensuring a fit for purpose sector supported by a highly skilled workforce achieving high quality and standards; and • Ensuring opportunities are provided to unemployed former construction workers to contribute to the recovery of the sector. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Sustainable Development: A Strategy for Ireland (1997)	<ul style="list-style-type: none"> • The overall aim of this Strategy is to ensure that economy and society in Ireland can develop to their full potential within a well-protected environment, without compromising the quality of that environment, and with responsibility towards present and future generations and the wider international community. 	<ul style="list-style-type: none"> • The Strategy addresses all areas of Government policy, and of economic and societal activity, which impact on the environment. It seeks to re-orientate policies as necessary to ensure that the strong growth Ireland enjoys and seeks to maintain will be environmentally sustainable. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
National Landscape Strategy for Ireland 2015-2025 and National Landscape Character Assessment (pending preparation)	<ul style="list-style-type: none"> • The National Landscape Strategy will be used to ensure compliance with the European Landscape Convention and to establish principles for protecting and enhancing the landscape while positively 	The objectives of the National Landscape Strategy are to: <ul style="list-style-type: none"> • Implement the European Landscape Convention by integrating landscape into the approach to sustainable development; 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in

River Basin Management Plan	<ul style="list-style-type: none"> • River Basin Management Plans set out the measures planned to maintain and improve the status of waters. 	<ul style="list-style-type: none"> • Aim to protect and enhance all water bodies in the RBD and meet the environmental objectives outlined in Article 4 of the Water Framework Directive. • Identify and manages water bodies in the RBD. • Establish a programme of measures for monitoring and improving water quality in the RBD. • Involve the public through consultations. 	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
National Peatlands Strategy (2015-2025)	This Strategy aims to provide a long-term framework within which all of the peatlands within the State can be managed responsibly in order to optimise their social, environmental and economic contribution to the well-being of this and future generations.	<p>Objectives of the Strategy:</p> <ul style="list-style-type: none"> • To give direction to Ireland's approach to peatland management. • To apply to all peatlands, including peat soils. • To ensure that the relevant State authorities and state owned companies that influence such decisions contribute to meeting cross-cutting objectives and obligations in their policies and actions. • To ensure that Ireland's peatlands are sustainably managed so that their benefits can be enjoyed responsibly. • To inform appropriate regulatory systems to facilitate good decision making in support of responsible use. • To inform the provision of appropriate incentives, financial supports and disincentives where required. • To provide a framework for determining and ensuring the most appropriate future use of cutover and cutaway bogs. <p>To ensure that specific actions necessary for the achievement of its objectives are clearly identified and delivered by those involved in or responsible for peatlands management or for decisions affecting their management.</p>	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.
Flood Risk Management Plans arising from National Catchment Flood Risk Assessment and Management Programme	<ul style="list-style-type: none"> • The national Catchment Flood Risk Assessment and Management (CFRAM) programme commenced in Ireland in 2011 and is being overseen by the Office of Public Works. The CFRAM Programme is intended to deliver on core components of the National Flood Policy, adopted in 2004, and on the requirements of the EU Floods Directive. 	CFRAM Studies have been undertaken for all River Basin Districts. The studies are focusing on areas known to have experienced flooding in the past and areas that may be subject to flooding in the future either due to development pressures or climate change. Flood Risk and Hazard mapping, including Flood Extent Mapping, was finalised in 2017. The final outputs from the studies are the CFRAM Plans, finalised in 2018. The Plans define the current and future flood risk in the River Basin Districts and set out how this risk can be managed.	Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.

<p>National Policy Framework for Alternative Fuels Infrastructure for Transport in Ireland 2017 to 2030</p>	<ul style="list-style-type: none"> This National Policy Framework on Alternative Fuels Infrastructure for Transport represents the first step in communicating our longer-term national vision for decarbonising transport by 2050, the cornerstone of which is our ambition that by 2030 all new cars and vans sold in Ireland will be zero-emissions capable. By 2030 it is envisaged that the movement in Ireland to electrically-fuelled cars and commuter rail will be well underway, with natural gas and biofuels developing as major alternatives in the freight and bus sectors. 	<p>This policy set out to achieve five key goals in transport:</p> <ul style="list-style-type: none"> Reduce overall travel demand Maximise the efficiency of the transport network Reduce reliance on fossil fuels Reduce transport emissions Improve accessibility to transport <p>These goals remain the cornerstone of transport policy and are fully aligned to the objectives of this National Policy Framework.</p>	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Tourism Action Plan 2019-2021</p>	<p>The Tourism Action Plan 2019-2021 sets out actions that the Tourism Leadership Group has identified as priorities to be progressed until 2021 in order to maintain sustainable growth in overseas tourism revenue and employment. Each action involves specific tourism stakeholders, both in the public and private sectors, all of whom we expect to proactively work towards the completion of actions within the specified timeframe.</p>	<p>The Plan contains 27 actions focusing on the following areas:</p> <ul style="list-style-type: none"> Policy Context Marketing Ireland as a Visitor Destination Enhancing the Visitor Experience Research in the Irish Tourism Sector Supporting Local Communities in Tourism Wider Government Policy International Context Co-ordination Structures 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Tourism Policy Statement: People, Place and Policy – Growing Tourism to 2025</p>	<p>The main goal of this policy statement is to have a vibrant, attractive tourism sector that makes a significant contribution to employment across the country; is economically, socially and environmentally sustainable; helps promote a positive image of Ireland overseas, and is a sector in which people want to work.</p>	<p>The Tourism Policy Statement sets three headline targets to be achieved by 2025:</p> <ul style="list-style-type: none"> Overseas tourism revenue of €5 billion per year net of inflation excluding carrier receipts; 250,000 people employed in tourism; and 10 million overseas visitors to Ireland per year. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Regional/ County/Local Level			
<p>Southern Regional Economic and Spatial Strategies, replacing Regional Planning Guidelines [in preparation]</p>	<p>The Regional Spatial and Economic Strategies will provide a long-term regional level strategic planning and economic framework in support of the implementation of the National Planning Framework.</p>	<p>The Southern Region is comprised of ten Local Authorities: Cork City Council, Cork County Council, Clare County Council, Kerry County Council, Limerick City and County Council, Tipperary County Council and Waterford City and County Council, Carlow County Council, Kilkenny County Council and Wexford County Council.</p>	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Integrated Implementation Plan 2019-2024</p>	<p>The Transport Strategy for the Greater Dublin Area 2016-2035, which established an overall framework for transport investment over the next two decades and was subject to full SEA and Stage 2 AA, is a key policy shaping the six-year Integrated Infrastructure Plan. The priorities in the Integrated Infrastructure Plan align with the objectives and priorities set out in the Transport Strategy, focused on improving public and sustainable transport.</p>	<p>The Implementation Plan identifies investment proposals for a number of areas including:</p> <ul style="list-style-type: none"> Bus; Light Rail; Heavy Rai; Integration Measures and Sustainable Transport Investment; Integrated Service Plan; and 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for</p>

Kerry County Council Heritage and Biodiversity Plan 2008-2012	<ul style="list-style-type: none"> • Aims to highlight the importance of heritage at a strategic level. • Aims to protect, conserve, enhance and restore biodiversity and ecosystem services across all spectrums. 	<ul style="list-style-type: none"> • Manage and promote heritage as well as increase awareness. • Aim to conserve and protect heritage. • Outlines the status of biodiversity and identifies species of importance. • Outlines objectives and targets to be met to maintain and improve biodiversity. • Aims to increase awareness 	<p>regulatory framework for environmental protection and management.</p> <p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
<p>Kerry County Council Climate Change Adaptation Strategy 2019-2024</p> <p>Draft Cork Climate Change Adaptation Strategy 2019-2024</p>	<p>These Strategies outline the proposed Adaptation Strategy that Kerry County Council and Cork County Council will implement to adapt to the effects of climate change and to safeguard the biophysical infrastructure and wellbeing of the people and communities of County Kerry and County Cork. The strategy sets out the high-level vision on how we will transition to a low carbon climate resilient future by adapting a wide range of actions across the different Directorates to adapt to the challenges of climate change. The strategy will be dynamic and flexible to respond quickly to the threats and opportunities that will face the local authority in the coming years.</p>	<ul style="list-style-type: none"> • Climate Change adaptation considerations are mainstreamed and integrated successfully into all functions and activities of the local authority ensuring operational protocols, procedures and policies implement an appropriate response in addressing the diversity of impacts associated with climate change. • Increased capacity for climate resilient structural infrastructure is centred around the effective management of climate risk, informed investment decisions and positive contribution towards a low carbon society. • Sustainable policies and measures are devised influencing positive behavioural changes, supporting climate adaptation actions and endorsing approaches for successful transition to low carbon and climate resilient society. • Create understanding of risks and consequences of flooding and successful management of a co-ordinated approach to drainage and flooding • Fostering meaningful approaches to protecting natural and key cultural assets through an appreciation for the adaptive capacity of the natural environment to absorb the impacts of climate change. • Empowered and cohesive communities with strong understanding of climate risks, increased resilience to impacts of climate change with capacity to champion climate action at local level. 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>
Southern Region Waste Management Plan 2015-2021	<p>The plan gives effect to national and EU waste policy, and address waste prevention and management (including generation, collection and treatment) over the period 2015-2021.</p>	<p>To manage wastes in a safe and compliant manner, a clear strategy, policies and actions are required.</p>	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection and management.</p>

Legislation, Plan, etc.	Summary of high-level aim/ purpose/ objective	Summary of lower level objectives, actions etc.	Relevance to the Plan
<p>Kerry County Council Draft Noise Action Plan 2019</p> <p>Cork County Council Noise Action Plan 2018-2023: Major Roads Cork County Area</p>	<p>The Noise Action Plans are prepared in accordance with the requirements of the Environmental Noise Regulations 2006, Statutory Instrument 140 of 2006. These Regulations give effect to the EU Directive 2002/49/EC relating to the assessment and management of environmental noise. This Directive sets out a process for managing environmental noise in a consistent manner across the EU and the Noise Regulations set out the approach to meeting the requirements of the Directive in Ireland.</p>	<p>The main purpose of the Noise Action Plan is to:</p> <ul style="list-style-type: none"> • Inform and consult the public about noise exposure, its effects and the measures which may be considered to address noise problems • Address strategic noise issues by requiring competent authorities to draw up action plans to manage noise issues and their effects • Reduce noise, where possible, and maintain the environmental acoustic quality where it is good 	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection.</p>
<p>Wild Atlantic Way Operational Programme 2015-2019</p>	<p>The vision for the Wild Atlantic Way brand is: To create a world class, sustainable and un-missable experience brand that engages and energises the visitor so that they become powerful advocates and leaves them wanting to return for more.</p>	<p>The goals and outcomes of the Wild Atlantic Way are presented here under the headings of the 'VICE' model, a recognised tourism model for sustainable development and which considers the four key and interdependent elements of Visitor, Industry, Community and Environment.</p> <ul style="list-style-type: none"> • To ensure that the Wild Atlantic Way brand is compelling to our target market segments and that the Wild Atlantic Way itself becomes a world-class visitor experience. • To ensure that the Wild Atlantic Way delivers balanced and sustainable revenue and jobs growth with greater geographic and seasonal spread • To ensure that the Wild Atlantic Way delivers benefits to local communities in the west of Ireland and contributes to a better place to live for everyone. <p>To ensure that the implementation of the Wild Atlantic Way Operational Programme facilitates the protection and enhancement of the environment of the west of Ireland – as the fundamental asset that is the basis of the Wild Atlantic Way – in association with other key stakeholders.</p>	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection.</p>
<p>Fáilte Ireland plans, strategies etc. relating to the Wild Atlantic Way, Ireland's Ancient East or other brands or initiatives</p>	<p>Fáilte Ireland's work includes preparing various plans and strategies for the Wild Atlantic Way, Ireland's Ancient East and other brands and initiatives. These plans are subject to their own environmental assessment processes and any project arising is required to be consistent with and conform with the provisions of all adopted/approved Statutory Policies, Strategies, Plans and Programmes, including provisions for the protection and management of the environment.</p>	<p>Some of Fáilte Ireland's plans and strategies include various projects relating to land use and infrastructural development, including those relating to development of land or on land and the carrying out of land use activities. Many of these projects exist already while some are not currently in existence. The Statutory Policies, Strategies, Plans and Programmes that provide for different projects undergo a variety of environmental assessments. These assessments ensure that environmental effects are considered, including: those arising from new and intensified uses and activities; and those arising from various sectors such as tourism.</p>	<p>Implementation of the Plan needs to comply with all environmental legislation and align with and cumulatively contribute towards – in combination with other users and bodies and their plans etc. – the achievement of the objectives of the regulatory framework for environmental protection.</p>
