Guidelines - Classifications

Section 1: General Business Processes

NOTE: Sample templates will be available from the Fáilte Ireland site for these General Business Processes.

General Business Processes may be described **verbally**, when appropriate, without a document being presented. Documentation, where available, may assist the assessment.

For very small businesses, some or all plans may be described **verbally, but with some thought and planning being evident**. This will usually be acceptable for very small businesses. These are usually, but not exclusively, those businesses with around three or fewer staff. However, documentation, however brief, is always recommended.

General Business Processes	
1.1	<p>Business planning process showing evidence of plans for growth over a minimum 3-year period.</p> <p><i>For example. These are for guidance and not requirements but examples of best practice.</i></p> <ul style="list-style-type: none"> Evidence of business plan (may only be one page) demonstrating an understanding of the current business environment and a plan for the future. This may be described verbally without the document being presented. The plan may be an outline of activity only for very small businesses, as a guideline, usually those with around three or fewer staff. Sit with your staff to discuss what your business and service goals are, how they can contribute and what the likely benefits are to all concerned for trying to be better at what you do.
